FACULTY of Computer Science and Management / DEPARTMENT……

SUBJECT CARD

Name in Polish: Bezpieczeństwo sieciowe i internetowe
Name in English: Security and Reliability of Information Systems
Main field of study (if applicable): Informatics
Specialization (if applicable): Security and Reliability of Information Systems
Level and form of studies: ~~1st~~/ 2nd* level, ~~full-time~~ / part-time*
Kind of subject: obligatory / ~~optional~~ / ~~university-wide~~*
Subject code INZ4069
Group of courses ~~YES~~ / NO*

	Lecture	Classes	Laboratory	Project	Seminar
Number of hours of organized classes in University (ZZU)	18		18		
Number of hours of total student workload (CNPS)	120		60		
Form of crediting	Examination / ~~crediting with grade~~*	Examination / crediting with grade*	~~Examination~~ / crediting with grade*	Examination / crediting with grade*	Examination / crediting with grade*
For group of courses mark (X) final course					
Number of ECTS points	4		2		
including number of ECTS points for practical (P) classes	0		2		
including number of ECTS points for direct teacher-student contact (BK) classes	1,6		0,8		

*delete as not applicable

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

1. Knowledge and skills in the field of computer networks.
2. Knowledge and skills in the field of databases and SQL.
3. Windows and Linux administration ability
4. Knowledge of programming languages and platforms, web applications (HTML, XML, C#, JavaScript).

\

SUBJECT OBJECTIVES

C1 The acquisition of knowledge in the area of safety engineering systems, network and Internet security protocol stack TCP / IP and Web Services protocol stack.
C2 Acquisition of knowledge about how to protect data integrity, network security using firewalls and IDS and IPS to detect and prevent attacks.
C3 Acquisition of knowledge on the mechanisms and tools to increase the safety and security policies and audit system and network security information and business processes.
C4 Acquiring the skills to apply tools, methods, mechanisms and software solutions to increase the safety, security audit and intrusion detection system development.

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:

PEK_W01 – has knowledge of the concept of security systems and networks, information about the characteristics of safe, familiar classification of attacks on the security of systems and networks.

PEK_W02 – has knowledge of network security and protocol stack TCP / IP, is aware of the attacks on the communication protocols and infrastructure IP, DNS, and directory services, and preventing these attacks, has knowledge of the dangers and realizations DoS and DDoS attacks and the defense mechanisms and systems network from these attacks, has knowledge of intelligent systems, IDS and IPS detection and intrusion prevention systems and the FD.

PEK_W03 – have knowledge about the safety of Wi-Fi and WiMAX, known standards and protocols secure wireless communications.

PEK_W04 – has knowledge of Internet safety information and services as well as security threats and attacks against SQL injection and cross-site scripting, web, email, instant messaging, search engines, Web Services infrastructure, business processes, cloud computing.

PEK_W05 – has knowledge of social engineering attacks, phishing and to prevent these attacks, as well as the security of electronic banking has advanced knowledge about the services and PKI - embodiments of the certification hierarchy, from the Centers for server certification services.

PEK_W06 – has knowledge of information systems security policy and network, and knowledge of safety audit - its different models, methodologies, standards and de facto standards and best practices.

relating to skills:

PEK_U01 – ability to assess the quality and use tools for penetration testing and security scanners systems and networks.

PEK_U02 – ability to demonstrate the attack scenarios and examine and apply methods and tools to detect and prevent attacks and enhance security systems, networks, and web services.

PEK_U03 – ability to use biometric security.

PEK_U04 – ability to perform information security audits with selected methodologies and tools.

relating to social competences:

PEK_K01 – understands the importance of information security, social and business processes, and information systems of national government.

PEK_K02 – has the ability to work in a team on study tasks and implementation of solutions.

PROGRAMME CONTENT

Form of classes - lecture		**Number of hours**
Lec 1	The safety concept of systems and networks. Network and protocol stack TCP / IP. Features information safe. Classification of attacks.	2
Lec 2	Confidentiality, authentication, authorization, integrity.	2
Lec 3	Basic cryptography, symmetric and asymmetric encryption. PKI, X509 standard. Cryptography systems and networks.	2
Lec 4	Attacks on communication and IP protocol, firewall architectures, address translation, and packet filters.	2
Lec 5	Security of network applications and services – Web, email, instant messaging, Web search engines, Web services infrastructure, defense against XSS and SQL Injection.	2
Lec 6	Security of electronic banking. Security of directory services. Security in wireless networks.	2

Lec 7	Authentication and access control to corporate intranets.	2
Lec 8	Security policy and standardization of IT infrastructure security.	
Lec 9	Intrusion detection systems IDS and intrusion prevention systems IPS. Security audit.	2
	Total hours	18
Form of classes - class		**Number of hours**
Cl 1		
Cl 2		
Cl 3		
Cl 4		
..		
	Total hours	
Form of classes - laboratory		**Number of hours**
Lab 1	DoS attacks and prevention. Password cracking.	2
Lab 2	Penetration testing tools. Security scanners for systems and networks.	2
Lab 3	Sniffing – methods and tools. Detecting and preventing sniffing attacks.	2
Lab 4	XSS attacks and prevention. SQL Injection attacks and prevention.	2
Lab 5	WEP, WPA, WPA2 – security and attacks against security. Security of wireless network infrastructure.	2
Lab 6	Certification and PKI. Certified mail, news, and business servers and clients, Web services and e-mail. PGP and GPG.	2
Lab 7	Social engineering attacks. Phishing, whaling, scamming. Phishing prevention. Google Hacking.	2
Lab 8	Biometric security.	2
Lab 9	Safety messaging, security of social networking, security infrastructure of systems with a stack of protocols in web services, cloud computing security, business processes security. Simulating an attack in quantum cryptography. Security audit. Audit tools and systems.	2
	Total hours	18
Form of classes - project		**Number of hours**
Proj 1		
Proj 2		
Proj 3		
Proj 4		
…		
	Total hours	
Form of classes - seminar		**Number of hours**
Sem 1		
Sem 2		
Sem 3		
…		

	Total hours	

TEACHING TOOLS USED

N1. Traditional lectures based on multimedia presentations.
N2. A computer lab with Internet access, and virtualization capabilities of workstations and servers.
N3. Research carried out by the students. Participation in the performance of student research and laboratory tasks.
N4. Studying the issues discussed during the lecture. Preparation for the exam.
N5. Consultations for students.

EVALUATION OF SUBJECT EDUCATIONAL EFFECTS ACHIEVEMENT

Evaluation (F – forming (during semester), P – concluding (at semester end)	Educational effect number	Way of evaluating educational effect achievement
F1	PEK_U02, PEK_K02	Ratings for the implementation and documentation of research.
F2	PEK_U01, PEK_U03-PEK_U04	Ratings for the implementation and documentation of laboratory tasks.
C	PEK_W01-PEK_W06	Examination.

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

5. Knowledge and skills on Probability and mathematical statistics.
6. Knowledge and skills on Modeling the reliability of systems.

\

SUBJECT OBJECTIVES

C1 The acquisition of knowledge in the area of diagnostic systems, models and strategies diagnosis systems, and the use and applications of the formalism of finite automata and Petri nets for testing and diagnostics systems and software.
C2 Acquisition of knowledge on UML models and graph-theoretic models in diagnosis systems.
C3 Acquisition of knowledge on the effectiveness of diagnostic testing, self-diagnosis information systems, mechanisms and protocols of diagnostic, repair and reliability in distributed systems and databases.
C4 Acquisition of knowledge on testing tools, diagnostics, fault location, acquisition of diagnostic knowledge, diagnostic expert systems based on statistics and artificial intelligence - evolutionary methods and neural networks, fuzzy logic as well.

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:
PEK_W01 – have knowledge of computer systems, models and strategies diagnosis systems, and the use and applications of the formalism of finite automata and Petri nets for testing and diagnostics systems and software.
PEK_W02 – has knowledge of the UML models and graph-theoretic models in diagnosis systems.
PEK_W03 – has knowledge of the effectiveness of diagnostic tests, self-diagnosis information systems, mechanisms and protocols of diagnostic, repair and reliability in distributed systems and databases.

relating to skills:
PEK_U01 – can use testing tools, diagnostics, fault location, diagnostics knowledge acquisition, diagnostic expert systems based on statistics and artificial intelligence - evolutionary methods and neural networks and fuzzy logic.

relating to social competences:
PEK_K01 – understands the importance of technical diagnostics and diagnostic systems in the course of a variety of technical and social processes.
PEK_K02 – know how to carry out research work as a team and solve problems.

PROGRAMME CONTENT		
Form of classes - lecture		**Number of hours**
Lec 1	The issue of diagnostic systems. Models and strategies of diagnostic systems.	1
Lec 2	Finite automata theory formalisms in the diagnosis. The use of models and formalisms of Petri nets in the diagnostics software.	2
Lec 3	Software testing - the stop conditions. Petri net models in software testing.	1
Lec 4	Diagnostics behavior of UML models of software systems. Graph theory and its applications in diagnostics systems.	1
Lec 5	Graph topology modeling of secure information systems and networks. Trees diagnostic system in the diagnosis of behavioral systems.	1
Lec 6	The theory of Petri net reachability in the diagnosis of software and information systems. The diagnostic tests.	1
Lec 7	The effectiveness of diagnostic tests. Self-diagnosis information systems.	1
Lec 8	Diagnostic, repair and reliability mechanisms in communication protocols, distributed systems and databases. Final test.	1
	Total hours	9
Form of classes - class		**Number of hours**
Cl 1		
Cl 2		
Cl 3		
Cl 4		
..		
	Total hours	
Form of classes - laboratory		**Number of hours**
Lab 1	Software testing and software diagnosis. Dedicated software. Debugging software environments. Discussion of student research topics, how to study subjects, how to prepare test documentation and presentation. Acquisition of research topics.	2
Lab 2	Diagnostic knowledge acquisition methods. Statistical models. Dedicated software. Practical exercises on the areas of two student research teams.	2
Lab 3	Computer hardware testing. Computer hardware diagnosis. Hardware testers. Performance tests. Dedicated software. Practical exercises on the areas of student research teams.	2
Lab 4	Expert systems for technical diagnosis. Specialized software. Statistical packages.	2

	Practical exercises for student research. Practical exercises on the areas of student research teams.	
Lab 5	Expert systems for technical diagnosis. Specialized software. Statistical packages. Practical exercises on the areas of student research teams.	2
Lab 6	Fault location. Specialized software. Statistical packages. Practical exercises on the areas of student research teams.	2
Lab 7	Evolutionary methods in the design of diagnostic systems. Specialized software. Statistical packages. Practical exercises on the areas of student research teams.	2
Lab 8	Artificial neural networks in the diagnosis of computer systems. Specialized software. Statistical packages. Practical exercises on the areas of student research teams.	2
Lab 9	Methods of obtaining diagnostic knowledge. Specialized software. Statistical packages. Practical exercises on the areas of student research teams.	2
	Total hours	18

Form of classes - project		**Number of hours**
Proj 1

*delete as applicable

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

1 Basic knowledge of calculus, algebra, probability and statistics.
2 Ability to program in a higher level language (Java, C + +, C #, Python).

\

SUBJECT OBJECTIVES

C1 Acquisition of basic knowledge about functioning and construction systems with the symmetric key cryptography.
C2 Acquisition of basic knowledge about functioning and construction systems with the asymmetric key cryptography (public).
C3 Acquisition of basic knowledge about cryptanalysis algorithms and cryptographic systems.

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:
PEK_W01 - knows the history and the mathematical basis for the operation of cryptographic systems;
PEK_W02 - has knowledge about the functioning of symmetric key algorithms;
PEK_W03 - has knowledge about the functioning of asymmetric key algorithms (public);
PEK_W04 - have a basic understanding of the scope of breaking of cryptographic algorithms.

relating to skills:
PEK_U01 - can implement simple cryptographic algorithms in a high level programming language;
PEK_U02 - can properly select and use cryptographic algorithms available in a library of cryptographic algorithms.

relating to social competences:
PEK_K01 - can work collectively to solve problems.

PROGRAMME CONTENT

	Form of classes - lecture	**Number of hours**
Lec 1	Introduction to the course. Cryptology, cryptography, cryptanalysis - definitions and terminology. History of cryptography and cryptanalysis.	1
Lec 2	Mathematical - selected topics in information theory, number theory and computational complexity.	1
Lec 3	Cryptographic systems - components and properties.	1
Lec 4	Encryption steps - substitutions and transpositions.	1
Lec 5	Polyalphabetic encryption.	1
Lec 6	Block and stream ciphers.	2
Lec 7	Symmetric-key algorithms.	2
Lec 8	Public-key algorithms.	2
Lec 9	Random number generators – keys generation.	1
Lec 10	Generating prime numbers. Hash functions.	1
Lec 11	Digital Signatures. Certificates and Public Key Infrastructure.	1
Lec 12	Cryptographic protocols.	1
Lec 13	Cryptographic systems on elliptic and hyperelliptic curves.	1

Lec 14	Cryptanalysis and cryptanalytic methods - Selected Issues (Part 1)	1
Lec 15	Cryptanalysis and cryptanalytic methods - Selected Issues (Part 2)	1
	Total hours	18

Form of classes - laboratory		**Number of hours**
Lab 1	Organizational issues. Health and Safety Training.	1
Lab 2	Introduction to available educational software in the field of cryptography and cryptanalysis.	1
Lab 3	Mathematical software for cryptographic computations.	1
Lab 4	Implementation of a network application framework for learning of cryptographic techniques and algorithms.	1
Lab 5	Implementation of simple cryptographic algorithms (alg. Caesar, etc.).	1
Lab 6	The implementation of more advanced cryptographic algorithms (alg. Viginere).	1
Lab 7	Techniques for network traffic monitoring to verify the cryptographic security of network communication.	1
Lab 8	Using of cryptographic software libraries - DES and AES.	2
Lab 9	Implementation of the RSA algorithm.	2
Lab 10	Using of cryptographic software libraries - RSA algorithm.	2
Lab 11	Enabling of the RSA algorithm for the network application.	1
Lab 12	Implementation of digital signature in the network application.	1
Lab 13	Using cryptographic certificates.	1
Lab 14	The cryptographic network application tests.	1
Lab 15	Assessment of progress and final grades.	1
	Total hours	18

TEACHING TOOLS USED

N1. Traditional lecture.
N2. Computer laboratories.
N3. Consultations for students.
N4. Own work - preparing for laboratories.
N5. Own work - self-study and exam preparation.

EVALUATION OF SUBJECT EDUCATIONAL EFFECTS ACHIEVEMENT

Evaluation (F – forming (during semester), P – concluding (at semester end)	Educational effect number	Way of evaluating educational effect achievement
F1	PEK_U01- PEK_U02 PEK_K01	Assessment for conducting of laboratory tasks or software implementation.
P	PEK_W01 - PEK_W04	Examination.

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

7. Knowledge and skills on Cryptography.
8. Knowledge and skills on Network and Internet Security.
9. Knowledge and skills on Probability and mathematical statistics.

\

SUBJECT OBJECTIVES

C1 Acquisition of knowledge in the area of informatics and quantum cryptography.
C2 Acquisition of knowledge on ideas and patterns of action absolutely secure quantum channels.
C3 Acquisition of knowledge on quantum cryptographic key distribution, and swapped and non-swapped QKD protocols, distillation key in QKD, authentication in QKD.
C4 Acquisition of knowledge on modern implementations of quantum cryptography, an overview of the current state of development of technical platforms, research projects and commercial technical platforms.
C5 Acquisition of knowledge on the real security of quantum cryptography practical implementation as well as the types of attacks on quantum cryptography schemes.
C6 Acquisition of knowledge on advanced methods for processing of measured data from the system software for the platform cryptographic id3100 Clavis of Id Quantique.

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:
PEK_W01 – has knowledge of the fundamentals of computer science and quantum cryptography.
PEK_W02 – has knowledge of the ideas and patterns of action absolutely secure quantum channels. He knows the basic theorems of quantum - no-cloning, no-deleting, no-broadcasting. He has knowledge of quantum swapping.
PEK_W03 – has knowledge of modern realizations of quantum cryptography, knows the current state of development of technical platforms, research projects and commercial technical platforms for single and entangled photons.
PEK_W04 – have knowledge of advanced methods for measurement data processing software systems and technical platforms quantum cryptography - DARPA SECOQC, UQCC, Tokyo QKD Network, IdQuantique, SwissQuantum, Magiq Technologies, Toshiba.
PEK_W05 – has actual knowledge of the practical implementation of the security of quantum cryptography. He knows the kinds of attacks on quantum cryptography schemes.

relating to skills:
PEK_U01 – has been able to maintain a software system used for cryptographic id3100 Clavis PKI platform of Id Quantique, and can lead acquisition and process measurement data advanced statistical methods and data mining techniques.
PEK_U02 – is able to present the methods and results measurement data processing platform cryptographic PKI be a record of the examination, as well as hold a discussion on these issues

with the audience.

relating to social competences:
PEK_K01 – understand the benefits and risks of quantum cryptography in applications for computer systems maintenance and automation of social and economic processes.
PEK_K02 – know how to carry out research work as a team and solve problems.

PROGRAMME CONTENT

Form of classes - lecture		**Number of hours**
Lec 1	Conditional security communication channels based on classical cryptography. The threat of a classical computer. The threat of quantum computing. The essence of quantum information processing. Quantum algorithms Shore and Grover. Practical realization of a quantum computer.	1
Lec 2	Quantum cryptography as fundamentally safe method of transmission of classified information. Unique properties of quantum mechanics in the context of information security. United quantum and nature of quantum measurement. Basic theorems of quantum - no-cloning, no-deleting, no-broadcasting. Quantum swapping.	1
Lec 3	Quantum cryptographic key distribution. Non-swapping QKD protocols. Swapping QKD protocols. Distillation of the QKD key. Authentication.	1
Lec 4	Modern implementations of quantum cryptography. Technology implementation. Single photons. Weak laser pulses. Swapped photons.	1
Lec 5	Review of the current state of development of technical platforms. Research projects. DARPA Quantum Network. The project SECOQC. The project UQCC and Tokyo QKD Network. The project SwissQuantum. Commercial availability of technical platforms IdQuantique, Magiq Technologies, Toshiba.	1
Lec 6	The actual practical implementation of security of quantum cryptography. Types of attacks on quantum cryptography schemes. Denial of Service. Man In The Middle. Weak Measurement. Intercept-resend attack. Photon number splitting. Beam - splitting. Other attacks.	1
Lec 7	QKD - distribution and expansion of the secret cryptographic key. The experimental network connection using the mechanisms of the Wrocław University of QKD under Polish National Laboratory for Quantum Technologies.	1
Lec 8	Experimental setup and installation and software description id3100. Secure Communications using QKD chat demo application.	1
Lec 9	Final test.	1
	Total hours	9

Form of classes - class		**Number of hours**

	Total hours	
Form of classes - seminar		**Number of hours**
Sem 1	The Id Quantique Clavis. Installing the software id3100. Discussion of student research topics, how to study subjects, how to prepare test documentation and presentation. General information of platform cryptographic company Clavis Id Quantique and of software system id3100 on this platform. Acquisition of student research topics. Id Quantique Clavis - Quantum key distribution over a distance of 5 km in the real test environment. The initial phase of the commissioning and testing the platform.	2
Sem 2	Key exchange using the BB84 protocol. Key exchange protocol using SARG04. Start data acquisition process monitoring and diagnostic system. Key exchange protocol using SARG04. Start data acquisition process monitoring and diagnostic system. Measurement data extraction and analysis capabilities and methods of processing.	2
Sem 3	Analysis of the experimental set-id3100 action in the real test environment without connectors and splices. The results for the BB84 protocol. Measurement data extraction and analysis capabilities and methods of processing. Analysis of the experimental set-id3100 action in the real test environment without connectors and splices. Results for SARG04 protocol. Measurement data extraction and analysis capabilities and methods of processing.	2
Sem 4	Analysis of the experimental set-id3100 action in the real test environment with different number of connectors and splices. The results for the BB84 protocol. Measurement data extraction and analysis capabilities and methods of processing. Analysis of the experimental set-id3100 action in the real test environment with different number of connectors and splices. Results for SARG04 protocol. Measurement data extraction and analysis capabilities and methods of processing.	2

Sem 5	Advanced analysis and diagnostics activities set for the BB84 protocol without fiber connectors and splices. Measurement data extraction and analysis capabilities and methods of processing.	2
Sem 6	Advanced analysis and diagnostics activities set for the BB84 protocol with varying amounts of fiber connectors and splices. Measurement data extraction and analysis capabilities and methods of processing.	2
Sem 7	Advanced analysis and diagnostics activities set for the protocol SARG04 without connectors and splices fibers. Measurement data extraction and analysis capabilities and methods of processing.	2
Sem 8	Advanced analysis and diagnostics activities set for the protocol SARG04 with varying amounts of fiber connectors and splices. Measurement data extraction and analysis capabilities and methods of processing.	2
Sem 9	Research Report Kit for BB84 protocol and SARG04. Formulating conclusions from the study for the protocols BB84 and SARG04 for different number of connectors and splices. Discuss the idea of fiber optic repeaters. Summary of the study.	2
	Total hours	18

TEACHING TOOLS USED

N1. Traditional lectures based on multimedia presentations.
N2. Research carried out by the students. Participation in the performance of student research and laboratory tasks.
N3. Studying the problems of lectures and seminars, and research with access to the platform cryptographic Clavis IdQuantique.
N4. Consultations for students.

EVALUATION OF SUBJECT EDUCATIONAL EFFECTS ACHIEVEMENT

Evaluation (F – forming (during semester), P – concluding (at semester end)	Educational effect number	Way of evaluating educational effect achievement
F1	PEK_U01-PEK_U02	Ratings for the execution of studies and presentations and discussion.
F2	PEK_U02	Rating for documentation of studying a subject.
C	PEK_W01-PEK_W05, PEK_K01	Final test.

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

1. Competence in basic algebra and mathematical analysis
2. Differential equations
3.

\

SUBJECT OBJECTIVES

C1 Knowledge on methodological postulates
C2Competence in mathematical modeling on the base of methodology of empirical sciences
C3 Competence in hypothesis testing
C4 Competence in creation of homogenous and invariant to the systems of units models

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:
PEK_W01Knowledge on methodological postulates
PEK_W02Knowledge on logical postulates in creation of mathematical model
…
relating to skills:
PEK_U01Competence in mathematical modeling with accordance to methodological postulates
PEK_U02Competence in hypothesis and models testing
…
relating to social competences:
PEK_K01Competence in exactness of model description

PEK_K02Ability to study new problems of methodology and reflection on experiment

PROGRAMME CONTENT

	Form of classes - lecture	**Number of hours**
Lec 1	Methodological postulates of: determinism, closed system, accordance with accepted theories, simplicity and falsification	2
Lec 2	Classical theory of measurements, dimensional analysis and dimensional space	2
Lec 3	Dimensional description of a process, dimensional function, theorem Pi	2
Lec 4	Applications of theorem Pi in: creation of mathematical models construction, experiment planning, identification	2
Lec 5	Theory of similarity, falsification of the completeness of dimensional function arguments	2
Lec	Identification of mathematical models	2

6…. Lec7 Lec8	 Multistage identification and description of model construction Models testing	 2 2

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

10. Wiedza i kompetencje z rachunku prawdopodobieństwa i statystyka matematycznej.
11.

\

SUBJECT OBJECTIVES

C1 Acquisition of knowledge on the basis of reliability of technical systems with particular emphasis on information systems.
C2 Acquisition of knowledge about models and measures of functional reliability of computer systems.
C3 Acquisition of knowledge about the reliable transmission of information.
C4 Acquisition of knowledge about the reliability of the software and its protection against threats.

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:

PEK_W01 – is aware of the importance of safety and more reliability of technical systems, known classification of computer crashes and forcing factors, has knowledge of security tools, system faults and security systems.
PEK_W02 – has knowledge of the distributions of the times suitability of computer systems, the reliability structure, repairable and non-repairable systems.
PEK_W03 – has knowledge of the functional configuration, known models and measures of reliability systems and is also known Markov models.
PEK_W04 – has knowledge of models and measures of the reliability of computer systems and system reliability threshold, knows the software reliability models.
PEK_W05 – has knowledge of the software reliability measurement and planning an experiment in reliability.
PEK_W06 – has knowledge of reliability engineering of computer systems, has a knowledge of research in reliability of computer systems.
PEK_W07 – has expertise in assessing the reliability of computer systems in the light of the standards and has knowledge of designing the reliable elements.

relating to skills:

PEK_U01 – is able to study a specific part of issues relating to the reliability of computer systems.
PEK_U02 – is able to present to study some issues relating to the reliability of computer systems, which studied, in the form of presentations and discussions, as well as hold a discussion with the audience made in the area of study.
PEK_U03 – can make documentation of completed study works.

relating to social competences:

PEK_K01 – understands the importance of reliability of computer and information systems in the course of social and economic processes.

PROGRAMME CONTENT

Form of classes - lecture		Number of hours
Lec 1	The importance of the safety and reliability of the technical systems. Classification of computer failure. Forcing factors.	2
Lec 2	Security tools. Failures, faults, and errors in computer systems. System protection. Distributions of times faultless operation of computer systems.	2
Lec 3	Reliability structure. Recoverable and unrecoverable systems.	2
Lec 4	Functional Configuration. Models and measurements of system reliability.	2
Lec 5	Markov Models. Models and measures of the reliability of computer systems.	2
Lec 6	Reliability of threshold systems. Software reliability models.	2
Lec 7	Measurement of software reliability. Planning an experiment in reliability.	2
Lec 8	Measurement of software reliability. Reliability testing of computer systems.	2
Lec 9	Reliability assessment systems in the light of the standards. Introduction to design reliable systems.	2
	Total hours	18

Form of classes - class		Number of hours
Cl 1		
Cl 2		
Cl 3		
Cl 4		
..		
	Total hours	

Form of classes - laboratory		Number of hours
Lab 1		
Lab 2		
Lab 3		
Lab 4

Lab 9		
	Total hours	

Form of classes - project		Number of hours
Proj 1		
Proj 2		
Proj 3		
Proj 4		
...		
	Total hours	

Form of classes - seminar		Number of hours
Sem 1	Discussion of student research topics, how to study subjects, preparing test documentation and presentation. Acquisition of research topics.	2
Sem 2	Classification of computer failure. Forcing factors. Two student presentations of case study research.	2
Sem 3	Distributions of times faultless operation of computer systems. Two student presentations of case study research.	2
Sem 4	Markov Models. Two student presentations of case study research.	2
Sem 5	Models and measures of the reliability of computer systems. Two student presentations of case study research.	2
Sem 6	Software reliability models. Two student presentations of case study research.	2
Sem 7	Measurement of software reliability. Two student presentations of case study research.	2
Sem 8	Reliability engineering systems. Two student presentations of case study research.	2
Sem 9	Reliability testing of computer systems. Reliability assessment systems in the light of the standards. Credits.	2
	Total hours	18

TEACHING TOOLS USED

N1. Traditional lectures based on multimedia presentations.
N2. Traditional seminars based on multimedia presentations.
N3. Research carried out by the students. Participation in the performance of student research tasks.
N4. Studying the issues discussed during the lecture. Preparation for the exam.
N5. Consultations for students.

EVALUATION OF SUBJECT EDUCATIONAL EFFECTS ACHIEVEMENT

Evaluation (F – forming (during semester), P – concluding (at semester end)	Educational effect number	Way of evaluating educational effect achievement
F1	PEK_U01-PEK_U02	Ratings for doing work-study, and for the presentation and discussion.
F2	PEK_U03	Rating for documentation of case study research.
C	PEK_W01-PEK_W05, PEK_K01	Examination

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

1. Practice in object-oriented programming.
2. Basic knowledge of software engineering.

\

SUBJECT OBJECTIVES

C1. Basic knowledge in the area of software system modeling with the stress on business modeling as the initial phase of the software development process.
C2. Basic knowledge in the area of the requirements specification.

SUBJECT EDUCATIONAL EFFECTS

Relating to knowledge:
PEK_W01: Students have basic knowledge on business modeling.
PEK_W02: Students know and understand the role of specification requirements.
PEK_W03: Students have basic knowledge on selected modeling languages.

Relating to skills:
PEK_U01: Students, in cooperation with domain experts, can construct and analyze business models.
PEK_U02: Students can build models of system requirements.

Relating to social competences:
PEK_K01: Students are able to cooperate with representatives of application domain.

PROGRAMME CONTENT		
Form of classes - lecture		**Number of hours**
Lec 1	Basic notions for software development cycle. Survey of modeling languages – UML and BPMN.	1
Lec 2	Class diagrams – classes, associations, generalizations.	2
Lec 3	Object Constraint Language.	2
Lec 4	BPMN process diagrams.	2
Lec 5	System requirements; use case diagrams.	2
	Total hours	9

Form of classes - class		Number of hours
Cl 1	Analysis of textual descriptions of exemplary application domains – structural aspect.	2
Cl 2	Construction and analysis of class diagrams.	2
Cl 3	Construction and analysis of class diagrams.	2
Cl 4	Construction and analysis of OCL constraints imposed on diagrams.	2
Cl 5	Case study – an example of structural modeling.	2
Cl 6	Test 1.	1
Cl 7	Construction and analysis of simple BPMN process diagrams.	2
Cl 8	Construction and analysis of advanced BPMN process diagrams.	2
Cl 9	Construction and analysis of use case diagrams.	2
Cl 10	Test 2.	1
	Total hours	18

TEACHING TOOLS USED

N1. Lecturer's presentation at a blackboard, supported by a multimedia presentation using a laptop and a projector.
N2. Individual search and study of literature and Internet sources.
N3. Access to teaching materials published in the local area network.
N4. Individual consultations.

EVALUATION OF SUBJECT EDUCATIONAL EFFECTS ACHIEVEMENT

Evaluation (F – forming (during semester), P – concluding (at semester end)	Educational effect number	Way of evaluating educational effect achievement
F1	PEK_W01 PEK_U01 PEK_K01	Each student gets 1 point for own solution of a problem from the list of problems for the given class.
F2	PEK_W01 PEK_W02 PEK_U01 PEK_U02 PEK_K01	Each student gets up to 10 points for own solution of problems for the given test (intermediate and final).
F3	PEK_W01 PEK_W02 PEK_W03 PEK_U01 PEK_U02 PEK_K01	The final evaluation for the classes is determined on the basis of total marks obtained by the student's activity for exercise (F1) and colloquia (F2). Positive mark is awarded to a student who has obtained at least 4 points for each of the symposia and has won a total of 10 points. If this condition is met, the number of points P is the basis for evaluation in accordance with the following table:

		<table><tr><td>P</td><td>10</td><td>12</td><td>14</td><td>16</td><td>18</td></tr><tr><td>Mark</td><td>3.0</td><td>3.5</td><td>4.0</td><td>4.5</td><td>5.0</td></tr></table> Students who get at least a very good grade are exempt from the examination with the same mark as for the classes.

C: The final evaluation of the course is determined based on the results of the examination. The examination lasts two hours and consists of a set of tasks, the total number of 20 points. The condition for a positive assessment of the final exam is to get 10 points and a positive final evaluation of the exercise.
The final evaluation of the examination is determined in accordance with the following table:

Points	10	12	14	16	18
Mark	3.0	3.5	4.0	4.5	5.0

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

1 Knowledge, skills and competences acquired at Informatics field at second level of study until 3th semester

\

SUBJECT OBJECTIVES

C1 Preparing students to write a master thesis according the internal requirements in Informatics field at Faculty of Computer Science and Management, Wrocław University of Technology,

C2 Providing students with basic skills related to preparation and presentation of scientific texts, beginning from the choice of topic, selection of tasks to be performed, use of literature to interpretation of the results.

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:

…

relating to skills:

PEK_U01 He is able to acquire information from literature, databases and other sources, also in English or other language used for communication in Informatics field, is able to integrate the information obtained, interpret them, make critical evaluation and also draw conclusions and formulate and justify opinions related to prepared master thesis.

PEK_U02 He can communicate using a variety of techniques in his professional environment and in other environments, also in English or other foreign language used for communication in Informatics field and also to present the results of his master thesis

relating to social competences:

Sem 1	Familiarization with the principles of master thesis realization at Informatics field. Rules related to student presentations. Determining the schedule of student presentations.	2
Sem 2	Review of basic skills related to preparation and presentation of scientific texts by students, beginning from the choice of topic, selection of tasks to be performed, use of literature and also how to write thesis and how obtained results should be interpret.	2
Sem 3 – Sem15	During semester each student has 2 presentations. The first presentation is related to the general view of the thesis topic, its placement in the literature and in the Informatics field. The student should present the primary aim of thesis, the state of art related to thesis topic, the concept of solution, the initial structure of thesis and timetable for further work. The purpose of the second presentation is preparation to defense and demonstrate presentation skills in English. The second presentation consists of two parts, namely, discussion of the results of the work in English and a short presentation in Polish devoted to the results of the thesis.	14
	Total hours	18

TEACHING TOOLS USED

N1. Multimedia presentations
N2. Examples of scientific papers and reports from the field of computer science.
N3. E-Learning System used to publish teaching materials and announcements, also used for collection and evaluation of student work.

EVALUATION OF SUBJECT EDUCATIONAL EFFECTS ACHIEVEMENT

Evaluation (F – forming (during semester), P – concluding (at semester end)	Educational effect number	Way of evaluating educational effect achievement
P	PEK_U01 PEK_U02	Evaluation of the presentation of the work at the seminar and prepared documentation from the presentation. The evaluation shall be subject to the fulfillment of the requirements for the presentation, including its substantive scope, structure and organization of presentation, techniques of conversation, a form of presentation, compactness of presentation and conclusions reached. Participation in the discussions after presentation is also evaluated. In addition, the seminar leader is able to control the cooperation between supervisors and graduate students.

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

1. Basic mathematical knowledge for 1st level of studies.

2. Informatics knowledge background.
3. Algorithms knowledge background.

\

SUBJECT OBJECTIVES

C1 Acquiring knowledge about functions and significance of information systems in contemporary organizations
C2 Acquainting with the functions and development of information systems in information society
C3 Acquainting with the different methods of information retrieval by surfing the Web
C4 Recognizing the problems of passing of contemporary organizations to Internet space
C5 Obtainment of skills to analyze the literature from information systems area and to synthesize the contents from different sources
C6 Application of the obtained knowledge to presentation the problems from information systems area by means of using adequate tools

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:
PEK_W01 Familiarity with basic models of information systems
PEK_W02 Basic knowledge about Web information systems
PEK_W03 Familiarity with common multimedia technologies
PEK_W04 Understanding of the measures of information retrieval efficiency

relating to skills:
PEK_U01 Student can to build information query for different types of information needs
PEK_U02 Can to determine basic features of information system for given organization
PEK_U03Student be able to evaluate the precision of retrieved information
PEK_U04 Can to present basic features of given information system

relating to social competences:
PEK_K01 Can individually to use literature of the subject and to select useful information
PEK_K02 Student is convinced above positive role of information systems in stimulation of the civilization development

None.

\

SUBJECT OBJECTIVES

C1 Getting to know foundations of designing computer science decision support systems using general systemic methods which make it possible to apply unified approaches for analysis and decision making for decision support systems of different nature.
C2 Acquisition of skills to represent in the form of mathematical formulas of decision making plants treated as input-output plants.
C3 Acquisition of skills to analyze of decision making plants treated as input-output plants.
C4 Getting acquainted with methods and algorithms of multi-stage decision making.
C5 Acquisition of skills to apply dynamic programming method.
C6 Getting to know metods and algorithms of multi-criteria decision making.
C7 Acquisition of skills to use AHP method.

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:
PEK_W01 Student knows foundations of designing of decision support systems for any kind of plants.
PEK_W02 Student knows foundations of analysis and decision making for input-output plants with logic knowledge representation.
PEK_W03 Student knows selected method of multi-stage and multi-criteria decision making.
relating to skills:
PEK_U01 Student is able to elaborate a mathematical model for an input-output decision making plant in discrete state space as well as with logic knowledge representation.
PEK_U02 Student can solve analysis and decision making tasks for elementary plants with logic knowledge representation.
PEK_U03 Student is able to solve multi-stage decision making problem using Bellman's Principle and dynamic programming.
PEK_U04 Student can use AHP algorithm for the solution od multi-criteria decision making problem
relating to social competences:
PEK_K01 Student can take advantage of professional literature by oneself and can perform the critical analysis of information mined.
PEK_K02 Student can think creatively.

PROGRAMME CONTENT

Form of classes - lecture		**Number of hours**
Lec 1	Decision support systems – definitions, structures, problems, application of discrete state equations and logic expressions for representation of decision making plants.	2
Lec 2	Outline of logic-algebraic method and its application to solution of analysis and decision making for input-output decision making plants.	2
Lec 3	Decision making – definition, typology, logic-algebraic plant, Bellman's Principle and multi-stage decision making.	2
Lec 4	Multi-criteria decision making – Pareto sets, AHP method.	2
Lec 5	Examples of computer decision support systems.	1
	Total hours	9

Form of classes - class		**Number of hours**
Cl 1	Solution of numerical exercises concerning difference equations as well as propositional calculus.	2
Cl 2	Solution of numerical exercises concerning mathematical representations of input-output plants.	2
Cl 3	Solution of numerical exercises concerning analysis and decision making using logic-algebraic method.	2
Cl 4	Solution of numerical exercises concerning dynamic programming and AHP	2

	method.	
Cl 5	Final test.	1
	Total hours	9

Form of classes - laboratory		Number of hours
Lab 1		
Lab 2		
Lab 3		
Lab 4		
Lab 5		
…		
	Total hours	

Form of classes - project		Number of hours
Proj 1	Collecting of indispensable information about selected plant being the decision making plant.	2
Proj 2	Determination of mathematical model of selected decision making plant and decision making problem formulation as well as analysis of decision making plant using its mathematical model.	2
Proj 3	Choice of decision making method for further usage as well as elaboration of decision making algorithm.	2
Proj 4	Implementation and analysis of decision making algorithm.	2
Proj 5	Elaboration of conclusions and written report of the project performed.	1
	Total hours	9

Form of classes - seminar		Number of hours
Sem 1		
Sem 2		
Sem 3		
…		
	Total hours	

TEACHING TOOLS USED
N1 Lecture – traditional method. N2 Classes – traditional method. N3 Consultation. N4 Individual discussion with student. N5 Short test (10 mins.). N6 Self-contained work.

EVALUATION OF SUBJECT EDUCATIONAL EFFECTS ACHIEVEMENT

Evaluation (F – forming (during semester), P – concluding (at semester end)	Educational effect number	Way of evaluating educational effect achievement
F1	PEK_W02; PEK_W03; PEK_U01– PEK_U04	Short tests during the classes.
F2	PEK_K01– PEK_K02	Individual discussion with student during

		the project.
P (Classes)	PEK_W02; PEK_W03; PEK_U01–PEK_U04	Test.
P (Project)	PEK_U01–PEK_U04; PEK_K01–PEK_K02	Evaluation of written report of the project.
P (Lecture)	PEK_W01–PEK_W03; PEK_K02	Exam.

FACULTY OF COMPUTER SCIENCE AND MANAGEMENT

SUBJECT CARD

Name in Polish: Teoria i inżynieria ruchu teleinformatycznego

Name in English: Theory and engineering of teletraffic

Main field of study (if applicable): Computer science

Specialization (if applicable): Teleinformatics

Level and form of studies: 2nd level, part time

Kind of subject: obligatory

Subject code INZ7600

Group of courses: NO

	Lecture	Classes	Laboratory	Project	Seminar
Number of hours of organized classes in University (ZZU)	9			18	
Number of hours of total student workload	30			90	

(CNPS)					
Form of crediting	Crediting with grade			Crediting with grade	
For group of courses mark (X) final course					
Number of ECTS points	1			3	
including number of ECTS points for practical (P) classes				3	
including number of ECTS points for direct teacher-student contact (BK) classes	0,4			1,2	

*delete as applicable

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

1. Has a basic knowledge of ICT systems and computer communication networks (K1INF_W11).
2. Knows the basic methods and tools for collecting, processing and retrieval of information and knowledge extraction (K1INF_W16)
3. Can use the right tools to build a simple model of the process (the object), to formulate specific task analysis and decision making (K1INF_U15)
4. Can effectively use the methods and tools for collecting, processing and retrieval of information and knowledge extraction (K1INF_U16)
5. It has the ability to self-education, including in order to improve the professional competence (K1INF_U05)
6. Understands the need and knows the possibility of lifelong learning and to improve their professional and social competences (K1INF_K01)

SUBJECT OBJECTIVES

C1. Ordered, underpinned by theoretical knowledge of methods and techniques for transmitting signals using different modulation techniques, methods and techniques of information transmission, methods of organization and management of data communications traffic in the tasks of design and analysis of communication systems, methods of delivering service quality of ICT systems, analysis of quantitative and qualitative requirements and methods for sizing of distributed IT systems.

C2. Skills about the differences and benefits of the use of analog and digital data transmission techniques, the differences and benefits of the use of wired and wireless signal transmission techniques, developing the concept of using wired and wireless technologies in the basic applications of ICT systems, defining the qualitative and quantitative requirements of the user information and communication systems range of data, designing ICT solutions needed to achieve the qualitative and quantitative requirements of the user, using standards and solutions available on the market, estimating the cost of preparing and maintaining ICT solutions needed to achieve the qualitative and quantitative requirements, designing modernization of IT solutions needed to achieve the qualitative and quantitative requirements, identifying differences and similarities between solutions in a variety of applications (e-health, e-government and e-learning, in real-time systems, etc.).

C3. Skills for the design and analysis of complex, distributed ICT systems providing network services for distributed computer communication systems.

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:

K2INF_W02: Has a structured, theoretically founded essential knowledge of business modeling and requirements specification systems.

K2INF_W03: Has a structured, theoretically founded essential knowledge in the delivery of information distributed systems

K2INF_W06: Achieves results in the category of knowledge for specialty data communications

relating to skills:

K2INF_U05: Can - in formulating and solving engineering tasks - integrate knowledge of the fields of science and scientific disciplines relevant to the study being studied and applied a systemic approach, taking into account the non-technical aspects

K2INF_U06: Can solve the modeling, analysis and decision making for different types of objects

K2INF_U08: Achieves results and skills in areas of data exchange and computer communications systems

relating to social competences:

K2INF_K01: Can think and act in a creative and enterprising

K2INF_K02: Has aware of the social role of technical graduating, especially understands the need for the formulation and communication to the public, especially through the mass media, information and opinion on the achievements of technology and other aspects of engineering, shall endeavor to provide such information and opinions in a widely understood the reasons for the different points of view

PROGRAMME CONTENT		
Form of classes - lecture		**Number of hours**
Lec 1	Classification of ICT systems from different points of view. Quality of Experience (QoE) and Quality of Service (QoS) in ICT systems with elastic and streaming traffic.	2
Lec 2	Introduction to queuing. Open and close networks of queues. Queuing models of circuit-switched and packet-switched computer communication systems. Burke's theorem and Kleinrock approximation.	2
Lec 3	Access control, flow control and routing tasks formulation and solution in distributed environments.	1
Lec 4	Requirements analysis	1
Lec 5	Models (Poisson, Markov modulated, self-similarity, etc) of teletraffic and its application in traffic engineering tasks.	1
Lec 6	QoS delivery concepts: best effort, integrated services and differentiated services	1
Lec 7	New concepts of systems and networks - NXGN (Next Generation Networks) i NWGN (New Generation Network). Summary.	1
	Total hours	9

PROGRAMME CONTENT	
Form of classes - project	**Number**

		of hours
Proj 1	Formulation design task based on the analysis of the literature, documentation, etc.	2
Proj 2	Justification for the choice task and purpose of the task design - an analysis of the expected benefits of the project task.	2
Proj 3	Quantitative and qualitative requirements analysis for the communication system under design	2
Proj 4	Analysis of state of the art on how to solve the task design and analysis and selection of the task design methodology	2
Proj 5	Tools (methods, algorithms, procedures, software and hardware) analysis and selection required for the implementation of the project task	2
Proj 6	Implementation of prototype of modules solve the task and prototype testing and evaluation	2
Proj 7	Modification of solutions using prototype test results	2
Proj 8	Integration of modules distinguished at the stages of requirements analysis and prototyping. Verification and testing of an integrated solution design task	2
Proj 9	Analysis of the possibility of extending the project tasks. Preparation of tfinal presentation and documentation of the design task. Presentation of the results of the design task	2
	Total hours	18

TEACHING TOOLS USED
N1. Traditional lecture supported by whole class multimedia presentations based on literature and open access and commercial sources.
N2. Student's own works – solving experiments and tasks in laboratory as well as homework.
N3. Student's own works – literature and open access sources studies.
N5. Collective works in laboratory
N5. Student's own works – preparation of presentations and technical documentations.

EVALUATION OF SUBJECT EDUCATIONAL EFFECTS ACHIEVEMENT		
Evaluation (F – forming (during semester), P – concluding (at semester end)	Educational effect number	Way of evaluating educational effect achievement
F1 (lecture)	K2INF_W03 K2INF_W04 K2INF_W06 K2INF_U05 K2INF_U06 K2INF_U08 K2INF_K01 K2INF_K02	Observation and verification of student activity. Solving the sample jobs.
F1 – F9 (project)	K2INF_W06	Checking the preparation of the student. Checking

	K2INF_U05 K2INF_U06 K2INF_U08 K2INF_K01	the presence of the student. Observation of student activity. Observation and assessment of student autonomy.
P (lecture)	K2INF_W03 K2INF_W04 K2INF_W06 K2INF_U05 K2INF_U06 K2INF_U08 K2INF_K01 K2INF_K02	Colloquium (course credit) in the evaluation of forming F1 (lecture)
P (project)	K2INF_U05 K2INF_U06 K2INF_U08 K2INF_K01	Total weighted ratings F1 – F9 (project) and the assessment for the presentation of the final results of the project.

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

12. Knowledge and skills of models reliability of computer systems.
13. Knowledge and skills of Building secure applications.
14. Knowledge and skills in Probability and mathematical statistics.

\

SUBJECT OBJECTIVES

C1 Acquisition of knowledge on selected problems on Reliability and software testing methodologies for industrial applications.
C2 The acquisition of knowledge on language management automatic source code instrumentation for testing embedded software integration.
C3 Acquisition of knowledge on the test Web applications, software testing, software testing support in a distributed environment.
C4 The acquisition of knowledge in the application of fuzzy logic in testing and reliability, security management of an industrial venture, reliability object on the basis of parametric and catastrophic injuries.
C5 Acquisition of knowledge about modern methodologies, models, formalisms, algorithms and for testing and research and increase the reliability of computer systems, software, and computer control systems and automation.
C6 Acquisition of knowledge on testing tools, and research and increase the reliability of computer systems, software, and computer control systems and automation.

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:
PEK_W01 – has knowledge of selected problems of reliability and software testing methodologies for industrial applications.
PEK_W02 – has knowledge of the management of automated source code instrumentation for testing embedded software integration.
PEK_W03 – have knowledge of the test sites, software testing, software testing support in a distributed environment.
PEK_W04 – has expertise in the field of application of fuzzy logic applications in testing and reliability, security management of an industrial venture, to study and improve the reliability of an object based on information about parametric and catastrophic injuries.
PEK_W05 – has knowledge on contemporary methodologies, models, formalisms, algorithms and for testing and research and increase the reliability of computer systems, software, and computer control systems and automation.

relating to skills:
PEK_U01 – can be selected and applied methodologies, models, formalisms, algorithms and tools for testing and research and increase the reliability of systems, software and systems.
PEK_U02 – is able to present the methods and results of measurement data on various methodologies, models, formalisms, algorithms and tools for testing and research and increase the reliability of systems, software and systems.

relating to social competences:
PEK_K01 – understand the benefits and risks of testing and increase the reliability of the applications for operating systems and automation of social and economic processes.
PEK_K02 – know how to carry out research work as a team and solve problems.

PROGRAMME CONTENT

Form of classes - lecture		**Number of hours**
Lec 1	Selected problems of reliability.	1
Lec 2	Methods of testing software for industrial applications.	1
Lec 3	Language management automatic source code instrumentation for testing embedded software integration.	1
Lec 4	Functional testing tools web sites.	1
Lec 5	Software testing. Support the integration of software testing tools in a distributed environment.	1
Lec 6	The use of fuzzy logic in testing and reliability.	1
Lec 7	Issues of safety management of an industrial venture. Reliability assessment of object based on information about parametric injuries.	1
Lec 8	Issues of safety management of an industrial venture. Reliability assessment of object based on information about catastrophic injuries.	1
Lec 9	Final test.	1
	Total hours	9

Form of classes - class		**Number of hours**
Cl 1		
Cl 2		
Cl 3		
Cl 4		
..		
	Total hours	

Form of classes - laboratory		**Number of hours**
Lab 1		
Lab 2		
Lab 3		
Lab 4		
Lab 5		
Lab 6		
Lab 7		

Lab 8		
Lab 9

Form of classes - project		Number of hours
Proj 1		
Proj 2		
Proj 3		
Proj 4		
…		
	Total hours	

Form of classes - seminar		Number of hours
Sem 1	Security testing of social networking - sample testing tools. Discussion of student research topics, how to study subjects, preparing test documentation and presentation. Acquisition of student research topics.	2
Sem 2	Web Usage Mining. Presentation of results of studies student.	2
Sem 3	Testing the physical data models. Practical exercises in two student research. Presentation of results of student research.	2
Sem 4	Forecasting using data mining methods. Presentation of results of student research.	2
Sem 7	Statistical models and metrics in the context of testing and prediction of software defects. Presentation of results of student research.	2
Sem 8	The use of evolutionary algorithms in the process of applying for reliability. Presentation of results of student research.	2
Sem 10	Reducing the dimension sample size for the synthesis of the statistical system fault detection. Presentation of results of student research.	2
Sem 13	High availability - HCMP. Presentation of results of student research.	2
Sem 14	Detection of double damages. The equivalence of binary classifiers. Presentation of results of student research.	2
	Total hours	18

TEACHING TOOLS USED

N1. Traditional lectures based on multimedia presentations.
N2. Research carried out by the students. Participation in the performance of student research and laboratory tasks.
N3. Studying the issues discussed during the lecture and the student research.
N4. Consultations for students.

EVALUATION OF SUBJECT EDUCATIONAL EFFECTS ACHIEVEMENT

Evaluation (F – forming (during semester), P – concluding (at semester end)	Educational effect number	Way of evaluating educational effect achievement
F1	PEK_U01-PEK_U02	Ratings for the implementation and documentation of research.

F2	PEK_U02	Ratings for the implementation and documentation of laboratory tasks.
C	PEK_W01-PEK_W05, PEK_K01	Final test.

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

15. Knowledge and skills on programming in at least two languages from C #, Java, PHP, HTML / XML in JavaScript, Python.
16. Knowledge on application development in one of the PHP, JSP, ASP, or a single platform from XAMP / WAMP, J2EE, MS Visual Studio, any CMS or any framework to create web applications and software systems.
17. Windows and Linux administration ability.
18. Knowledge and skills in the area of databases and SQL.

\

SUBJECT OBJECTIVES

C1 Acquisition of knowledge about how to create secure code programs and applications in different programming languages and on different platforms of software development.
C2 Acquisition of knowledge of the development of mechanisms for securing data in databases and programming secure applications and web services.
C3 Acquisition of knowledge of the mechanisms of strengthening security software programs, applications and services.
C4 Acquisition of advanced knowledge about the mechanisms, libraries and components of a cryptographic system programming software platforms and web applications development and information systems.

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:

PEK_W01 – has knowledge of the production of secure code and secure applications in the Java programming language, C #, on platforms JSP and ASP.NET and C / C + +.
PEK_W02 – no knowledge of programming and production of secure applications on different platforms and in different environments and languages free software - including PHP, Python, Joomla!, Drupal, WAMP, XAMP and different manufacturing environments CMS.
PEK_W03 – has knowledge of a threat of web applications and systems of the mechanisms of development.
PEK_W04 – knows the security mechanisms and the development of technology platforms J2EE/SE, PHP, ASP.NET, AJAX, WAMP environments and XAMP, and Python, Joomla!, Drupal CMS design.
PEK_W05 – knows security mechanisms in web servers and in DBMS systems.

relating to skills:

PEK_U01 – can produce secure code programs in different programming languages.
PEK_U02 – can make use of the mechanisms of generation of secure web applications and systems on the platform JSP. He can remove and test the security vulnerability.
PEK_U03 – can make use of the mechanisms of generation of secure web applications and systems platforms ASP.NET. He can remove and test the security vulnerability.
PEK_U04 – can make use of the mechanisms of generation of secure web applications and systems software platforms and manufacturing ox CMS - PHP, Joomla!, Python, Drupal. He can remove and test the security vulnerability.

PEK_U05 – can create secure the availability of information systems and services.
PEK_U06 – able to implement a web application or a small system with enhanced security in a language of choice in selected technology and the selected developer platform.

relating to social competences:
PEK_K01 – understands the importance of security of information systems and Internet services for the processes of economic, social and security of the state and society.

PROGRAMME CONTENT		
Form of classes - lecture		**Number of hours**
Lec 1	Introduction to produce secure code. Create secure applications in C / C + +. Create secure applications in C #. Safety components for the Java platform.	1
Lec 2	Programming of secure applications using PHP and CMS Joomla!. Security threats in database management systems.	1
Lec 3	Programming web applications with security against attacks generate, download and execute malicious code. Countering threats derived from the mechanisms of development - security structures indicative and memory leaks - software and systems failures.	1
Lec 4	Programming applications to support a stack overflow attacks when performing code - malicious code execution and denial of service.	1
Lec 5	Security mechanisms for development platforms. Cryptographic systems programming technology of JSP, PHP.	1
Lec 5a	Security mechanisms CMS software platforms.	1
Lec 6	Programming security systems on the ASP.NET and AJAX platforms. Secure access to data - programming secure applications and services for web servers and databases.	1
Lec 7	Securing the operability of services and systems by filtering network traffic load balancing, clustering mechanisms and to ensure quality of service QoS. Final test.	1
Lec 8	Summary of the lecture. Credits.	1
	Total hours	9
Form of classes - class		**Number of hours**
Cl 1		
Cl 2		
Cl 3		
Cl 4		
..		
	Total hours	
Form of classes - laboratory		**Number of hours**
Lab 1	The rules for creating secure code - study of practical examples. Discussion of student research topics, how to study subjects, preparing test documentation and presentation. Acquisition of research topics.	2

Lab 2	Programming secure applications in C / C + + - practical examples. Practical exercises in two student research.	2
Lab 3	Application Development in C # - removing vulnerabilities, security testing. Practical exercises in two student research.	2
Lab 4	Programming of secure applications using PHP and CMS Joomla!. The use of safe, well-tested components, Joomla! and PHP scripts. Security mechanisms for access to databases MySQL and PostgreSQL. Practical exercises in two student research.	2
Lab 5	Security threats and security mechanisms in database management systems, MySQL, PostgreSQL and MS SQL Server. Examples of practical application development with protection of access to databases on different platforms developers. Practical exercises in two student research.	2
Lab 6	Programming Web applications with security against attacks generate, download and execute malicious code. Practical examples of secure Web applications - creating or commissioning and testing. Practical exercises for student research.	2
Lab 7	Security mechanisms for development platforms. Detailed analysis of the Visual Studio platform, J2EE, CMS Joomla!. Practical exercises for student research.	2
Lab 8	Mechanisms security software technology platforms. NET and AJAX. Advanced mechanisms and code examples. Practical exercises for student research.	2
Lab 9	Mechanisms security software technology platforms J2EE, PHP, CMS Joomla!. Examples of creating safe sites, portals and business systems and information. Analysis of examples of secure business systems architectures using Web services protocol stack with specialized secure access to network services. Practical exercises for student research.	2
	Total hours	18

Form of classes - project		**Number of hours**
Proj 1		
Proj 2		
Proj 3		
Proj 4		
...		
	Total hours	

Form of classes - seminar		**Number of hours**
Sem 1

TEACHING TOOLS USED

N1. Traditional lectures based on multimedia presentations.
N2. A computer lab with Internet access, and virtualization capabilities of workstations and servers.
N3. Research carried out by the students. Participation in the performance of student research and laboratory tasks.
N4. Studying the issues discussed during the lecture.
N5. Consultations for students.

EVALUATION OF SUBJECT EDUCATIONAL EFFECTS ACHIEVEMENT

Evaluation (F – forming (during semester), P – concluding (at semester end)	Educational effect number	Way of evaluating educational effect achievement
F1	PEK_U06	Rate for the execution and documentation of web applications with enhanced security.
F2	PEK_U01-PEK_U05	Ratings for the implementation and documentation of laboratory tasks.
C	PEK_W01-PEK_W05	Final test for the lecture.

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

1. Knowledge of mathematics and mathematical statistics

\

SUBJECT OBJECTIVES

C1 Introduce the methods and techniques of the statistical data analysis to students
C2 Gather knowledge for Knowledge Discovery (Data Mining)
C3 Applying the gathered knowledge to drawing conclusions based on data analysis

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:
PEK_W01 student has a basic knowledge of Knowledge Discovery (Data Mining)
PEK_W02 student has a basic knowledge of statistical data analysis
PEK_W03 student is able to present differences between parametric and non-parametric tests

relating to skills:
PEK_U01 student is able to choose a proper statistical test
PEK_U02 student is able to draw conclusion from data analysis
PEK_U03 student is able to select a proper data mining method

relating to social competences:
PEK_K01 student is able to search and reuse the primary and secondary literature listed below and is able to gather the proper knowledge
PEK_K02 student understands the need for systematic and individual work in order to cover the scope of the course

PROGRAMME CONTENT

	Form of classes - lecture	**Number of hours**
Lec 1	Introduction to knowledge discovery	2
Lec 2	Classification and Data Clustering	2
Lec 3	Clustering Algorithms	2
Lec 4	Statistics - basic notions	2
Lec 5	The selected problems of estimation theory	2
Lec 6	Parametric tests for one population	2
Lec 7	Non-parametric tests for one population	2
Lec 8	Parametric tests for two populations	2
Lec 9	Non-parametric tests for more than 2 populations	2
	Total hours	18

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

19. Knowledge and skills in the field on Network and Internet security.
20. Knowledge and skills in the field on Reliability models of information systems.
21. Basic knowledge on Mathematical statistics.

\

SUBJECT OBJECTIVES

C1 The acquisition of knowledge in the field of advanced safety engineering systems.
C2 Acquisition of knowledge on advanced methods and mechanisms for information security infrastructure, business processes and the security of cloud computing.
C3 Acquisition of knowledge on systems of prevention, detection systems IDS, prevention systems IPS, and fraud systems FD.
C4 Acquisition of basic knowledge on quantum cryptographic systems.

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:

PEK_W01 – has an expanded knowledge on the concept of security systems and networks, complex mechanisms of confidentiality, authentication, authorization, integrity of information in business processes and information, and complex IT infrastructures.

PEK_W02 – has extended knowledge about the shortcomings of classical cryptography, PKI classical defects.

PEK_W03 – has knowledge of advanced methods and mechanisms for information security infrastructure, business processes and the security of cloud computing.

PEK_W04 – has an advanced knowledge of the dangers of the system of operating systems, communication protocols and has a basic knowledge of quantum cryptographic systems.

PEK_W05 – has knowledge of the systems of prevention and detection IDS and IPS systems and the fraud detection systems FD.

PEK_W06 – is aware of the dangers of distributed dictionaries, databases and repositories of knowledge about keys and passwords in cryptographic systems, is knowledgeable about preventing data loss and restore the system after a crash as well as norms and standards de facto safety audits.

relating to skills:

PEK_U01 – is able to assess and evaluate the quality and use monitoring tools in the workplace, use the advanced mechanisms and security solutions for wireless networks, as well as how to perform research work performed documentation.

PEK_U02 – can use and manage the security mechanisms of the system servers, network and internet, carry out their audit, use the advanced security features of social networking sites and instant messaging, use tools to test the security of web services, and is able to perform documentation work done research.

PEK_U03 – is able to use tools and tests to detect defects in software, banking fraud detection system to detect network traffic that indicates the use of the TOR network, preventing risks of advanced social engineering, as well as how to make the documentation of work performed research.

PEK_U04 – able to apply the methods and tools for risk assessment, use a basic infrastructure of quantum cryptography, PKI server build, build systems and firewall environment, tune and use the application security mechanisms, and can carry out the research work carried documentation.

relating to social competences:

PEK_K01 – understands the importance of security of information systems and Internet in the course of social and economic processes.

PEK_K02 – know how to work as a team.

PROGRAMME CONTENT

Form of classes - lecture		**Number of hours**
Lec 1	Generic imperfections of classical cryptography.	2
Lec 2	PKI, the X509 standard - advantages and generic disadvantages.	2
Lec 3	Fundamentals of quantum cryptography. Quantum cryptographic systems.	2
Lec 4	Security of WWW applications. Security of Web Services, e-mail, instant messaging. Security of database and DBMS system. Security of cloud computing.	2
Lec 5	Architecture and protocols for security of business applications based on Web Services.	2
Lec 6	Intelligent security and security management. Intelligent detection systems and intrusion prevention systems IDS and IPS. Fraud detection systems and violations of	2

	systems and business applications.	
Lec 7	Distributed dictionaries, databases and repositories of keys and passwords in cryptographic systems.	2
Lec 8	Data loss prevention and disaster recovery systems.	2
Lec 9	Distributed systems auditing, attacks and enhance security. Standards of safety audits. Final test.	2
	Total hours	18
Form of classes - class		**Number of hours**
Cl 1		
Cl 2		
Cl 3		
Cl 4		
..		
	Total hours	
Form of classes - laboratory		**Number of hours**
Lab 1	Database Security under the control of different DBMS servers.	2
Lab 2	Social networks and the law. Security mechanisms of social networks Facebook and Google+. Safety messaging. Tuning and testing of safety.	2
Lab 3	Prediction of software defects - models and metrics, testing.	2
Lab 4	Detecting fraud in the banking and business applications using data mining.	2
Lab 5	Information security in a distributed network TOR and crypto-currency Bitcoin.	2
Lab 6	Attacks on security of networks, systems and portals using advanced social engineering.	2
Lab 7	Methods and tools for risk assessment - OCTAVE, Cramm, MARION, MEHARI.	2
Lab 8	Quantum cryptography - fundamentally secure infrastructure for generating and delivering cryptographic keys.	2
Lab 9	Security in Ruby on Rails - an example of secure web applications. Credits.	2
	Total hours	18
Form of classes - project		**Number of hours**
Proj 1		
Proj 2		
Proj 3		
Proj 4

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

1. Knowledge of contemporary operating systems architectures.

\

SUBJECT OBJECTIVES

C1 Acquisition of knowledge about information security in contemporary enterprises
C2 Acquisition of knowledge about legal aspects of data protection and security.
C3 Acquisition of knowledge about real-world information protection mechanisms and techniques.

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:
PEK_W01 knows basic threats to information stored in information systems
PEK_W02 knows the basic acts and standards concerning information protection and security
PEK_W03 has basic knowledge of information security design and management and is able to enumerate information security technologies and to describe their applications
relating to skills:
PEK_U01 can use publicly available national standards
PEK_U02 can identify associations of standards issues with real life issues
PEK_U03 can identify information security threats, suggest protection solutions and evaluate quality of used protection mechanisms
relating to social competences:
PEK_K01is able to acknowledge new information and share it as well as discuss it with other students

PROGRAMME CONTENT

Form of classes - lecture		Number of hours
Lec 1	Information security threats	1
Lec 2	Acts regarding information security in Poland. Classification of information.	1
Lec 3	Non-technical protection mechanisms	1
Lec 4	Physical security	1
Lec 5	Hardware protection mechanisms	1
Lec 6	Security models. Risk analysis	1
Lec 7	Security policies. Threats management. System recovery.	1
Lec 8	Evaluation of information security. Audit.	2
	Total hours	9

FACULTY: Informatics and Management

SUBJECT CARD

Name in Polish: Architektura i technologie usług webowych
Name in English: Architecture and Technologies of Web Services
Main field of study (if applicable): Informatics
Specialization (if applicable): Software Engineering
Level and form of studies: ~~1st~~/ 2nd* level, ~~full-time~~ / part-time*
Kind of subject: obligatory / ~~optional~~ / ~~university-wide~~*
Subject code: INZ4052
Group of courses ~~YES~~ / NO*

	Lecture	Classes	Laboratory	Project	Seminar
Number of hours of organized classes in University (ZZU)	18		18		
Number of hours of total student workload (CNPS)	60		120		
Form of crediting	~~Examination~~ / crediting with grade*	Examination / crediting with grade*	~~Examination~~ / crediting with grade*	Examination / crediting with grade*	Examination / crediting with grade*
For group of courses mark (X) final course					
Number of ECTS points	2		4		
including number of ECTS points for practical (P) classes	0		4		
including number of ECTS points for direct teacher-student contact (BK) classes	0,8		1,6		

*delete as applicable

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

3. Practice in object-oriented programming in C# or Java
4. Practice in web application programming.

\

SUBJECT OBJECTIVES

C1. Basic knowledge in the area of models and protocols forming the SOA technology base.
C2. Service-oriented applications development on .NET platform.

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:

PEK_W01: Students have basic knowledge on the role and the operation of all components of the SOA model and protocols to support this paradigm.

PEK_W02: Students have basic knowledge of the solutions available on .NET platform associated with the development, hosting and security issues of Web services and service-oriented applications.

relating to skills:

PEK_U01: Student can implement a web application in .NET environment; is able to deploy a web application to the production server..

PEK_U02: Student can implement simple and complex clients of Web services in the .NET environment NET and WCF 4 platform.

PEK_U03: Student can implement web services with a variety of communication, reliability and safety mechanisms in the .NET environment NET and WCF 4 platform.

PEK_U04: Student obtains information from various sources on the service-oriented application development and problem solving.

PROGRAMME CONTENT

Form of classes - lecture		**Number of hours**
Lec 1	An introduction to the course and the principles of assessment. An overview of technologies supporting SOA	2
Lec 2	Web services development in Visual Studio environment and WCF 4 platform. Building a web service client as the ASP.NET application	2
Lec 3	Case study I: Buildig and deploying a web service and a web service client	2
Lec 4	XML technologies	2
Lec 5	Processing of XML documents on .NET platform	2
Lec 6	SOAP basics. WSDL basics	2
Lec 7	Case study II: Building and deplying a web service with multiple endpoins and data base	2
Lec 8	Case study II, cont.: Building and deplying a webservice client supporting SOAP and REST protocols	2
Lec 9	Test	2
	Total hours	18

Form of classes - class		**Number of hours**
Cl 1		
Cl 2		
Cl 3		
..		
	Total hours	

Form of classes - laboratory		**Number of hours**
Lab 1	Presentation of the scope and principles of assessment. Developing a demo web application in the local environment.	2
Lab 2	Deploying demo web application to the production server; identification of the	2

	protocols used in client-server web application using utility tools – task #1	
Lab 3	Case study I: developing web service client application with Visual Studio and C#/ASMX– task #2	2
Lab 4	Case study II: developing web service client application with Visual Studio and WCF 4 platform– task #3	
Lab 5	Case study III: developing and hosting web service as IIS/ASP.NET application – task #4	2
Lab 6	Case study IV: Processing XML documents on .NET platform – task #5	2
Lab 7	Case study V: developing web service application for processing and storing XML documents – task #6	2
Lab 8	Extending functionality of the case study V; hosting web service on the production server – task #7	2
Lab 9	Development of the web client application for case study V – task #8	2
	Total hours	18

Form of classes - project		**Number of hours**
Proj 1		
Proj 2		
Proj 3		
…		
	Total hours	

Form of classes - seminar		**Number of hours**
Sem 1		
Sem 2		
Sem 3		
…		
	Total hours	

TEACHING TOOLS USED
N1. Lecture supported by multimedia presentations. N2. An integrated development environment supporting the web services and service-oriented applications designing. N3. Utility tools (communication protocol analyzer)

EVALUATION OF SUBJECT EDUCATIONAL EFFECTS ACHIEVEMENT

Evaluation (F – forming (during semester), P – concluding (at semester end)	Educational effect number	Way of evaluating educational effect achievement
F1	PEK_U01	Rating the solution of the task #1 on a scale 0 - 1 or traditional
F2	PEK_U01	Rating the solution of the task #2 on a scale 0 - 1 or traditional
F3	PEK_U01, PEK_U02	Rating the solution of the task #3 on a scale 0 - 1 or traditional

F4	PEK_U01, PEK_U02	Rating the solution of the task #4 on a scale 0 - 1 or traditional
F5	PEK_U01, PEK_U02	Rating the solution of the task #5 on a scale 0 - 1 or traditional
F6	PEK_U01, PEK_U02, PEK_U03	Rating the solution of the task #6 on a scale 0 - 1 or traditional
F7	PEK_U01, PEK_U02, PEK_U03	Rating the solution of the task #7 on a scale 0 - 1 or traditional
F8	PEK_U01, PEK_U02, PEK_U03	Rating the solution of the task #8 on a scale 0 - 1 or traditional

C1 (grading lab) - Rate is calculated as the arithmetic average of the ratings F1 ... F8 (the traditional scale) or in accordance with the formula:

< 4 → ndst
4 p. → dst
5 p. → dst+
6 p. → db
7 p. → db+
8 p. → bdb
> 8 p. → cel (optional task)

C2 (grading lecture) -
test - written, including open-ended questions, testing the knowledge and skills of the course. The test is given a positive evaluation, if the student scores at least 50% of the maximum number of points. After that the assessment is raised by 0.5 points at 5%.
(note: C1 must be positive)

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

1. Competence in basic algebra and mathematical analysis
2. Differential equations
3.

\

SUBJECT OBJECTIVES

C1 Knowledge on methodological postulates
C2Competence in mathematical modeling on the base of methodology of empirical sciences
C3 Competence in hypothesis testing
C4 Competence in creation of homogenous and invariant to the systems of units models

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:
PEK_W01Knowledge on methodological postulates
PEK_W02Knowledge on logical postulates in creation of mathematical model
…
relating to skills:
PEK_U01Competence in mathematical modeling with accordance to methodological postulates
PEK_U02Competence in hypothesis and models testing
…
relating to social competences:
PEK_K01Competence in exactness of model description

PEK_K02Ability to study new problems of methodology and reflection on experiment

PROGRAMME CONTENT

	Form of classes - lecture	**Number of hours**
Lec 1	Methodological postulates of: determinism, closed system, accordance with accepted theories, simplicity and falsification	2
Lec 2	Classical theory of measurements, dimensional analysis and dimensional space	2
Lec 3	Dimensional description of a process, dimensional function, theorem Pi	2
Lec 4	Applications of theorem Pi in: creation of mathematical models construction, experiment planning, identification	2
Lec 5	Theory of similarity, falsification of the completeness of dimensional function arguments	2
Lec 6….	Identification of mathematical models	2

Lec7 Lec8	Multistage identification and description of model construction Models testing	2 2
	Total hours 16 plus two colloquiums 2 hours

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

1. Basic knowledge of object-oriented modeling with particular emphasis on business modeling.
2. Basic knowledge of the requirements specification.
3. Basic knowledge of databases and data modeling
4. Basic knowledge of SQL and MDX

\

SUBJECT OBJECTIVES

C1. Acquisition the ability of modeling of business data
C2. Acquiring the ability to assess data quality
C3. Acquiring the ability to define and process data stored in databases and data warehouses.
C4. Acquisition of skills of data analysis and reporting

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:
PEK_W01 Student gained essential knowledge in the field of advanced data analysis methods

relating to skills:
PEK_U01 Student knows how to solve the task modeling, analysis and decision making for different types of objects

PROGRAMME CONTENT

Form of classes - lecture		**Number of hours**
Lec 1	The analysis of business data, data modeling, analysis of the data sources, data preparation for extraction	2
Lec 2	Quality of the data - evaluation and standardization of data , regular expressions, building patterns	2
Lec 3	Analytical processing of data using SQL and MDX	2
Lec 4	Fundamentals of business reporting, designing and using of KPIs, methods of graphical representation and analysis of data	2
Lec 5	Test	1
	Total hours	**9**

Form of classes - class		**Number of hours**
Cl 1		

Cl 2		
Cl 3

TEACHING TOOLS USED

N1. Informative lecture with elements of problem, supported by multimedia presentations and examples of solutions
N2. Database management systems.
N3. BI systems.
N4. Spreadsheets
N5. E-learning system used for the publication of teaching materials and equipment, collection and assessment of student work.

EVALUATION OF SUBJECT EDUCATIONAL EFFECTS ACHIEVEMENT

Evaluation (F – forming (during semester), P – concluding (at semester end)	Educational effect number	Way of evaluating educational effect achievement
F1 – prob. 1.	PEK_U01	Rating the solution of the prob. 1 on a scale 0 - 1 or traditional way
F2 – prob. 2.	PEK_U01	Rating the solution of the prob. 2 on a scale 0 - 1 or traditional way
F3 – prob. 3.	PEK_U01	Rating the solution of the prob. 3 on a scale 0 - 1 or traditional way
F4 – prob. 4.	PEK_U01	Rating the solution of the prob. 4 on a scale 0 - 1 or traditional way
F5 – prob. 5.	PEK_U01	Rating the solution of the prob. 5 on a scale 0 - 1 or traditional way
F6 – prob. 6.	PEK_U01	Rating the solution of the prob. 6 on a scale 0 - 1 or traditional way
F7 – prob. 7.	PEK_U01	Rating the solution of the prob. 7 on a scale 0 - 1 or traditional way
F8 – prob. 8.	PEK_U01	Rating the solution of the prob. 8 on a scale 0 - 1 or traditional way
F9 – prob. 9.	PEK_U01	Rating the solution of the prob. 9 on a scale 0 - 1 or traditional way
C1 - final evaluation of the laboratory	PEK_U01	Grade is calculated as the arithmetic average of the ratings F1 ... F9 (the traditional scale) or in accordance to the formula: p. < 5,0 → ndst 5,0 ≤ p. < 5,5 → dst 5,5 ≤ p. < 6,5 → dst+ 6,5 ≤ p. < 7,5 → db 7,5 ≤ p. < 8,5 → db+ 8,5 ≤ p. ≤ 9,0 → bdb 9,0 < p. → excelent (secondary task)
C2 - final evaluation of the course	PEK_W01	Test - evaluation of the knowledge and skills of the course. On the positive assessment, the student must solve at least three of the five tasks and to answer to two of the five questions. The assessment can be improved by solving additional task or the correct answer to the question from the problem domain (by 0.5)

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

1. Is able to use bug and issue trackers as well as version control system.
2. Is able to use programming language (Java).
3. Knows basics of statistics.

\

SUBJECT OBJECTIVES

C1 To familiarize students with the selected software metrics and measurement tools and the way to formulate useful software metrics.

C2 To familiarize students with the selected methods and tools to build and evaluate prediction models in software engineering, possibilities of improvement and comparison with the existing models.

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:

PEK_W01 Has a basic knowledge which allows to name sample software metrics and measurement tools as well as to explain how to formulate useful software metrics. Wymienia przykładowe metryki oprogramowania i narzędzia do ich gromadzenia oraz wyjaśnia sposób konstruowania użytecznych metryk.

PEK_W02 Has a basic knowledge which allows to name sample methods, tools or languages to build, empirically evaluate and compare prediction models in software engineering. Wymienia przykładowe metody, narzędzia czy języki do budowy, empirycznej ewaluacji i porównywania modeli predykcji w inżynierii oprogramowania.

PEK_W03 Has a basic knowledge which allows to name sample results of empirical studies in software engineering, especially those which are known as laws and hypotheses in software engineering.

…

relating to skills:

PEK_U01 Is able to find in literature basic software metrics, measurement tools and methods to build prediction models in software engineering

PEK_U02 Is able to build prediction models, plan and perform their empirical evaluation using proper tools, to interpret obtained results and to draw appropriate conclusions.

PEK_U03 Is able to develop new, creatively modify and/or integrate existing metrics, measurement tools or prediction model building methods within software engineering domain.

PEK_U04 Is able to propose research hypothesis concerning experimental comparison of existing and new solutions within the area of prediction models in software engineering and to prepare and conduct comparative study providing data necessary to test the proposed research hypothesis, results interpretation and coming to conclusions.

PEK_U05 Is able to prepare a preliminary technical report in English including results of the conducted research.

…
relating to social competences:
PEK_K01 Is able to take creative steps in order to carry out tasks required during the course.

PROGRAMME CONTENT		
Form of classes - lecture		**Number of hours**
Lec 1	Introduction to the course. Basic definitions	2
Lec 2	Metric validation criteria, Goal-Question-Metric (GQM), metrics usability.	2
Lec 3	Metrics and measurement tools in software engineering. Introduction to prediction models.	2
Lec 4	Prediction models in software engineering.	2
Lec 5	Introduction to selected platform to build and to evaluate prediction models.	2
Lec 6	Comparison of prediction models. Empirical studies in software engineering	2
Lec 7	Laws and hypotheses in software engineering. Defect detection methods.	2
Lec 8	Summary and retrospection	1
	Total hours	15

	Total hours	

Form of classes – project		Number of hours
Proj 1	Introduction, passing criteria.	2
Proj 2	Software metrics and prediction models in software engineering – a preliminary review of application areas and selection of a research topic.	2
Proj 3	A preliminary state of the art within a chosen research topic.	2
Proj 4	A technical report presenting state of the art within a chosen research topic, possible attractive/innovative character of an undertaken research topic (e.g. preliminary proposals of novel software metrics, measurement or data integration tools, and/or methods to build prediction models and and research infrastructure) [0…15 pkt] (Pr1-Pr4) .	2
Proj 5	Research infrastructure building	2
Proj 6	Research infrastructure further building	2
Proj 7	Updated proposal of possibly novel solutions in order to obtain better prediction models in software engineering. An attempts to build and preliminary evaluate prediction models.	2
Proj 8	Improving novel solutions and research infrastructure as well as preliminary attempts to build and empirically evaluate prediction models – part 1	2
Proj 9	Improving novel solutions and research infrastructure as well as preliminary attempts to build and empirically evaluate prediction models – part 2	2
Proj 10	Improving novel solutions and research infrastructure as well as preliminary attempts to build and empirically evaluate prediction models – part 3	2
Proj 11	Experimental comparison of the proposed and existing solutions – a preliminary technical report	2
Proj 12	Replication package preparation	2
Proj 13	Taking into account threats to validity of the conducted research and technical report correction.	2
Proj 14	Final technical report (publication draft) and research infrastructure	2
Proj 15	Summary and retrospection, and grading.	2
	Total hours	30

Form of classes - seminar		Number of hours
Sem 1	Introduction, passing criteria, schedule and selection of topics.	1
Sem 2	Topic 1 is selected by students from the pool including, for example, the following ones: 1) Software metrics and measurement tools 2) Software metrics and models in software quality assessment. 3) Prediction models in software engineering (software defect prediction, top crashes, effort and cost prediction) 4) Tools and environments to build and evaluate prediction models.	2

	5) Methods to build prediction models. 6) Methods to evaluate prediction models. 7) Ensemble learning approaches in prediction models. 8) New trends in building and evaluation of prediction models.	
Sem 3	Topic 2 is selected from the aforementioned pool of topics	2
Sem 4	Topic 3 is selected from the aforementioned pool of topics	2
Sem 5	Topic 4 is selected from the aforementioned pool of topics	2
Sem 6	Topic 5 is selected from the aforementioned pool of topics	2
Sem 7	Topic 6 is selected from the aforementioned pool of topics	2
Sem 8	Topic 7 is selected from the aforementioned pool of topics	2
	Total hours	15

TEACHING TOOLS USED
N1. Lecture N2. The course web page with references to literature and course related stuff (e.g. sample data sets). N3. Software to build, evaluate and compare prediction models and to collect software metrics. N4. Internet and software infrastructure (e.g. versioning repository SVN or Git). N5. Software to prepare presentations and technical reports (Latex, TeXnicCenter, PowerPoint/Beamer)

EVALUATION OF SUBJECT EDUCATIONAL EFFECTS ACHIEVEMENT

Evaluation (F – forming (during semester), P – concluding (at semester end)	Educational effect number	Way of evaluating educational effect achievement
F1	PEK_U01	Evaluation of technical report draft v.1, in particular originality and innovative character of a preliminary research proposal (e.g. new metrics, tools, prediction models, and application areas), thoroughness of literature review (state of the art) and maturity of a research infrastructure [0…15 pkt] (Pr1-Pr4) .
F2	PEK_U02, PEK_U03	Evaluation of technical report draft v.1, in particular originality, innovative character and progress of a research project and maturity of a research infrastructure [0…15 pkt] (Pr5-Pr7).
F3	PEK_U02…	Evaluation of technical report draft v.3, in particular originality, innovative character and progress of a research project (e.g. empirical evaluation of a

	PEK_U04	proposed solution and comparison with the existing ones) and maturity of a research infrastructure [0…20 pkt] (Pr8-Pr11).
F4	PEK_U02 … PEK_U04	Evaluation with regard to maturity, originality, and publication value of the final technical report (publication draft) including usually description of the novel solultions (metrics, tools, prediction models), their empirical evaluation and comparison with existing solutions, research infrastructure, discussion of threats to validity of the conducted research [0…50 pkt] (Pr12-Pr15).
P1 – project	PEK_U01 … PEK_U04	P1 is obtained on a basis of the points from F1…F4 in the following way (mark – points): • 5.5 – 91…100 pkt and F4=50 pkt • 5.0 – 91…100 pkt • 4.5 – 81…90 pkt • 4.0 – 71…80 pkt • 3.5 – 61…70 pkt • 3.0 – 50…60 pkt • 2.0 <50 pkt
P2 – lecture	PEK_W01 … PEK_W03	Exam – a written test to evaluate knowledge covered in lectures. A positive mark is given if student get at least 50% of the points possible to achieve.
P3 – seminar	PEK_U01, PEK_U02	P3 is based on how well a presentation has been conducted (e.g. clearly defined goals of presentation or benefits for the listeners, communication, presentation content, level of details, examples, timing, presentation flow - order of topics, capturing audience / listeners involvement). Given mark may be changed due to active and creative discussion during seminars or (after an agreement with a lecturer) a detailed report or tutorial on a given topic.

including number of ECTS points for direct teacher-student contact (BK) classes	0,8	1,2			

*delete as applicable

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

5. Practice in object-oriented programming.
6. Basic knowledge of software engineering.

\

SUBJECT OBJECTIVES

C1. Basic knowledge in the area of software system modeling with the stress on business modeling as the initial phase of the software development process.
C2. Basic knowledge in the area of the requirements specification.

SUBJECT EDUCATIONAL EFFECTS

Relating to knowledge:
PEK_W01: Students have basic knowledge on business modeling.
PEK_W02: Students know and understand the role of specification requirements.
PEK_W03: Students have basic knowledge on selected modeling languages.

Relating to skills:
PEK_U01: Students, in cooperation with domain experts, can construct and analyze business models.
PEK_U02: Students can build models of system requirements.

Relating to social competences:
PEK_K01: Students are able to cooperate with representatives of application domain.

PROGRAMME CONTENT		
Form of classes - lecture		**Number of hours**
Lec 1	Basic notions for software development cycle. Survey of modeling languages – UML and BPMN.	1
Lec 2	Class diagrams – classes, associations, generalizations.	2

Lec 3	Object Constraint Language.	2
Lec 4	BPMN process diagrams.	2
Lec 5	System requirements; use case diagrams.	2
	Total hours	9

Form of classes - class		Number of hours
Cl 1	Analysis of textual descriptions of exemplary application domains – structural aspect.	2
Cl 2	Construction and analysis of class diagrams.	2
Cl 3	Construction and analysis of class diagrams.	2
Cl 4	Construction and analysis of OCL constraints imposed on diagrams.	2
Cl 5	Case study – an example of structural modeling.	2
Cl 6	Test 1.	1
Cl 7	Construction and analysis of simple BPMN process diagrams.	2
Cl 8	Construction and analysis of advanced BPMN process diagrams.	2
Cl 9	Construction and analysis of use case diagrams.	2
Cl 10	Test 2.	1
	Total hours	18

TEACHING TOOLS USED

N1. Lecturer's presentation at a blackboard, supported by a multimedia presentation using a laptop and a projector.
N2. Individual search and study of literature and Internet sources.
N3. Access to teaching materials published in the local area network.
N4. Individual consultations.

EVALUATION OF SUBJECT EDUCATIONAL EFFECTS ACHIEVEMENT

Evaluation (F – forming (during semester), P – concluding (at semester end)	Educational effect number	Way of evaluating educational effect achievement
F1	PEK_W01 PEK_U01 PEK_K01	Each student gets 1 point for own solution of a problem from the list of problems for the given class.
F2	PEK_W01 PEK_W02 PEK_U01 PEK_U02 PEK_K01	Each student gets up to 10 points for own solution of problems for the given test (intermediate and final).

<table>
<tr>
<td>F3</td>
<td>PEK_W01
PEK_W02
PEK_W03
PEK_U01
PEK_U02
PEK_K01</td>
<td>The final evaluation for the classes is determined on the basis of total marks obtained by the student's activity for exercise (F1) and colloquia (F2). Positive mark is awarded to a student who has obtained at least 4 points for each of the symposia and has won a total of 10 points.
If this condition is met, the number of points P is the basis for evaluation in accordance with the following table:
<table>
<tr><td>P</td><td>10</td><td>12</td><td>14</td><td>16</td><td>18</td></tr>
<tr><td>Mark</td><td>3.0</td><td>3.5</td><td>4.0</td><td>4.5</td><td>5.0</td></tr>
</table>
Students who get at least a very good grade are exempt from the examination with the same mark as for the classes.</td>
</tr>
<tr>
<td colspan="3">C: The final evaluation of the course is determined based on the results of the examination. The examination lasts two hours and consists of a set of tasks, the total number of 20 points. The condition for a positive assessment of the final exam is to get 10 points and a positive final evaluation of the exercise.
The final evaluation of the examination is determined in accordance with the following table:
<table>
<tr><td>Points</td><td>10</td><td>12</td><td>14</td><td>16</td><td>18</td></tr>
<tr><td>Mark</td><td>3.0</td><td>3.5</td><td>4.0</td><td>4.5</td><td>5.0</td></tr>
</table>
</td>
</tr>
</table>

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

7. Practice in object-oriented programming in C#
8. Practice in web application programming

\

SUBJECT OBJECTIVES

C1. Basic knowledge in the area of different models of cloud computing, services, good programming practices and deploying applications to Windows Azure cloud; evaluation of cloud computing in terms of business.

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:

PEK_W01: Students have basic knowledge on the different models of cloud computing and their services.

PEK_W02: Students could list and describe a variety of mechanisms available in the Windows Azure cloud to access and storage of data, distribution of computing power, data and application security, performance and integration bus.

relating to skills:

PEK_U01: Student is able to implement the Windows Azure cloud applications using a variety of data storage services.

PEK_U02: Student is able to implement on the Windows Azure platform autoscaling applications based on application scalability patterns.

PEK_U03: Student is able to implement cloud applications using advanced communication mechanisms.

PROGRAMME CONTENT

Form of classes - lecture		**Number of hours**
Lec 1	An introduction to the course and the principles of assessment	2
Lec 2	Windows Azure architecture	1

F3	PEK_U01, PEK_U02	Rating the solution of the task #3 on a scale 0 - 1 or traditional
F4	PEK_U01, PEK_U02	Rating the solution of the task #4 on a scale 0 - 1 or traditional
F5	PEK_U01, PEK_U02, PEK_U03	Rating the solution of the task #5 on a scale 0 - 1 or traditional
F6	PEK_U01, PEK_U02	Rating the solution of the task #6 on a scale 0 - 1 or traditional
F7	PEK_U01, PEK_U02, PEK_U03	Rating the solution of the task #7 on a scale 0 - 1 or traditional
F8	PEK_U01, PEK_U02, PEK_U03	Rating the solution of the task #7 on a scale 0 - 1 or traditional

C1 (grading lab) - Rate is calculated as the arithmetic average of the ratings F1 ... F13 (the traditional scale) or in accordance with the formula:

$p. \leq 3$ → ndst
$3 < p. \leq 4$ → dst
$4 < p. \leq 5$ → dst+
$5 < p. \leq 6$ → db
$6 < p. \leq 7$ → db+
$7 < p. \leq 8$ → bdb
$8 < p.$ → cel (optional task)

C2 (grading lecture) -
One test - written, including open-ended questions, testing the knowledge and skills of the course. The test is given a positive evaluation, if the student scores at least 50% of the maximum number of points. After that the assessment is raised by 0.5 points at 5%.
(note: C1 must be positive)

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

1. A student knows basic notations and diagrams used in object-oriented modeling.
2. A student builds distributed applications (at least client-server) in selected programming language.

SUBJECT OBJECTIVES

C1. Students understand the role of modeling and code generation in software development.
C2. Students are familiarized with design process of complex information systems, and solution used in this area. They are able to implement a system according to its design.
C3. Students are familiarized with quality assessment techniques of IT projects, and are able to assess the quality of different artifacts created during software development.

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:

PEK_W01 A student lists and describes models used in different stages of software development and defines their connection to the source code of application
PEK_W02 A student classifies non-functional requirements and lists tactics addressing them
PEK_W03 A student distinguishes architectural perspectives and views, uses architectural and design patterns.
PEK_W04 A students lists factors influencing quality of artifacts, knows basic steps of selected method of architecture assessment.

relating to skills:

PEK_U01A student designs software system architecture taking into account non-functional requirements
PEK_U02 A student assesses the quality of artifacts created during software system development
PEK_U03 A student proposes improvements for obtaining source code from models and/or uses source code generators
PEK_U04 A student implements selected part of software system according to its design, and tests its quality
PEK_U05 A student analyses possibility of using new tools, e.g. technologies, tools
PEK_U06 A student solves complex engineering tasks related to installation, configuration, implementation, verification, integration of different software components

Form of classes – lecture		**Number of hours**
Lec 1	Course description, course organization, examination. Introduction. Models and their role in SE. MDA approach. Overview of CIM artifacts.	2
Lec 2	Design of software system architecture. Architectural patterns. SOA.	2
Lec 3	Architectural mechanisms. Design patterns. Behavioral models.	2
Lec 4	Methods of architecture assessment.	1
Lec 5	Object-oriented design rules. Metrics used for design/code assessment and their interpretation.	2

Lec 6	Architectural mechanisms.	2
	Total hours	9

Form of classes – project		Number of hours
Pr1	Introduction. Course description, course organization.	2
Pr2	System requirement specification.	2
Pr3	System requirement analysis.	2
Pr4	Definition of system architecture (design views)	2
Pr5, Pr6	Definition of system architecture (use-case realizations, architectural mechanisms, tactics, solution justifications, design patterns)	4
Pr7	Architecture assessment	2
Pr8, Pr9	Implementation and tests.	4
	Total hours	18

TEACHING TOOLS USED
N1. Informative lecture with elements of problem lecture, supported by multimedia presentations N2. Examples of project documentation N3. Software for modeling, implementation and testing of software. N4. E-learning system used for the publication of teaching materials, collection and assessment of students work.

EVALUATION OF SUBJECT EDUCATIONAL EFFECTS ACHIEVEMENT

Evaluation (F – forming (during semester), P – concluding (at semester end)	Educational effect number	Way of evaluating educational effect achievement
F1 – requirement specification	PEK_U01	Evaluation of internal and external consistency, completeness of prepared documents (1-st part: requirement specification). Traditional scale.
F2 – system architecture definition	PEK_U01.	Evaluation of internal consistency and external consistency, completeness of prepared documents (2-nd part: architecture definition). Traditional scale.
F3 – architecture assessment	PEK_U02	Evaluation of architecture assessment done by students. Traditional scale
F4 – implementation and tests	PEK_U03, …, PEK_U06	Selected part of the solution can be generated from models. Implementation is checked against its consistency to the design. Architecture definition is checked against justification of selected solutions. Traditional scale.
P1 – final grade (lecture)	PEK_W01, PEK_W02, PEK_W03, PEK_W04	Examination - written test. The test is given a positive evaluation, if the student scores at least 50% of the maximum number of points. Next, grades are increased every 10% (exception, [90%-97%]→ 5.0, > 97% → 5.5)

P2 – final grade (design)	PEK_U01,…, PEK_U05	Final grade calculated on the base of F1-F4 according to the formula: 0,2 * F1 + 0,3 * F2 + 0,2 * F3 + 0,3 * F4

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

1. Basics of organisation and venture management including business process modeling

\

SUBJECT OBJECTIVES

C1 Transfer of knowledge necessary for fulfilment of an active role in creating an organisation in which ICT services should function, in addition providing such services outside, including services used in internal business processes

C2 Learning about good practices in field of ITIL (Information Technology Infrastructure Library) allowing for modelling processes in an commercial company (for example computer and programming ventures) also non-commercial ones (for example government agencies), independent when it comes to its size, organisation type or acquired ICT tools

C3 Getting accustomed to defined role and responsibilities in ICT departments, organisation support processes (ITIL: Service Support) and planning and services control (ITIL: Service Delivery)

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:

PEK_W01 – has necessary knowledge for fulfilling an active role in shaping of and organisation in which ICT services should function

PEK_W02 – has knowledge about good practices in ITIL area

PEK_W03 – has knowledge about defined roles and responsibilities in ICT departments

relating to skills:

PEK_U01 – can use good ITIL practices in real life situations

PEK_U02 – can discern in roles and responsibilities of ICT departments in organisation

relating to social competences:

PEK_K01 – has expertise necessary for preparing and giving a speech on topic of designing ICT services in organisation

PROGRAMME CONTENT

Form of classes - lecture		**Number of hours**
Lec 1	Introduction to managing ICT services, evolution and expectations	0,5
Lec 2	ICT project – specificity. Methodologies and usefulness	0,5
Lec 3	Position of services management in ICT field and project management based on PRINCE2	0,5

Lec 4	Service-based ICT organisational model. What is ITIL?	0,5
Lec 5	Strategy of ICT services management	0,5
Lec 6	Service desk (central contact point with users)	0,5
Lec 7	Incydent Management	0,5
Lec 8	Problem Management	0,5
Lec 9	Change Management	0,5
Lec 10	Release Management	0,5
Lec 11	Configuration Management	0,5
Lec 12	CMDB structure and ITIL process support tools	0,5
Lec 13	Capacity Management	0,5
Lec 14	IT Service Continuity Management	0,5
Lec 15	Availability Management	0,5
Lec 16	Service Level Management	0,5
Lec 18	Colloquium	1
	Total hours	9

Form of classes - class		**Number of hours**
Cl 1		
Cl 2		
Cl 3		
Cl 4		
..		
	Total hours	

Form of classes - laboratory		**Number of hours**
Lab 1	Organization group and choice of topics and the environment	2
Lab 2	Requirement Analysis Call Center and Service desk	2
Lab 3	Implementation simple function Call Center and Service desk	4
Lab 4	discussion of the results	1
Lab 5		
...		
	Total hours	9

Form of classes - project		**Number of hours**

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

4. Is able to read research papers in English.

\

SUBJECT OBJECTIVES

C1 To familiarize students with selected, methodology-oriented techniques or hints to prepare research papers.

C2 To familiarize students with selected, tool-oriented techniques or hints to prepare research papers.

C3 To familiarize students with selected research papers in software engineering (or closely related areas) which could be seen as a research synthesis model to follow (e.g. systematic literature review, meta-analysis).

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:

PEK_W01 Has a basic knowledge which allows to name and describe selected useful tools to prepare research papers.

PEK_W02 Has a basic knowledge which allows to name and describe methodological hints and features of sample research papers in software engineering, or closely related areas, which could be seen as a research synthesis model to follow.

…

relating to skills:

PEK_U01 Is able to collect, assess, integrate and interpret information from research literature, data bases of research papers and other properly selected sources in English.

PEK_U02 Is able to collaborate on research synthesis paper in English.

PEK_U03 Is able to prepare a multimedia presentation in English focused on selected tools, packages or methods to prepare research papers.

PROGRAMME CONTENT

Form of classes - lecture		**Number of hours**
Lec 1	Introduction to the course.	1
Lec 2	Tools to prepare publications (LaTeX). Searching for research papers.	2
Lec 3	Systematic Literature Review	2

Lec 4-7	Preparing research papers. Test (Lec7)	8
Lec 8	Retrospection and test	2
	Total hours	15

Form of classes – laboratory		Number of hours
Lab1	Introduction, passing criteria.	1
Lab2	Software infrastructure to work on systematic literature review	2
Lab3	Searching for literature	2
Lab4	Preparing a research paper 1	2
Lab5	Preparing a research paper 2	2
Lab6	Preparing a research paper 3	2
Lab7	Preparing a research paper 4	2
Lab8	Evaluation of final drafts of research papers	2
	Total hours	15

Form of classes - seminar		Number of hours
Sem 1	Introduction, passing criteria, schedule and selection of topics.	1
Sem 2	Topic 1 is selected by students from the pool including, for example, the following ones: 1) LaTeX and text editors, 2) Systematic Literature Review, 3) Mapping Study, 4) BibTeX 5) LaTeX packages useful to prepare research papers (tables, images, animations) 6) Preparing research papers to research journals and conferences as well as confefrence posters in LaTeX. 7) Multimedia presentations in LaTeX.	2
Sem 3	Topic 2 is selected from the aforementioned pool of topics	2
Sem 4	Topic 3 is selected from the aforementioned pool of topics	2
Sem 5	Topic 4 is selected from the aforementioned pool of topics	2
Sem 6	Topic 5 is selected from the aforementioned pool of topics	2
Sem 7	Topic 6 is selected from the aforementioned pool of topics	2

Sem 8	Topic 7 is selected from the aforementioned pool of topics	2
	Total hours	15

TEACHING TOOLS USED
N1. Lecture N2. The course web page with references to literature and course related stuff. N3. Software to prepare research papers, reports and presentations (e.g. Latex, TeXnicCenter, Beamer). N4. Internet and server-side software infrastructure (e.g. versioning repository SVN or Git). N5. Search engines and research papers data bases

EVALUATION OF SUBJECT EDUCATIONAL EFFECTS ACHIEVEMENT

Evaluation (F – forming (during semester), P – concluding (at semester end)	Educational effect number	Way of evaluating educational effect achievement
F1	PEK_U01	Assessment of ability to use tools to prepare research papers and server infrastructure to collaborate on a paper as well as ability to findresearch papers on a selected topic in proper data bases and Internet [0…20 pkt] (Pr2-Pr3) .
F2	PEK_U01, PEK_U 02	Assessment on a basis of work progress [0…40 pkt] (Pr4-Pr7).
F3	PEK_U01, PEK_U 02	Assessment on a basis of the final research paper draft (its research and publication value) [40 pkt] (Pr8).
P1 – lab	PEK_U01	P1 is obtained on a basis of the points from F1…F3 in the following way (mark – points): • 5.5 – 91…100 pkt and F2>=35 pkt • 5.0 – 81…100 pkt • 4.5 – 71…80 pkt • 4.0 – 61…70 pkt • 3.5 – 51…60 pkt • 3.0 – 41…50 pkt • 2.0 <=50 pkt
P2 – lecture	PEK_W01 … PEK_W03	A written test to evaluate assimilation of knowledge covered in lectures. A positive mark is given if student obtains at least 50% of the points possible to achieve.
P3 – seminar	PEK_U01, PEK_U02	P3 is based on how well a presentation has been conducted (e.g. clearly defined goals of presentation or benefits for the listeners,

		communication, presentation content, level of details, examples, timing, presentation flow - order of topics, capturing audience / listeners involvement). Given mark may be changed due to active discussions and creative contributions during seminars or (after an agreement with a lecturer) a detailed report or tutorial on a given topic.
P – final	PEK_W01…03, PEK_U01…02	P is based on the following equation: P=(P2+2*P1+P3)/4 if and only if P1 is positive. Otherwise P=2.0.

SUBJECT CARD

Name in Polish Seminarium dyplomowe II
Name in English Diploma seminar
Main field of study (if applicable): Informatics
Specialization (if applicable): every specialization
Level and form of studies: ~~1st~~/ 2nd* level, ~~full-time~~ / part-time*
Kind of subject: obligatory ~~/ optional / university-wide*~~
Subject code INZ004067
Group of courses ~~YES~~ / NO*

	Lecture	Classes	Laboratory	Project	Seminar
Number of hours of organized classes in University (ZZU)					18
Number of hours of total student workload (CNPS)					60
Form of crediting	Examination / crediting with grade*	Examination / crediting with grade*	Examination / crediting with grade*	Examination / crediting with grade*	~~Examination~~ / crediting with grade*
For group of courses mark (X) final course					

Number of ECTS points					2
including number of ECTS points for practical (P) classes					
including number of ECTS points for direct teacher-student contact (BK) classes					0,8

*delete as applicable

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

1 Knowledge, skills and competences acquired at Informatics field at second level of study until 3th semester

\

SUBJECT OBJECTIVES

C1 Preparing students to write a master thesis according the internal requirements in Informatics field at Faculty of Computer Science and Management, Wrocław University of Technology,
C2 Providing students with basic skills related to preparation and presentation of scientific texts, beginning from the choice of topic, selection of tasks to be performed, use of literature to interpretation of the results.

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:
…
relating to skills:
PEK_U01 He is able to acquire information from literature, databases and other sources, also in English or other language used for communication in Informatics field, is able to integrate the information obtained, interpret them, make critical evaluation and also draw conclusions and formulate and justify opinions related to prepared master thesis.
PEK_U02 He can communicate using a variety of techniques in his professional environment and in other environments, also in English or other foreign language used for communication in Informatics field and also to present the results of his master thesis
relating to social competences:
…

PROGRAMME CONTENT

Form of classes - lecture		**Number of hours**
Lec 1		
Lec 2		
	Total hours	

Form of classes - class		**Number of hours**
Cl 1		
Cl 2		
	Total hours	

Form of classes - laboratory		**Number of hours**
Lab 1		

Lab 2		
	Total hours	

Form of classes - project		Number of hours
Proj 1		
Proj 2		
	Total hours	

Form of classes - seminar		Number of hours
Sem 1	Familiarization with the principles of master thesis realization at Informatics field. Rules related to student presentations. Determining the schedule of student presentations.	2
Sem 2	Review of basic skills related to preparation and presentation of scientific texts by students, beginning from the choice of topic, selection of tasks to be performed, use of literature and also how to write thesis and how obtained results should be interpret.	2
Sem 3 – Sem15	During semester each student has 2 presentations. The first presentation is related to the general view of the thesis topic, its placement in the literature and in the Informatics field. The student should present the primary aim of thesis, the state of art related to thesis topic, the concept of solution, the initial structure of thesis and timetable for further work. The purpose of the second presentation is preparation to defense and demonstrate presentation skills in English. The second presentation consists of two parts, namely, discussion of the results of the work in English and a short presentation in Polish devoted to the results of the thesis.	14
	Total hours	18

TEACHING TOOLS USED

N1. Multimedia presentations
N2. Examples of scientific papers and reports from the field of computer science.
N3. E-Learning System used to publish teaching materials and announcements, also used for collection and evaluation of student work.

EVALUATION OF SUBJECT EDUCATIONAL EFFECTS ACHIEVEMENT

Evaluation (F – forming (during semester), P – concluding (at semester end)	Educational effect number	Way of evaluating educational effect achievement
P	PEK_U01 PEK_U02	Evaluation of the presentation of the work at the seminar and prepared documentation from the presentation. The evaluation shall be subject to the fulfillment of the requirements for the presentation, including its substantive scope, structure and organization of presentation, techniques of conversation, a form of presentation, compactness of presentation and conclusions reached. Participation in the discussions after presentation is also evaluated. In addition, the seminar leader is able to control the cooperation between supervisors and graduate students.

PRIMARY AND SECONDARY LITERATURE

PRIMARY LITERATURE:

[16] Literature related to the scope of realized project selected by student and recommended by the teacher.

[17] Requirements for engineering thesis at the Faculty of Computer Science and Management, Wrocław University of Technology, www.wiz.pwr.wroc.pl

SECONDARY LITERATURE:

SUBJECT SUPERVISOR (NAME AND SURNAME, E-MAIL ADDRESS)

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

1. Basic mathematical knowledge for 1st level of studies.

2. Informatics knowledge background.
3. Algorithms knowledge background.

\

SUBJECT OBJECTIVES

C1 Acquiring knowledge about functions and significance of information systems in contemporary organizations
C2 Acquainting with the functions and development of information systems in information society
C3 Acquainting with the different methods of information retrieval by surfing the Web
C4 Recognizing the problems of passing of contemporary organizations to Internet space
C5 Obtainment of skills to analyze the literature from information systems area and to synthesize the contents from different sources
C6 Application of the obtained knowledge to presentation the problems from information systems area by means of using adequate tools

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:
PEK_W01 Familiarity with basic models of information systems
PEK_W02 Basic knowledge about Web information systems
PEK_W03 Familiarity with common multimedia technologies
PEK_W04 Understanding of the measures of information retrieval efficiency

relating to skills:
PEK_U01 Student can to build information query for different types of information needs
PEK_U02 Can to determine basic features of information system for given organization
PEK_U03Student be able to evaluate the precision of retrieved information
PEK_U04 Can to present basic features of given information system

relating to social competences:
PEK_K01 Can individually to use literature of the subject and to select useful information
PEK_K02 Student is convinced above positive role of information systems in stimulation of the civilization development

PROGRAMME CONTENT

	Form of classes - lecture	**Number of hours**
Lec 1	History of information systems development. Information processing. Theoretical basis of information systems. Automation of information flow in organization.	2
Lec 2	Functioning of information systems in computer networks. Information retrieval. Digital libraries.	2
Lec 3	Multimedia. Importance of multimedia technologies in information systems development. How societies embrace information technology.	2
Lec 4	Efficiency of information systems. Case study of chosen information system.	2
Lec 5	Test	1
	Total hours	9

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

None.

\

SUBJECT OBJECTIVES

C1 Getting to know foundations of designing computer science decision support systems using general systemic methods which make it possible to apply unified approaches for analysis and decision making for decision support systems of different nature.
C2 Acquisition of skills to represent in the form of mathematical formulas of decision making plants treated as input-output plants.
C3 Acquisition of skills to analyze of decision making plants treated as input-output plants.
C4 Getting acquainted with methods and algorithms of multi-stage decision making.
C5 Acquisition of skills to apply dynamic programming method.
C6 Getting to know metods and algorithms of multi-criteria decision making.
C7 Acquisition of skills to use AHP method.

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:
PEK_W01 Student knows foundations of designing of decision support systems for any kind of plants.
PEK_W02 Student knows foundations of analysis and decision making for input-output plants with logic knowledge representation.
PEK_W03 Student knows selected method of multi-stage and multi-criteria decision making.
relating to skills:
PEK_U01 Student is able to elaborate a mathematical model for an input-output decision making plant in discrete state space as well as with logic knowledge representation.
PEK_U02 Student can solve analysis and decision making tasks for elementary plants with logic knowledge representation.
PEK_U03 Student is able to solve multi-stage decision making problem using Bellman's Principle and dynamic programming.
PEK_U04 Student can use AHP algorithm for the solution od multi-criteria decision making problem
relating to social competences:
PEK_K01 Student can take advantage of professional literature by oneself and can perform the critical analysis of information mined.
PEK_K02 Student can think creatively.

PROGRAMME CONTENT

Form of classes - lecture		**Number of hours**
Lec 1	Decision support systems – definitions, structures, problems, application of discrete state equations and logic expressions for representation of decision making plants.	2
Lec 2	Outline of logic-algebraic method and its application to solution of analysis and decision making for input-output decision making plants.	2
Lec 3	Decision making – definition, typology, logic-algebraic plant, Bellman's Principle and multi-stage decision making.	2
Lec 4	Multi-criteria decision making – Pareto sets, AHP method.	2
Lec 5	Examples of computer decision support systems.	1
	Total hours	9

Form of classes - class		**Number of hours**
Cl 1	Solution of numerical exercises concerning difference equations as well as propositional calculus.	2
Cl 2	Solution of numerical exercises concerning mathematical representations of input-output plants.	2
Cl 3	Solution of numerical exercises concerning analysis and decision making using logic-algebraic method.	2
Cl 4	Solution of numerical exercises concerning dynamic programming and AHP	2

	method.	
Cl 5	Final test.	1
	Total hours	9

Form of classes - laboratory		Number of hours
Lab 1		
Lab 2		
Lab 3		
Lab 4		
Lab 5		
…		
	Total hours	

Form of classes - project		Number of hours
Proj 1	Collecting of indispensable information about selected plant being the decision making plant.	2
Proj 2	Determination of mathematical model of selected decision making plant and decision making problem formulation as well as analysis of decision making plant using its mathematical model.	2
Proj 3	Choice of decision making method for further usage as well as elaboration of decision making algorithm.	2
Proj 4	Implementation and analysis of decision making algorithm.	2
Proj 5	Elaboration of conclusions and written report of the project performed.	1
	Total hours	9

Form of classes - seminar		Number of hours
Sem 1		
Sem 2		
Sem 3		
…		
	Total hours	

TEACHING TOOLS USED
N1 Lecture – traditional method. N2 Classes – traditional method. N3 Consultation. N4 Individual discussion with student. N5 Short test (10 mins.). N6 Self-contained work.

EVALUATION OF SUBJECT EDUCATIONAL EFFECTS ACHIEVEMENT

Evaluation (F – forming (during semester), P – concluding (at semester end)	Educational effect number	Way of evaluating educational effect achievement
F1	PEK_W02; PEK_W03; PEK_U01– PEK_U04	Short tests during the classes.
F2	PEK_K01– PEK_K02	Individual discussion with student during

		the project.
P (Classes)	PEK_W02; PEK_W03; PEK_U01–PEK_U04	Test.
P (Project)	PEK_U01–PEK_U04; PEK_K01–PEK_K02	Evaluation of written report of the project.
P (Lecture)	PEK_W01–PEK_W03; PEK_K02	Exam.

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

9. The ability to write distributed applications in a high-level programming language is recommended (but not required).

\

SUBJECT OBJECTIVES

C1 To learn standard models of distributed systems (process algebras).
C2 To learn selected tools for the specification and verification of distributed systems.

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:
PEK_W01 Students enumerate and explain basic operations of process algebras.
PEK_W02 Students build algebraic specifications of simple concurrent and distributed systems on different levels of abstraction.
PEK_W03 Students write properties of reactive systems in an appropriate logic.
PEK_W04 Students enumerate and describe methods of process verification.

relating to skills:
PEK_U01: Student makes use of software tools to specify and verify distributed processes.
PEK_U02: Student is able to make use of the literature on the subject and critically analyse the information obtained.

PROGRAMME CONTENT

	Form of classes - lecture	**Number of hours**
Lec 1	Introduction to lambda calculus as a model of sequential computations.	2
Lec 2	Expressive power of lambda calculus. Lambda calculus with simple types.	2
Lec 3	Algebra of sequential and communicating processes.	2
Lec 4	Recursion. Condidional and the choice quantifier for data. Abstraction. Hiding internal behaviour.	2
Lec 5	Modelling of system behaviour with mCRL2 toolset.	2
Lec 6	Specification, implementation and verification of processes.	2
Lec 7	Model checking. Hennessy-Milner logic.	2
Lec 8	Written test.	2
Lec 9	Overview of other formalisms.	2
	Total hours	18

Form of classes - class		Number of hours
Cl 1	Administrative class. Grading policy. Installation instructions for the used toolset.	1
Cl 2	Lambda calculus.	2
Cl 3	Algebra of sequential and communicating processes. Recursion. Condidional and the choice quantifier for data.	2
Cl 4	Abstraction. Hiding internal behaviour. Modelling of system behaviour with mCRL2 toolset.	2
Cl 5	Specification, implementation and verification of processes. Hennessy-Milner logic.	2
	Total hours	9

TEACHING TOOLS USED

N1. Lecture supported by multimedia presentations.
N2. E-learning system used to publish teaching materials and messages.
N3. A toolset to specify and verify concurrent and distributed processes.
N4. Using Internet resources.

EVALUATION OF SUBJECT EDUCATIONAL EFFECTS ACHIEVEMENT

Evaluation (F – forming (during semester), P – concluding (at semester end)	Educational effect number	Way of evaluating educational effect achievement
F1	PEK_W01 PEK_W02 PEK_W03 PEK_W04 PEK_U01 PEK_U02	Grading homework exercises solved at classes and declared as solved.
F2	PEK_W01 PEK_W02 PEK_W03 PEK_W04	Written test at lecture.

P The overall grade of the course is (C+2L)/2 rounded off. C is the grade for classes, and L is the grade for written test (lecture).

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

7. Has a basic knowledge of ICT systems and computer communication networks (K1INF_W11).
8. Knows the basic methods and tools for collecting, processing and retrieval of information and knowledge extraction (K1INF_W16)
9. Can use the right tools to build a simple model of the process (the object), to formulate specific task analysis and decision making (K1INF_U15)
10. Can effectively use the methods and tools for collecting, processing and retrieval of information and knowledge extraction (K1INF_U16)
11. It has the ability to self-education, including in order to improve the professional competence (K1INF_U05)
12. Understands the need and knows the possibility of lifelong learning and to improve their professional and social competences (K1INF_K01)

SUBJECT OBJECTIVES

C1. Ordered, underpinned by theoretical knowledge of methods and techniques for transmitting signals using different modulation techniques, methods and techniques of information transmission, methods of organization and management of data communications traffic in the tasks of design and analysis of communication systems, methods of delivering service quality of ICT systems, analysis of quantitative and qualitative requirements and methods for sizing of distributed IT systems.

C2. Skills about the differences and benefits of the use of analog and digital data transmission techniques, the differences and benefits of the use of wired and wireless signal transmission techniques, developing the concept of using wired and wireless technologies in the basic applications of ICT systems, defining the qualitative and quantitative requirements of the user information and communication systems range of data, designing ICT solutions needed to achieve the qualitative and quantitative requirements of the user, using standards and solutions available on the market, estimating the cost of preparing and maintaining ICT solutions needed to achieve the qualitative and quantitative requirements, designing modernization of IT solutions needed to achieve the qualitative and quantitative requirements, identifying differences and similarities between solutions in a variety of applications (e-health, e-government and e-learning, in real-time systems, etc.).

C3. Skills for the design and analysis of complex, distributed ICT systems providing network services for distributed computer communication systems.

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:

K2INF_W02: Has a structured, theoretically founded essential knowledge of business modeling and requirements specification systems.

K2INF_W03: Has a structured, theoretically founded essential knowledge in the delivery of information distributed systems

K2INF_W06: Achieves results in the category of knowledge for specialty data communications

relating to skills:

K2INF_U05: Can - in formulating and solving engineering tasks - integrate knowledge of the fields of science and scientific disciplines relevant to the study being studied and applied a systemic approach, taking into account the non-technical aspects

K2INF_U06: Can solve the modeling, analysis and decision making for different types of objects

K2INF_U08: Achieves results and skills in areas of data exchange and computer communications systems

relating to social competences:

K2INF_K01: Can think and act in a creative and enterprising

K2INF_K02: Has aware of the social role of technical graduating, especially understands the need for the formulation and communication to the public, especially through the mass media, information and opinion on the achievements of technology and other aspects of engineering, shall endeavor to provide such information and opinions in a widely understood the reasons for the different points of view

PROGRAMME CONTENT		
Form of classes - lecture		**Number of hours**
Lec 1	Classification of ICT systems from different points of view. Quality of Experience (QoE) and Quality of Service (QoS) in ICT systems with elastic and streaming traffic.	2
Lec 2	Introduction to queuing. Open and close networks of queues. Queuing models of circuit-switched and packet-switched computer communication systems. Burke's theorem and Kleinrock approximation.	2
Lec 3	Access control, flow control and routing tasks formulation and solution in distributed environments.	1
Lec 4	Requirements analysis	1
Lec 5	Models (Poisson, Markov modulated, self-similarity, etc) of teletraffic and its application in traffic engineering tasks.	1
Lec 6	QoS delivery concepts: best effort, integrated services and differentiated services	1
Lec 7	New concepts of systems and networks - NXGN (Next Generation Networks) i NWGN (New Generation Network). Summary.	1
	Total hours	9

PROGRAMME CONTENT	
Form of classes - project	**Number**

		of hours
Proj 1	Formulation design task based on the analysis of the literature, documentation, etc.	2
Proj 2	Justification for the choice task and purpose of the task design - an analysis of the expected benefits of the project task.	2
Proj 3	Quantitative and qualitative requirements analysis for the communication system under design	2
Proj 4	Analysis of state of the art on how to solve the task design and analysis and selection of the task design methodology	2
Proj 5	Tools (methods, algorithms, procedures, software and hardware) analysis and selection required for the implementation of the project task	2
Proj 6	Implementation of prototype of modules solve the task and prototype testing and evaluation	2
Proj 7	Modification of solutions using prototype test results	2
Proj 8	Integration of modules distinguished at the stages of requirements analysis and prototyping. Verification and testing of an integrated solution design task	2
Proj 9	Analysis of the possibility of extending the project tasks. Preparation of tfinal presentation and documentation of the design task. Presentation of the results of the design task	2
	Total hours	18

TEACHING TOOLS USED
N1. Traditional lecture supported by whole class multimedia presentations based on literature and open access and commercial sources.
N2. Student's own works – solving experiments and tasks in laboratory as well as homework.
N3. Student's own works – literature and open access sources studies.
N5. Collective works in laboratory
N5. Student's own works – preparation of presentations and technical documentations.

EVALUATION OF SUBJECT EDUCATIONAL EFFECTS ACHIEVEMENT		
Evaluation (F – forming (during semester), P – concluding (at semester end)	Educational effect number	Way of evaluating educational effect achievement
F1 (lecture)	K2INF_W03 K2INF_W04 K2INF_W06 K2INF_U05 K2INF_U06 K2INF_U08 K2INF_K01 K2INF_K02	Observation and verification of student activity. Solving the sample jobs.
F1 – F9 (project)	K2INF_W06	Checking the preparation of the student. Checking

	K2INF_U05 K2INF_U06 K2INF_U08 K2INF_K01	the presence of the student. Observation of student activity. Observation and assessment of student autonomy.
P (lecture)	K2INF_W03 K2INF_W04 K2INF_W06 K2INF_U05 K2INF_U06 K2INF_U08 K2INF_K01 K2INF_K02	Colloquium (course credit) in the evaluation of forming F1 (lecture)
P (project)	K2INF_U05 K2INF_U06 K2INF_U08 K2INF_K01	Total weighted ratings F1 – F9 (project) and the assessment for the presentation of the final results of the project.

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

1. Knowledge of mathematics and mathematical statistics

\

SUBJECT OBJECTIVES

C1 Introduce the methods and techniques of the statistical data analysis to students
C2 Gather knowledge for Knowledge Discovery (Data Mining)
C3 Applying the gathered knowledge to drawing conclusions based on data analysis

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:
PEK_W01 student has a basic knowledge of Knowledge Discovery (Data Mining)
PEK_W02 student has a basic knowledge of statistical data analysis
PEK_W03 student is able to present differences between parametric and non-parametric tests

relating to skills:
PEK_U01 student is able to choose a proper statistical test
PEK_U02 student is able to draw conclusion from data analysis
PEK_U03 student is able to select a proper data mining method

relating to social competences:
PEK_K01 student is able to search and reuse the primary and secondary literature listed below and is able to gather the proper knowledge
PEK_K02 student understands the need for systematic and individual work in order to cover the scope of the course

PROGRAMME CONTENT

Form of classes - lecture		**Number of hours**
Lec 1	Introduction to knowledge discovery	2
Lec 2	Classification and Data Clustering	2
Lec 3	Clustering Algorithms	2
Lec 4	Statistics - basic notions	2
Lec 5	The selected problems of estimation theory	2
Lec 6	Parametric tests for one population	2
Lec 7	Non-parametric tests for one population	2
Lec 8	Parametric tests for two populations	2
Lec 9	Non-parametric tests for more than 2 populations	2
	Total hours	18

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES1

1. He has some knowledge of the production and integration of information systems acquired on the course before the lab

2.Having a basic knowledge of Weblogic application server (purely administrative - start / stop, basic operations on web console)

3. Having a basic knowledge of Java EE (EJB, JMS)
4 Knowledge and understanding of the SOA concept
5. To acquaint students with technology: webservices (in particular, SOAP, WSDL), XML (XPath, XQuery, XSD)
6. Has an understanding of ideas Oracle ServiceBus (terminology, architecture)

\

SUBJECT OBJECTIVES

C1. transfer of knowledge and acquire skills in product management processes and manufacturing systems
C2. provide knowledge and gain competence in the processes and products of the integration of information systems management in an environment of heterogeneous architectures
C3. Acquisition of skills in the selection of technical and organizational development and integration of information systems

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:

PEK-W01 – deepens the knowlage of the processes and products of manufacturing and integration of management information systems

The range of skills:

PEK_U01 – Has the ability to choose technical and organization measure enabling the production snad integration of information system

With a range of social skills:

PEK_K01 – Has the power to organizational prcesses and products development and integration of management information systems

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

5. Is able to use programming language (e.g. Java) to solve problems and develop an application.

\

SUBJECT OBJECTIVES

C1 To familiarize students with selected agile methodologies.

C2 To familiarize students with the selected practices and tools used in agile software development.

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:

PEK_W01 Has a basic knowledge which allows to name and describe selected agile methodologies and practices of software development.

PEK_W02 Has a basic knowledge which allows to name and describe sample practices or tools used in agile software development

PEK_W03 Has a basic knowledge which allows to name sample results of empirical studies on agile

software development.

…
relating to skills:
PEK_U01 Is able to solve complex engineering tasks related to installation and configuration of the software project infrastructure and software project development using selected agile methodologies, practices and tools.

PEK_U02 Is able to prepare a multimedia presentation in English related to agile methodologies, practices and tools.

PROGRAMME CONTENT

Form of classes - lecture		**Number of hours**
Lec 1	Introduction to the course.	1
Lec 2	From Nothing, to Monumental, to Agile	2
Lec 3	eXtreme Programming methodology I	2
Lec 4	eXtreme Programming methodology II	2
Lec 5	SCRUM methodology	2
Lec 6	KANBAN and SCRUMBAN methodologies	2

Proj 8	Software development iteration 4	2
	Total hours	15

Form of classes - seminar		**Number of hours**
Sem 1	Introduction, passing criteria, schedule and selection of topics.	1
Sem 2	Topic 1 is selected by students from the pool including, for example, the following ones: XP, SCRUM, KANBAN, LEAN, CRYSTAL, Test-Driven Development, Continuous Test-Driven Development, Acceptance Test-Driven Development, Behaviour-Driven Development, Pair-Programming, Continuous Delivery, narzędzia do zwinnego wytwarzania oprogramowania w Scali, narzędzia do zwinnego wytwarzania oprogramowania w Javie, narzędzia do testowania oprogramowania, programowania parami i przeglądów kodu, dobre praktyki zwinnego wytwarzania aplikacji webowych, szkielety aplikacji webowych wspierające zwinne tworzenie oprogramowania – Play framework i in.	2
Sem 3	Topic 2 is selected from the aforementioned pool of topics	2
Sem 4	Topic 3 is selected from the aforementioned pool of topics	2
Sem 5	Topic 4 is selected from the aforementioned pool of topics	2
Sem 6	Topic 5 is selected from the aforementioned pool of topics	2
Sem 7	Topic 6 is selected from the aforementioned pool of topics	2
Sem 8	Topic 7 is selected from the aforementioned pool of topics	2
	Total hours	15

TEACHING TOOLS USED

N1. Lecture

N2. The course web page with references to literature and course related stuff.

N3. Software development tools.

N4. Internet and server-side software infrastructure (e.g. versioning repository SVN or Git).

N5. Software to prepare presentations and technical reports (Latex, TeXnicCenter, PowerPoint/Beamer)

EVALUATION OF SUBJECT EDUCATIONAL EFFECTS ACHIEVEMENT

Evaluation	Educational	Way of evaluating educational effect achievement

(F – forming (during semester), P – concluding (at semester end)	effect number	
F1	PEK_U01	Assessment of the software development ecosystem (agile methodologies, practices and tools) [0…30 pkt] (Pr2-Pr4) .
F2	PEK_U01	Assessment on a basis of progress of a software project and compliance with and use of agile methodologies, practices and tools [0…80 pkt] (Pr5-Pr8).
P1 – project	PEK_U01	P1 is obtained on a basis of the points from F1…F2 in the following way (mark – points): • 5.5 – 91…110 pkt and F2=70 pkt • 5.0 – 91…110 pkt • 4.5 – 81…90 pkt • 4.0 – 71…80 pkt • 3.5 – 61…70 pkt • 3.0 – 51…60 pkt • 2.0 <=50 pkt
P2 – lecture	PEK_W01 … PEK_W03	A written test to evaluate knowledge covered in lectures. A positive mark is given if student obtains at least 50% of the points possible to achieve.
P3 – seminar	PEK_U01, PEK_U02	P3 is based on how well a presentation has been conducted (e.g. clearly defined goals of presentation or benefits for the listeners, communication, presentation content, level of details, examples, timing, presentation flow - order of topics, capturing audience / listeners involvement). Given mark may be changed due to active discussions and creative contributions during seminars or (after an agreement with a lecturer) a detailed report or tutorial on a given topic.
P – final mark	PEK_W01… 03, PEK_U01… 02	P is based on the following equation: P=(P2+2*P1+P3)/4 if and only if P1 is positive. Otherwise P=2.0.

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

1. Knowledge and skills in the area of programming.
2. Basic knowledge from the domain of Artificial Intelligence
3. Ability to read with understanding scientific and technical texts in English.

\

SUBJECT OBJECTIVES

C1 To make students aware of possibilities for utilising Natural Language as a tool for communication and storing of information in the computer system.
C2 To present ways of applying Language Technology in information systems.
C3 To familiarise students with types of language tools and resources and their accessibility with focus on Polish Language Technology.
C4 Students have acquired basic skills in formalised description of the natural language and construction of intelligent systems processing natural language utterances.

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:

PEK_W01 A student have basic knowledge from the area of formal description of the natural language.

PEK_W02 A student knows methods of the construction of systems processing natural language utterances.

PEK_W03 A student knows Basic language resources and tools and the extent to chich they can be used in an information system.

PEK_W04 A student is familiar with the contemporary state of language technology for Polish and English.

…

relating to skills:

PEK_U01 A student is able to apply natural language engineering methods during construction of intelligent Information Retrieval systems and practical Information Extraction systems.

PEK_U02 A student knows proficiently different types of language tools, their availability and

PEK_U03 A student is able to combine basic language resources and tools in an appropriate workflow for the natural language processing.

PEK_U04 A student have basic skills in the area of formal description of the natural language and construction of intelligent systems for processing natural language utterances.

PEK_U05 A student knows how to find in internet information concerning the present state of the Polish and English language technology.

…

relating to social competences:

PEK_K01 A student is able to explain importance of the language technology for the construction of computer systems.

PEK_K02 A student is able to select and organise an interdisciplinary team for the construction of a system processing natural language.

PROGRAMME CONTENT

	Form of classes - lecture	**Number of**
Lec 1	Computational Linguistics bases: a natural language as a tool for communication, basic levels of the natural language decription, use formal models for the description of the natural language. Typical phases in natural language processing. Notions of language resources and language tools. Overview of natural language engineering applications.	2
Lec 2	Text tokenisation and segmentation; Morphosyntactic analysis: morphological analysers, transducers, description disambiguation, construction and applications of taggers.	2
Lec 3	Syntactic analysis: different grammar formalisms and their use, deep vs shallow	2

	analysis, construction of parsers.	
Lec 4	Shallow semantic analysis – an analysis performer on the level of semantic features, e.g. Information Extraction, Dialogue Systems or automatem summarisation; representation of lexical meaning (senses), Word Sense Disambiguation, Discourse Analisys.	2
Lec 5	Selected applications of Natural Language Engineering in: Information Retrieval, Information Extraction, Question Anwering and multilingual versions of those systems.	1
	Total hours	9

Form of classes - class		**Number of hours**
Cl 1		
Cl 2		
Cl 3		
Cl 4		
..		
	Total hours	

Form of classes - laboratory		**Number of hours**
Pr1	Choice of the project topic and its specification.	2
Pr2	Literature overview and becoming familiar with the necessary theoretical bases.	2
Pr3	Choice of methods to be used in implementation.	2
Pr4	Selecting necessary programming tools and components and language tools and resources.	2
Pr5	Installing selected programming components combined, becoming aware about their applications, integration of components with the developers environment, adaptation of language technology elements to the specific problem.	2
Pr6	Implementation.	2
Pr7	Collecting data necessary for research and experiments.	2
Pr8	Performing experiments and optimising parameters of the selected methods.	2
Pr9	Preparation of the final report.	2
	Total hours	**18**

Form of classes - project		**Number of hours**
Proj 1		
Proj 2		
Proj 3		
Proj 4		
...		

	Total hours	
Form of classes - seminar		**Number of hours**
Sem 1		
Sem 2		
Sem 3		
…		
	Total hours	

TEACHING TOOLS USED

N1. Textbooks

N2. Electronic materials on selected Web pages and Internet portals.

N3. Available language resources and tools for Polish.

N4 Language resources and tools, general architectures for natural language processing that are available on the selected Web pages.

N5 Electronic materials for the lecture and Project that are Publisher on the e-learning portal of the Faculty of Computer Science and Management.

EVALUATION OF SUBJECT EDUCATIONAL EFFECTS ACHIEVEMENT

Evaluation (F – forming (during semester), P – concluding (at semester end)	Educational effect number	Way of evaluating educational effect achievement
F1 Evaluation of project preparatory phase	PEK_U02, PEK_U03, PEK_U05	A student delivers a report which is evaluated.
F2 Evaluation of the system construction	PEK_U01, PEK_U04	A student delivers a report which is evaluated.
F3 Complex evaluation of the system and results of experiments	PEK_U01- PEK_U05 and PEK_K01 and PEK_K02	A student presents the achieved results and delivers the final report chich is evaluated.
C final test – effects PEK_W01- PEK_W04

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

10. Practice in object-oriented programming.
11. Basic knowledge of software engineering.

\

SUBJECT OBJECTIVES

C1. Basic knowledge in the area of software system modeling with the stress on business modeling as the initial phase of the software development process.
C2. Basic knowledge in the area of the requirements specification.

SUBJECT EDUCATIONAL EFFECTS

Relating to knowledge:
PEK_W01: Students have basic knowledge on business modeling.
PEK_W02: Students know and understand the role of specification requirements.
PEK_W03: Students have basic knowledge on selected modeling languages.

Relating to skills:
PEK_U01: Students, in cooperation with domain experts, can construct and analyze business models.
PEK_U02: Students can build models of system requirements.

Relating to social competences:
PEK_K01: Students are able to cooperate with representatives of application domain.

PROGRAMME CONTENT		
Form of classes - lecture		**Number of hours**
Lec 1	Basic notions for software development cycle. Survey of modeling languages – UML and BPMN.	1
Lec 2	Class diagrams – classes, associations, generalizations.	2
Lec 3	Object Constraint Language.	2
Lec 4	BPMN process diagrams.	2
Lec 5	System requirements; use case diagrams.	2
	Total hours	9

Form of classes - class		Number of hours
Cl 1	Analysis of textual descriptions of exemplary application domains – structural aspect.	2
Cl 2	Construction and analysis of class diagrams.	2
Cl 3	Construction and analysis of class diagrams.	2
Cl 4	Construction and analysis of OCL constraints imposed on diagrams.	2
Cl 5	Case study – an example of structural modeling.	2
Cl 6	Test 1.	1
Cl 7	Construction and analysis of simple BPMN process diagrams.	2
Cl 8	Construction and analysis of advanced BPMN process diagrams.	2
Cl 9	Construction and analysis of use case diagrams.	2
Cl 10	Test 2.	1
	Total hours	18

TEACHING TOOLS USED

N1. Lecturer's presentation at a blackboard, supported by a multimedia presentation using a laptop and a projector.
N2. Individual search and study of literature and Internet sources.
N3. Access to teaching materials published in the local area network.
N4. Individual consultations.

EVALUATION OF SUBJECT EDUCATIONAL EFFECTS ACHIEVEMENT

Evaluation (F – forming (during semester), P – concluding (at semester end)	Educational effect number	Way of evaluating educational effect achievement
F1	PEK_W01 PEK_U01 PEK_K01	Each student gets 1 point for own solution of a problem from the list of problems for the given class.
F2	PEK_W01 PEK_W02 PEK_U01 PEK_U02 PEK_K01	Each student gets up to 10 points for own solution of problems for the given test (intermediate and final).
F3	PEK_W01 PEK_W02 PEK_W03 PEK_U01 PEK_U02 PEK_K01	The final evaluation for the classes is determined on the basis of total marks obtained by the student's activity for exercise (F1) and colloquia (F2). Positive mark is awarded to a student who has obtained at least 4 points for each of the symposia and has won a total of 10 points. If this condition is met, the number of points P is the basis for evaluation in accordance with the following table: P | 10 | 12 | 14 | 16 | 18

		<table><tr><td>Mark</td><td>3.0</td><td>3.5</td><td>4.0</td><td>4.5</td><td>5.0</td></tr></table> Students who get at least a very good grade are exempt from the examination with the same mark as for the classes.

C: The final evaluation of the course is determined based on the results of the examination. The examination lasts two hours and consists of a set of tasks, the total number of 20 points. The condition for a positive assessment of the final exam is to get 10 points and a positive final evaluation of the exercise.
The final evaluation of the examination is determined in accordance with the following table:

Points	10	12	14	16	18
Mark	3.0	3.5	4.0	4.5	5.0

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

1. K1INF_U02; K1INF_U03 skills in coding at any high programming language 2.K1INF_W01 fundamental knowledge in differential calculus and matrices

\

SUBJECT OBJECTIVES

C1 Presentation of new neural networks, their training methods and applications.

C2 Teaching practical application of new neural network paradigms.

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:

PEK_W01 Knowledge of new models of neural network presented during lecture

PEK_W02 Knowledge of application specificity of the soft computing methods

relating to skills:

PEK_U01 Is able to choose appropriate neural network model to the considered problem.

PEK_U02 Can design ad implement application using assumed model neural network

PEK_U03 Is able to plan and conduct experiments testing efficiency of applied neural network

PEK_U04 Is able to prepare result analysis and to write a report from the project.

relating to social competences:

PROGRAMME CONTENT

	Form of classes - lecture	**Number of**
Lec	Introduction. Description of the course content, its organization and instructions	2

1	concerning exams procedure and grading scheme for the project. Boltzmann Machine	
Lec 2	Deep belief networks	2
Lec 3	Pulsed networks – neuron model, Network architecture , encoding information	2
Lec 4	Neocognitron, convolutional neural network	2
Lec5	Test	1
	Total hours	9

N2. Design specification needed to the project

N3. Design document template

N4. e-learning system applied for publication of dydatic materials

EVALUATION OF SUBJECT EDUCATIONAL EFFECTS ACHIEVEMENT

Evaluation (F – forming (during semester), P – concluding (at semester end)	Educational effect number	Way of evaluating educational effect achievement
F1– Delivery of Project declaration with formulated subject of the first project	PEK_U01	Every week of unjustified delay in delivering project declaration results in grade reduction in course grade
F2 – Presentation of partial results of the project	PEK_U02	Assessed are: Correctness of the task formulation , assumptions the scheme of coding input and output information and the current progress of the project. The way of presentation is also evaluated. The grade scale 1-10.
F3 – Report from the implementation of the project	PEK_U03, PEK_U04	Appraisal refers to the way of problem solution, experiment quality, the experiment documentation and the project report (structure, theoretical introduction and bibliography). The grade scale 1-10.
P1 – the final grade for project	PEK_U01 PEK_U02 PEK_U03 PEK_U04	The final number of points is calculated according to the following formulae P1=0.4 F2+ 0.6 F3, The final grade is calculated on the base of the number of points in the following way: <50%, 60%) → dst

		<60%, 70%) → dst+ <70%, 80%) → db <80%, 90%) → db+ <90%, → bdb Remark: the final grade is reduced by half of a grade for each week of unjustified delay of a declaration or a report
P2 – the final grade for the lecture	PEK_W01, PEK_W02	The test consists of open questions with given number of points. The sum of points is translated to the grades as follows: <50%, 60%) → dst <60%, 70%) → dst+ <70%, 80%) → db <80%, 90%) → db+ <90%, → bdb

\

SUBJECT OBJECTIVES

C1 Presentation of various soft computing approaches applied in modeling systems with imprecise, uncertain, rough and incomplete information

C2 Teaching how to solve problems containing imprecise, uncertain, rough and incomplete information using soft computing techniques.

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:

PEK_W01 Knows theoretical basics and general principles of soft computing techniques.

relating to skills:

Is able to choose appropriate soft computing method for a considered problem

PEK_U02 Has a way with design and implementation of application using soft computing technique.

PEK_U03 Is able to plan and conduct experiments testing accuracy of the applied method

PEK_U04 Is able to prepare result analysis and to write a report from the experiments

PROGRAMME CONTENT

Form of classes - lecture	**Number of**

Lec 1	Official guidelines and instructions referring to the course: description of the course content, its organization and instructions concerning exams procedure and grading scheme for the project. Introduction to the course and to basic concepts.	2
Lec 2	Introduction to evolutionary methods – evolutionary programming , evolutionary strategies and differentia evolution	2
Lec 3	Neural computation – basic concepts and examples of applications	2
Lec 4	Immune systems	2
Lec 5	Ant systems	2
Lec 6	Particle swarm intelligence	2
Lec 7	New nature based algorithms (bee, coocoo algorithm, weed algorithm, bat algorithm and others)	2
Lec 8	Fuzzy logic and fuzzy sets type 2	2
Lec 9	Probabilistic approaches	2
	Total hours	18

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

1. K1INF_W15
2. K1INF_U16
3. Is familiar with SUBJECT EDUCATIONAL EFFECTS of the course Machine Learning

\

SUBJECT OBJECTIVES

C1: To familiarize students with the process of knowledge acquiring from data
C2: Understanding the techniques used at various stages of the process of knowledge acquiring.
C2: The acquisition of an ability to select appropriate techniques and validation methods for a given task.

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:
PEK_W01: Student knows the approach used in the knowledge acquisition from data of different types, for different tasks.
PEK_W02: Student knows the potential applications of knowledge acquisition techniques.
PEK_W03: Student has detailed knowledge of how the validate of acquired knowledge.
…
relating to skills:
PEK_U01: Can point to learn the right technique for the job.
PEK_U02: Can transmit knowledge in an interesting and understandable way for the audience.
…
relating to social competences:
PEK_K01: Can work in a team.
PEK_K02: Can find the necessary knowledge.

Proj 4		
…		
	Total hours	

Form of classes - seminar		Number of hours
Sem 1	Organizational lecture. Discussion of the course and the requirements. The allocation of tasks to students. Discussion on the field of KDD (Knowledge Data Discovery), tasks and role in the modern world.	2
Sem 2	Association rules generation - methods, applications	2
Sem 3	Outlier detection – methods, applications	2
Sem 4	Data visualization as a Data Mining technique	2
Sem 5	Active learning – approaches, techniques, - application examples	2
Sem 69	*Image annotation* as a DM task	2
Sem 7	DM techniques in Management	2
Sem 8	Soft computing techniques in data mining	2
Sem 9	Measures of evaluation of acquired knowledge.	2
	Total hours	18

TEACHING TOOLS USED
N1. Discussion of topics supported by multimedia presentations. N2. E-learning system used for the publication of teaching materials.

EVALUATION OF SUBJECT EDUCATIONAL EFFECTS ACHIEVEMENT

Evaluation (F – forming (during semester),	Educational effect number	Way of evaluating educational

P – concluding (at semester end)		effect achievement
F1 - Content - related evaluation of the student's presentations	PEK_W01; PEK_W02; PEK_W03; PEK_K02;	The presentation should contain new elements, the student must understand the transmitted knowledge. Evaluation of the mater according to the current scale of assessments.
F2 - Assessment of the quality of presentation	PEK_W01; PEK_W02; PEK_W03; PEK_U02;	Evaluation of transparency prepared presentation, selection of appropriate issues for the given subject. Evaluation of way of presenting, contact with the audience, the pace of the presentation. Grade F2 is the arithmetic mean of the quality of the presentation and the quality of its conduct.
F3 - Evaluation of the students' activity in the classroom	PEK_W01; PEK_W02; PEK_W03; PEK_U01; PEK_U02; PEK_K01;	For the activity a student can receive points: 0 - inactive, passive listener; 1 - Active or 2 - outstanding activity. Up to 30 points can be achieved. The unjustified absence deducts two points, justified - one point. Rating F3 depends on the number of accumulated points: = <15 points: 2.0; 16-18 points: 3.0; 19-21 points: 3.5; 22-24 points: 4.0; 25-27 points: 4.5 28-30 points: 5.0
P1 – Final grade Sem	PEK_W01; PEK_W02; PEK_W03; PEK_U01; PEK_U02; PEK_K01; PEK_K02;	Final grade is an average of F1 – F3
C		

PRIMARY AND SECONDARY LITERATURE

PRIMARY LITERATURE:

[1] Scientific publications indicated by the teacher, mainly articles from scientific journals. For each topic will be designated primary literature, modified annually, so that was correct. Will be promoted independence in searching the literature not older than 3 years.

[2]

SECONDARY LITERATURE:

[1] An extensive collection of electronic resources - scientific publications - supplied by the lecturer of the seminar.

[2]

	Total hours	

Form of classes – project		**Number of hours**
Proj 1	Subject is the main component of the process of realization the master thesis and involves the preparation by the student his master thesis. Master thesis is done under the direction of his supervisor, with whom student defines its scope, goals, tasks and timetable for implementation.	
	Total hours	

Form of classes - seminar		**Number of hours**
Sem 1		
Sem 2		
	Total hours	

TEACHING TOOLS USED

N1. Preparation of master thesis N2. The text of the master thesis N3. Thesis review prepared by the supervisor N4. Students consultation with supervisor

EVALUATION OF SUBJECT EDUCATIONAL EFFECTS ACHIEVEMENT

Evaluation (F – forming (during semester), P – concluding (at semester end)	Educational effect number	Way of evaluating educational effect achievement
P	PEK_U01	The student chooses a subject of master thesis and thesis supervisor in accordance to local regulations. The supervisor is responsible for continuous monitoring of the progress of thesis realization. Assessed is the final text of the diploma thesis. The assessment is carried out in the form of a review done by the promoter. The condition to pass the course is delivering the final text of master thesis before the defined deadline. The second review, which does not, however the condition for pass the course is done by the reviewer appointed by the Faculty Dean. Reviews are made according to the standard format. The student is admitted to the defense (final exam) if both reviews are positive

PRIMARY AND SECONDARY LITERATURE

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

6. Basic knowledge related to distributed and parallel systems.
7. Programming skills in C/C++ language.

\

SUBJECT OBJECTIVES

C1 Acquainting students with techniques of parallel programming.
C2 Acquainting students with the basic parallel algorithms.
C3 Acquainting students with chosen parallel and distributed environments.
C4 Acquisition of the ability to write parallel programs.
C5 Acquisition of the ability to use different parallel and distributed execution Environments.
C6 Acquisition of skills to plan and conduct simple computer experiments.

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:
PEK_W01 He knows basic techniques of parallel processing.
PEK_W02 He knows basic parallel algorithms
PEK_W03 He knows chosen parallel and distributed execution environments.

relating to skills:
PEK_U01 He is able to write parallel programs.
PEK_U02 He is able to write programs under different parallel distributed environment.
PEK_U03 He is able to use chosen parallel and distributed execution environment.

PROGRAMME CONTENT

Form of classes - lecture		Number of hours
Lec 1	Parallel programming languages, shared-memory and distributed memory programming paradigms, data and algorithm parallelism basic performance metrics. Amdhal and Gustafson Laws.	1
Lec 2	Static and dynamic interconnection networks - typical topologies. Communication in distributed systems – algorithms of collective communication. MPI standard - message passing communication basic concepts. An example of simple parallel algorithm.	2
Lec 3	Parallel algorithms: matrix multiplication, sorting and search.	2
Lec 4	Architecture and programming of GPU. Programming in CUDA environment. Multicore processor programming.	2
Lec 5	Automatic parallelizm detection – dependencies types, parallelism identification, loop parallelization, vectorization. Parallel and distributed processing environments: shared memory parallel processing, message passing and client-server models.	2
	Total hours	9

Form of classes - class		Number of hours
Cl 1		
	Total hours	

Form of classes - laboratory		Number of hours
Lab1	Presentation of lab scope, presentation of grading principles, training from health and safety at work. Familiarization with used at laboratory MPI	2

	environment.	
Lab2	Testing execution environment, running simple programs that implement communication between two processors in MPI environment.	2
Lab3	Implementation of simple parallel algorithm that uses collective communication in MPI environment.	2
Lab4	Implementation of chosen parallel algorithm, carrying out the tests for different data, calculation of speedup.	2
Lab5	Familiarization with CUDA environment, running simple programs.	2
Lab6	Implementation of chosen algorithm with data parallelism in CUDA environment, calculation of speedup.	2
Lab7	Implementation of an example algorithm from Artificial Intelligence scope using chosen execution environment (MPI, CUDA).	2
Lab 8	Carrying out the tests of implemented algorithm, calculation of speedup, scalability analysis.	2
Lab 9	Presentation results of experiments performed during lab 8.	2
	Total hours	18

Form of classes - project		**Number of hours**
Proj1		
	Total hours	

Form of classes - seminar		**Number of hours**
Sem1		
	Total hours	

TEACHING TOOLS USED

N1. Lecture supported by multimedia presentations (slideshow)
N2. Cluster of computers running under MPI
N3. GPU server that uses NVIDIA graphics cards - CUDA environment.

EVALUATION OF SUBJECT EDUCATIONAL EFFECTS ACHIEVEMENT

Evaluation(F – forming (during semester), P – concluding (at semester end)	Educational effect number	Way of evaluating educational effect achievement
F1 – (lecture)	PEK_W01 PEK_W02 PEK_W03	Test and quizzes during the lecture, student activity during the lecture, students answering on questions during lecture.
F2 – (laboratory)	PEK_U01 PEK_U02 PEK_U03	Checking of student preparation for exercise realization, assessment of reports from exercises. Evaluation of the quality of submitted by students programs (points allocated).
P - the final grade from lecture will be issued on the basic of partial grades (points) received from the test (T) and quizzes (Q) as follows: Grade = 20% * Q + 80% *T. The final grade from the laboratory will be issued on the basis of partial grades (points) obtained from all exercises.

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

1 Knowledge, skills and competences acquired at Informatics field at second level of study until 3th semester

\

SUBJECT OBJECTIVES

C1 Preparing students to write a master thesis according the internal requirements in Informatics field at Faculty of Computer Science and Management, Wrocław University of Technology,
C2 Providing students with basic skills related to preparation and presentation of scientific texts, beginning from the choice of topic, selection of tasks to be performed, use of literature to interpretation of the results.

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:
…
relating to skills:
PEK_U01 He is able to acquire information from literature, databases and other sources, also in English or other language used for communication in Informatics field, is able to integrate the information obtained, interpret them, make critical evaluation and also draw conclusions and formulate and justify opinions related to prepared master thesis.
PEK_U02 He can communicate using a variety of techniques in his professional environment and in other environments, also in English or other foreign language used for communication in Informatics field and also to present the results of his master thesis
relating to social competences:
…

Proj 2		
	Total hours	

Form of classes - seminar		Number of hours
Sem 1	Familiarization with the principles of master thesis realization at Informatics field. Rules related to student presentations. Determining the schedule of student presentations.	2
Sem 2	Review of basic skills related to preparation and presentation of scientific texts by students, beginning from the choice of topic, selection of tasks to be performed, use of literature and also how to write thesis and how obtained results should be interpret.	2
Sem 3 – Sem15	During semester each student has 2 presentations. The first presentation is related to the general view of the thesis topic, its placement in the literature and in the Informatics field. The student should present the primary aim of thesis, the state of art related to thesis topic, the concept of solution, the initial structure of thesis and timetable for further work. The purpose of the second presentation is preparation to defense and demonstrate presentation skills in English. The second presentation consists of two parts, namely, discussion of the results of the work in English and a short presentation in Polish devoted to the results of the thesis.	14
	Total hours	18

TEACHING TOOLS USED
N1. Multimedia presentations N2. Examples of scientific papers and reports from the field of computer science. N3. E-Learning System used to publish teaching materials and announcements, also used for collection and evaluation of student work.

EVALUATION OF SUBJECT EDUCATIONAL EFFECTS ACHIEVEMENT

Evaluation (F – forming (during semester), P – concluding (at semester end)	Educational effect number	Way of evaluating educational effect achievement
P	PEK_U01 PEK_U02	Evaluation of the presentation of the work at the seminar and prepared documentation from the presentation. The evaluation shall be subject to the fulfillment of the requirements for the presentation, including its substantive scope, structure and organization of presentation, techniques of conversation, a form of presentation, compactness of presentation and conclusions reached. Participation in the discussions after presentation is

		also evaluated. In addition, the seminar leader is able to control the cooperation between supervisors and graduate students.

PRIMARY AND SECONDARY LITERATURE

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

1. Basic mathematical knowledge for 1st level of studies.

2. Informatics knowledge background.
3. Algorithms knowledge background.

\

SUBJECT OBJECTIVES

C1 Acquiring knowledge about functions and significance of information systems in contemporary organizations
C2 Acquainting with the functions and development of information systems in information society
C3 Acquainting with the different methods of information retrieval by surfing the Web
C4 Recognizing the problems of passing of contemporary organizations to Internet space
C5 Obtainment of skills to analyze the literature from information systems area and to synthesize the contents from different sources
C6 Application of the obtained knowledge to presentation the problems from information systems area by means of using adequate tools

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:
PEK_W01 Familiarity with basic models of information systems
PEK_W02 Basic knowledge about Web information systems
PEK_W03 Familiarity with common multimedia technologies
PEK_W04 Understanding of the measures of information retrieval efficiency

relating to skills:
PEK_U01 Student can to build information query for different types of information needs
PEK_U02 Can to determine basic features of information system for given organization
PEK_U03Student be able to evaluate the precision of retrieved information
PEK_U04 Can to present basic features of given information system

relating to social competences:
PEK_K01 Can individually to use literature of the subject and to select useful information
PEK_K02 Student is convinced above positive role of information systems in stimulation of the civilization development

PROGRAMME CONTENT

	Form of classes - lecture	**Number of hours**
Lec 1	History of information systems development. Information processing. Theoretical basis of information systems. Automation of information flow in organization.	2
Lec 2	Functioning of information systems in computer networks. Information retrieval. Digital libraries.	2
Lec 3	Multimedia. Importance of multimedia technologies in information systems development. How societies embrace information technology.	2
Lec 4	Efficiency of information systems. Case study of chosen information system.	2
Lec 5	Test	1

\

SUBJECT OBJECTIVES

C1: To familiarize students with the different approaches and methods used in machine learning tasks.
C2: The acquisition of an ability to select the appropriate method for the task.
C2: The acquisition of skills to assess the suitability of a learned computer system to solve practical tasks.

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:
PEK_W01: Student has knowledge of the approaches and methods of machine learning.
PEK_W02: Student knows the potential use of different methods.
PEK_W03: Student knows the data pre-processing methods and selection of attributes.
PEK_W04: Student knows validation methods of learned systems.
PEK_W05: Student knows the environment containing the selected machine learning methods.

relating to skills:
PEK_U01: Student can choose the right method of learning for a give task.
PEK_U02: Student can design and implement application - learning system.
PEK_U03: Student is able to plan and carry out experiments examining the effectiveness of the methods used and their usefulness.
PEK_U04: Student can analyze the results and prepare a report on the experiments.
PEK_U05: Student can practically use the selected environments: Weka and R.
…
relating to social competences:
PEK_K01
PEK_K02

PROGRAMME CONTENT

Form of classes - lecture		**Number of hours**
Lec 1	Introduction to the course - requirements. Basic concepts, types of learning.	2
Lec 2	Transformation and selection of attributes.	2
Lec 3	Induction of rules, covering sequential approach, algorithms AQ, CN2, ILA.	2
Lec 4	Unsupervised Learning: clustering, hierarchical clustering, grouping in subspaces.	2
Lec 5	Ensemble of classifiers, and clustering ensemble.	2
Lec 6	Computational Learning Theory.	2
Lec 7	Statistical Learning - selected methods.	2
Lec 8	Reinforcement Learning.	2
Lec 9	Case Based Reasoning.	2
	Total hours	18

Form of classes - class		**Number of hours**
Cl 1		
Cl 2		
Cl 3		
Cl 4

TEACHING TOOLS USED
N1. Lecture supported by multimedia presentations N2. Specifications documentation required for completion of tasks in the laboratory N3. E-learning system used for the publication of teaching materials and equipment, and documentation of laboratory tasks

EVALUATION OF SUBJECT EDUCATIONAL EFFECTS ACHIEVEMENT

Evaluation (F – forming (during semester), P – concluding (at semester end)	Educational effect number	Way of evaluating educational effect achievement
F1 - Presentation of the first task	PEK_W01; PEK_W05; PEK_W01; PEK_U05; PEK_U03; PEK_U04;	The task is worth 10 points. The delay in the implementation of the tasks will punished by deduction of 20% of the points per week. The implementation of an exercise lies on learning a given subject and the algorithm, follow the instruction of the exercise. Student creates a report describing the algorithm, used data, and research methodology course, common problems, conclusions and summary. The report is released in the electronic form.

F2 - Presentation of the 2nd task	PEK_W01; PEK_U02; PEK_U03; PEK_U04;	As above
F3 - Presentation of the 3rd task	PEK_W01; PEK_W03; PEK_U02; PEK_U03; PEK_U04	As above
F4- Presentation of the 4th task	PEK_W01; PEK_W03; PEK_W05; PEK_U05; PEK_U03; PEK_U04;	As above
P1 – Final grade - lab	PEK_U01; PEK_U02; PEK_U03; PEK_U04; PEK_U01;	The final evaluation will be issued in accordance with the following scale: 0 - 29 : grade 2 30 - 34 : grade 3 35 - 40 : grade 3+ 41 - 45 : grade 4 45 - 50 : grade 4+ 51 - 60 :grade 5 Are allowed two absences (without giving their reasons). 3 or more absences (for whatever reason) results in the lack of assessment of the laboratory
P2 – final grade - lecture	PEK_W01; PEK_W02; PEK_W03; PEK_W04; PEK_W05; PEK_U01; PEK_K01	It is a written exam, checking knowledge of the lecture. It consists of open-ended questions. The assessment should be sufficient to obtain 50% of all possible points, plus one point. [0%,50%): grade 2 [50%, 60%): grade 3 [60%, 70%): grade 3 + [70%, 80%): grade 4 [80%, 90%): grade 4+ [90%, 100%]: grade 5

None.

\

SUBJECT OBJECTIVES

C1 Getting to know foundations of designing computer science decision support systems using general systemic methods which make it possible to apply unified approaches for analysis and decision making for decision support systems of different nature.
C2 Acquisition of skills to represent in the form of mathematical formulas of decision making plants treated as input-output plants.
C3 Acquisition of skills to analyze of decision making plants treated as input-output plants.
C4 Getting acquainted with methods and algorithms of multi-stage decision making.
C5 Acquisition of skills to apply dynamic programming method.
C6 Getting to know metods and algorithms of multi-criteria decision making.
C7 Acquisition of skills to use AHP method.

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:
PEK_W01 Student knows foundations of designing of decision support systems for any kind of plants.
PEK_W02 Student knows foundations of analysis and decision making for input-output plants with logic knowledge representation.
PEK_W03 Student knows selected method of multi-stage and multi-criteria decision making.
relating to skills:
PEK_U01 Student is able to elaborate a mathematical model for an input-output decision making plant in discrete state space as well as with logic knowledge representation.
PEK_U02 Student can solve analysis and decision making tasks for elementary plants with logic knowledge representation.
PEK_U03 Student is able to solve multi-stage decision making problem using Bellman's Principle and dynamic programming.
PEK_U04 Student can use AHP algorithm for the solution od multi-criteria decision making problem
relating to social competences:
PEK_K01 Student can take advantage of professional literature by oneself and can perform the critical analysis of information mined.
PEK_K02 Student can think creatively.

PROGRAMME CONTENT

Form of classes - lecture		**Number of hours**
Lec 1	Decision support systems – definitions, structures, problems, application of discrete state equations and logic expressions for representation of decision making plants.	2

Lec 2	Outline of logic-algebraic method and its application to solution of analysis and decision making for input-output decision making plants.	2
Lec 3	Decision making – definition, typology, logic-algebraic plant, Bellman's Principle and multi-stage decision making.	2
Lec 4	Multi-criteria decision making – Pareto sets, AHP method.	2
Lec 5	Examples of computer decision support systems.	1
	Total hours	9

Form of classes - class		**Number of hours**
Cl 1	Solution of numerical exercises concerning difference equations as well as propositional calculus.	2
Cl 2	Solution of numerical exercises concerning mathematical representations of input-output plants.	2
Cl 3	Solution of numerical exercises concerning analysis and decision making using logic-algebraic method.	2
Cl 4	Solution of numerical exercises concerning dynamic programming and AHP method.	2
Cl 5	Final test.	1
	Total hours	9

Form of classes - laboratory		**Number of hours**
Lab 1		
Lab 2		
Lab 3		
Lab 4		
Lab 5		
…		
	Total hours	

Form of classes - project		**Number of hours**
Proj 1	Collecting of indispensable information about selected plant being the decision making plant.	2
Proj 2	Determination of mathematical model of selected decision making plant and decision making problem formulation as well as analysis of decision making plant using its mathematical model.	2
Proj 3	Choice of decision making method for further usage as well as elaboration of decision making algorithm.	2
Proj 4	Implementation and analysis of decision making algorithm.	2
Proj 5	Elaboration of conclusions and written report of the project performed.	1
	Total hours	9

Form of classes - seminar		**Number of hours**
Sem 1		
Sem 2		
Sem 3		
…		
	Total hours	

TEACHING TOOLS USED
N1 Lecture – traditional method. N2 Classes – traditional method. N3 Consultation. N4 Individual discussion with student. N5 Short test (10 mins.). N6 Self-contained work.

EVALUATION OF SUBJECT EDUCATIONAL EFFECTS ACHIEVEMENT

Evaluation (F – forming (during semester), P – concluding (at semester end)	Educational effect number	Way of evaluating educational effect achievement
F1	PEK_W02; PEK_W03; PEK_U01–PEK_U04	Short tests during the classes.
F2	PEK_K01– PEK_K02	Individual discussion with student during the project.
P (Classes)	PEK_W02; PEK_W03; PEK_U01–PEK_U04	Test.
P (Project)	PEK_U01–PEK_U04; PEK_K01–PEK_K02	Evaluation of written report of the project.
P (Lecture)	PEK_W01–PEK_W03; PEK_K02	Exam.

SUBJECT OBJECTIVES

C1: Teaching students with creative problem solving.
C2: To familiarize students with the existing blockades of thought and ways to bypass them.
C3: To familiarize students with selected creative problem solving techniques.
C4: The acquisition of creative skills, group problem solving.

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:
PEK_W01: Understand the process of problem solving
PEK_W02: Students know creative techniques of problem solving
…
relating to skills:
PEK_U01: Can interact in a group to a creative solution to the problem.
PEK_U02: Can transmit knowledge in an interesting and understandable way for the audience.
…
relating to social competences:
PEK_K01: Can work in a team.
PEK_K02: Can find the necessary knowledge.
PEK_K03: It is open to the ideas of others.

PROGRAMME CONTENT

Form of classes - lecture		**Number of hours**
Lec 1		
Lec 2		
Lec 3		
Lec 4

..		
	Total hours	

Form of classes - laboratory		Number of hours
Lab 1		
Lab 2		
Lab 3		
Lab 4		
Lab 5		
…		
	Total hours	

Form of classes - project		Number of hours
Proj 1		
Proj 2		
Proj 3		
Proj 4		
…		
	Total hours	

Form of classes - seminar		Number of hours
Sem 1	Organizational lecture. Discussion of the course and the requirements. The allocation of tasks to students. Discussion about what is creative thinking. Exercise for 'open mind'.	2
Sem 2	Gestalt principles of perception	2
Sem 3	Well and ill defined problems. Problem solving. Influence of the problem representation on the difficulty of solving.	2
Sem 4	Brainstorming.	2
Sem 5	Morphological analysis.	2
Sem 6	Synectics.	2
Sem 7	6 hats.	2
Sem 8	Do It.	2
Sem 9	Technique proposed by students. The discussion on the effectiveness of various techniques practiced.	2
	Total hours	18

TEACHING TOOLS USED
N1. Presentations are supported by projector (multimedia presentations). N2. E-learning system used for the publication of teaching materials, and documentation of presentations. N3. Workshops - exercise of use selected creative problem solving techniques.

EVALUATION OF SUBJECT EDUCATIONAL EFFECTS ACHIEVEMENT

Evaluation (F – forming (during semester), P – concluding (at semester end)	Educational effect number	Way of evaluating educational effect achievement
F1- Content - related evaluation of the student's presentations	PEK_W01; PEK_W02;	Evaluation of the content matter, completeness of the knowledge. Student must understand the transmitted knowledge.
F2 - Evaluation of the way of presentation and/or conduct sessions/workshops that use considered technique to creatively solve the chosen problem.	PEK_W01; PEK_W02; PEK_U01; PEK_U02;	Evaluation of the adequate problem selection, preparation of the group to the session, a leader of the group.
F3 - Evaluation of the students' activity in the classroom		For the activity a student can receive points: 0 - inactive, passive listener; 1 - Active or 2 - outstanding activity. Up to 30 points can be achieved. The unjustified absence deducts two points, justified - one point. Rating F3 depends on the number of accumulated points: = <15 points: 2.0; 16-18 points: 3.0; 19-21 points: 3.5; 22-24 points: 4.0; 25-27 points: 4.5 28-30 points: 5.0
P1 – Final grade Sem		Final grade is an average of F1 – F3
C		

PRIMARY AND SECONDARY LITERATURE

PRIMARY LITERATURE:

[1] Scientific publications indicated by the teacher, mainly articles from scientific journals. For each topic will be designated primary literature, modified annually, so that was correct. Will be promoted independence in searching the literature not older than 3 years.
[2]

SECONDARY LITERATURE:

[1] An extensive collection of electronic resources - scientific publications - supplied by the lecturer of the seminar.
[2]

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

13. Has a basic knowledge of ICT systems and computer communication networks (K1INF_W11).
14. Knows the basic methods and tools for collecting, processing and retrieval of information and knowledge extraction (K1INF_W16)
15. Can use the right tools to build a simple model of the process (the object), to formulate specific task analysis and decision making (K1INF_U15)
16. Can effectively use the methods and tools for collecting, processing and retrieval of information and knowledge extraction (K1INF_U16)
17. It has the ability to self-education, including in order to improve the professional competence (K1INF_U05)
18. Understands the need and knows the possibility of lifelong learning and to improve their professional and social competences (K1INF_K01)

SUBJECT OBJECTIVES

C1. Ordered, underpinned by theoretical knowledge of methods and techniques for transmitting signals using different modulation techniques, methods and techniques of information transmission, methods of organization and management of data communications traffic in the tasks of design and analysis of communication systems, methods of delivering service quality of ICT systems, analysis of quantitative and qualitative requirements and methods for sizing of distributed IT systems.

C2. Skills about the differences and benefits of the use of analog and digital data transmission techniques, the differences and benefits of the use of wired and wireless signal transmission techniques, developing the concept of using wired and wireless technologies in the basic applications of ICT systems, defining the qualitative and quantitative requirements of the user information and communication systems range of data, designing ICT solutions needed to achieve the qualitative and quantitative requirements of the user, using standards and solutions available on the market, estimating the cost of preparing and maintaining ICT solutions needed to achieve the qualitative and quantitative requirements, designing modernization of IT solutions needed to achieve the qualitative and quantitative requirements, identifying differences and similarities between solutions in a variety of applications (e-health, e-government and e-learning, in real-time systems, etc.).

C3. Skills for the design and analysis of complex, distributed ICT systems providing network services for distributed computer communication systems.

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:

K2INF_W02: Has a structured, theoretically founded essential knowledge of business modeling and requirements specification systems.

K2INF_W03: Has a structured, theoretically founded essential knowledge in the delivery of information distributed systems

K2INF_W06: Achieves results in the category of knowledge for specialty data communications

relating to skills:

K2INF_U05: Can - in formulating and solving engineering tasks - integrate knowledge of the fields of science and scientific disciplines relevant to the study being studied and applied a systemic approach, taking into account the non-technical aspects

K2INF_U06: Can solve the modeling, analysis and decision making for different types of objects

K2INF_U08: Achieves results and skills in areas of data exchange and computer communications systems

relating to social competences:

K2INF_K01: Can think and act in a creative and enterprising

K2INF_K02: Has aware of the social role of technical graduating, especially understands the need for the formulation and communication to the public, especially through the mass media, information and opinion on the achievements of technology and other aspects of engineering, shall endeavor to provide such information and opinions in a widely understood the reasons for the different points of view

PROGRAMME CONTENT		
Form of classes - lecture		**Number of hours**
Lec 1	Classification of ICT systems from different points of view. Quality of Experience (QoE) and Quality of Service (QoS) in ICT systems with elastic and streaming traffic.	2
Lec 2	Introduction to queuing. Open and close networks of queues. Queuing models of circuit-switched and packet-switched computer communication systems. Burke's theorem and Kleinrock approximation.	2
Lec 3	Access control, flow control and routing tasks formulation and solution in distributed environments.	1
Lec 4	Requirements analysis	1
Lec 5	Models (Poisson, Markov modulated, self-similarity, etc) of teletraffic and its application in traffic engineering tasks.	1
Lec 6	QoS delivery concepts: best effort, integrated services and differentiated services	1
Lec 7	New concepts of systems and networks - NXGN (Next Generation Networks) i NWGN (New Generation Network). Summary.	1
	Total hours	9

Form of classes - project	**Number**

		of hours
Proj 1	Formulation design task based on the analysis of the literature, documentation, etc.	2
Proj 2	Justification for the choice task and purpose of the task design - an analysis of the expected benefits of the project task.	2
Proj 3	Quantitative and qualitative requirements analysis for the communication system under design	2
Proj 4	Analysis of state of the art on how to solve the task design and analysis and selection of the task design methodology	2
Proj 5	Tools (methods, algorithms, procedures, software and hardware) analysis and selection required for the implementation of the project task	2
Proj 6	Implementation of prototype of modules solve the task and prototype testing and evaluation	2
Proj 7	Modification of solutions using prototype test results	2
Proj 8	Integration of modules distinguished at the stages of requirements analysis and prototyping. Verification and testing of an integrated solution design task	2
Proj 9	Analysis of the possibility of extending the project tasks. Preparation of tfinal presentation and documentation of the design task. Presentation of the results of the design task	2
	Total hours	18

TEACHING TOOLS USED
N1. Traditional lecture supported by whole class multimedia presentations based on literature and open access and commercial sources.
N2. Student's own works – solving experiments and tasks in laboratory as well as homework.
N3. Student's own works – literature and open access sources studies.
N5. Collective works in laboratory
N5. Student's own works – preparation of presentations and technical documentations.

EVALUATION OF SUBJECT EDUCATIONAL EFFECTS ACHIEVEMENT		
Evaluation (F – forming (during semester), P – concluding (at semester end)	Educational effect number	Way of evaluating educational effect achievement
F1 (lecture)	K2INF_W03 K2INF_W04 K2INF_W06 K2INF_U05 K2INF_U06 K2INF_U08 K2INF_K01 K2INF_K02	Observation and verification of student activity. Solving the sample jobs.
F1 – F9 (project)	K2INF_W06	Checking the preparation of the student. Checking

	K2INF_U05 K2INF_U06 K2INF_U08 K2INF_K01	the presence of the student. Observation of student activity. Observation and assessment of student autonomy.
P (lecture)	K2INF_W03 K2INF_W04 K2INF_W06 K2INF_U05 K2INF_U06 K2INF_U08 K2INF_K01 K2INF_K02	Colloquium (course credit) in the evaluation of forming F1 (lecture)
P (project)	K2INF_U05 K2INF_U06 K2INF_U08 K2INF_K01	Total weighted ratings F1 – F9 (project) and the assessment for the presentation of the final results of the project.

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

1. Knowledge of mathematics and mathematical statistics

\

SUBJECT OBJECTIVES

C1 Introduce the methods and techniques of the statistical data analysis to students
C2 Gather knowledge for Knowledge Discovery (Data Mining)
C3 Applying the gathered knowledge to drawing conclusions based on data analysis

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:
PEK_W01 student has a basic knowledge of Knowledge Discovery (Data Mining)
PEK_W02 student has a basic knowledge of statistical data analysis
PEK_W03 student is able to present differences between parametric and non-parametric tests

relating to skills:
PEK_U01 student is able to choose a proper statistical test
PEK_U02 student is able to draw conclusion from data analysis
PEK_U03 student is able to select a proper data mining method

relating to social competences:
PEK_K01 student is able to search and reuse the primary and secondary literature listed below and is able to gather the proper knowledge
PEK_K02 student understands the need for systematic and individual work in order to cover the scope of the course

PROGRAMME CONTENT

Form of classes - lecture		**Number of hours**
Lec 1	Introduction to knowledge discovery	2
Lec 2	Classification and Data Clustering	2
Lec 3	Clustering Algorithms	2
Lec 4	Statistics - basic notions	2
Lec 5	The selected problems of estimation theory	2
Lec 6	Parametric tests for one population	2
Lec 7	Non-parametric tests for one population	2
Lec 8	Parametric tests for two populations	2
Lec 9	Non-parametric tests for more than 2 populations	2

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

1. Basic knowledge of local area networks.
2. Familiarity with Linux and Windows network operating systems.

\

SUBJECT OBJECTIVES

C1 Gaining knowledge of the organization and architecture of the Internet.
C2 Obtaining detailed knowledge of the implementation of the basic services on the Internet.
C3 Obtaining knowledge of modern Internet technologies.
C4 Understanding the sources of Internet performance degradation.
C5 Gaining practical skills to configure specialized software which control the basic operation of the Internet.
C6 Acquisition of the ability to perform measurements of parameters characterizing the state of the Internet.

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:

PEK_W01 Lists, defines and characterizes the essential elements of the Internet architecture and explains their functions.

PEK_W02 Knows and describes the mechanisms, protocols and algorithms used in the implementation of basic services of the Internet.

PEK_W03 Describes the operation and evaluates properties of modern Internet technologies

PEK_W04 Has an idea of the factors affecting the Internet activity.

relating to skills:

PEK_U01 Can plan a research experiment in the field of quality of the Internet activity and evaluate used methods and quality of Internet services.

PEK_U02 Can choose the means (methods and tools) and use them to study selected properties of the part of the Internet.

PEK_U03 Is able to assess the structure of the network and specify infrastructure requirements, and select and apply appropriate solutions for the realization of specific Internet services.

relating to social competences:

PROGRAMME CONTENT

Form of classes - lecture		**Number of hours**
Lec 1	Introduction. The Internet architecture fundamentals. Internet Protocols. The logical and physical structure of the Internet	3
Lec 2	Routing internet traffic – issues and protocols.	3
Lec 3	Autonomous Systems. Internet architecture at the operator level.	3
Lec 4	IPv6 protocol. IPv46 to IPv6 transition mechanisms.	3
Lec 5	IP Multicast. Streaming. Multimedia services.	3
Lec 6	Issues of quality of service on the Internet.	3
Lec 7	Sources of Internet performance degradation.	3
Lec 8	Discovering the structure of the Internet connection. Discovering geographic location	3
Lec 9	Performance testing on the example of web services. The use of measurements to model the Internet	3
	Total hours	27

Form of classes - class		**Number of hours**
..		
	Total hours	

Form of classes - laboratory		**Number of hours**
Lab 1	Discussion of the organization of classes and exercise program. Health and Safety Training. Presentation of teaching tools.	2
Lab 2	Preparation of tools, methods and scope of exploring Internet parameters using selected Internet distance evaluation methods.	2
Lab 3	Carrying out the tests, and analysis and develop the results and conclusions of the	2

	experiment.	
Lab 4	Preparation of tools, methods and scope of research of selected Internet service.	2
Lab 5	Carrying out the tests, and analysis and develop the results and conclusions of the experiment.	2
Lab 6	Setting up and testing of the network at the autonomous systems level – part 1.	2
Lab 7	Setting up and testing of the network at the autonomous systems level – part 2.	2
Lab 8	Configuration and testing of IPv6 network.	2
Lab 9	Configuration and testing of IP multicast.	2
	Total hours	18

Form of classes - project		**Number of hours**
...		
	Total hours	

Form of classes - seminar		**Number of hours**
Sem1	Discussion and disposals of seminar topics. Discussion of the principles of seminar speech.	2
Sem2	Low-level monitoring tools	2
Sem3-Sem4	Research and characteristics of the Internet topology at the AS level.	4
Sem5-Sem6	Research and characteristics of Internet links.	4
Sem7-Sem8	Methods and tools for internet geolocation.	4
Sem9	Large-scale measurement systems	2
	Total hours	18

TEACHING TOOLS USED

N1. Lecture supported by multimedia presentations.
N2. Lab aids.
N3. Network equipment and specialized software of selected Internet technologies.
N4. The e-learning system for publication of teaching materials, exercises, announcements and collection and evaluation of student work, as well as for testing of acquired knowledge.
N2. Developing own reports on a given topic in the field of the course.

EVALUATION OF SUBJECT EDUCATIONAL EFFECTS ACHIEVEMENT

Evaluation (F – forming (during semester), P – concluding (at semester end)	Educational effect number	Way of evaluating educational effect achievement
F1 – Lab3	PEK_U01, PEK_U02	Assessment of the completeness and quality of the laboratory exercise. Scoring 0÷10.
F2 – Lab5	PEK_U01, PEK_U02	Assessment of the completeness and quality of the laboratory exercise. Scoring 0÷10.

F3 – Lab7	PEK_U03	Assessment of the completeness and quality of the laboratory exercise. Scoring 0÷10.
F4 – Lab8	PEK_U03	Assessment of the completeness and quality of the laboratory exercise. Scoring 0÷10.
F5 – Lab9	PEK_U03	Assessment of the completeness and quality of the laboratory exercise. Scoring 0÷10.
P1 – Lab15 - the final evaluation of the laboratory.	PEK_U01, PEK_U02, PEK_U03	The rate determined on the basis of the total points of forming ratings F1 to F5 according to the formula: - less than 50% of the points – 2.0 (insufficient) [50%, 60%) – 3.0 (sufficient) [60%, 70%) – 3.5 (sufficient+) [70%, 80%) – 4.0 (good) [80%, 90%) – 4.5 (good+) [90%, 100%) – 5.0 (very good) 100% – 5.5 (excellent)
F6 – Sem2-Sem9	PEK_W01, PEK_W03, PEK_W04	Attendance at the seminar. Scoring 0÷5.
F7 – Sem2-Sem9	PEK_W01, PEK_W03, PEK_W04	Evaluation of activity in the classroom (discussion on presentations). Scoring 0÷5.
F8 – own speech at the seminar	PEK_W01, PEK_W03, PEK_W04	Assessment of the substantive content of the speech, selection and completeness of sources, and the implementation of the presentation. Scoring 0÷10.
P2 – the final evaluation of the seminar	PEK_W01, PEK_W03, PEK_W04	The rate determined on the basis of the total points of forming ratings F6 to F8. The grading scale such as for P1.
P3 – the final evaluation of the lecture	PEK_W01, PEK_W02, PEK_W03, PEK_W04	Test of knowledge – exam (written or electronic using the e-learning system). Score points obtained from the test. The grading scale such as for P1.

1 Knowledge of advanced methods and techniques of data analysis
2 Knowledge of the basics of the Internet and Web-based systems
3 Knowledge of the basics of simulation systems

\

SUBJECT OBJECTIVES

C1 familiarize students with current knowledge in the field of Web-based systems modeling
C2 familiarize students with current knowledge in the field of forecasting efficiency of web data mining methods
C3 Presentation of the problems associated with the use of methods of spatial predictions about the performance of web systems
C4 Gain skills of students in characterization of issues from different fields and their spatial modeling and performance prediction.

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:
PEK_W01 has detailed knowledge of the underpinnings of theory and knows the methods and tools and can solve complex tasks of modeling and analysis of web-based systems
relating to skills:
PEK_U01 It can be used to formulate and solve tasks and research problems of varying difficulty, on Web-based systems, simulation and experimental methods, as well as to evaluate their suitability.
PEK_U02 Can formulate and test hypotheses related to the problems of engineering and simple research problems, knows how to select and use appropriate techniques and technologies for the implementation of IT solutions in the field of studying a field, he can make a critical analysis of the course of action being developed solutions and propose improvements to the techniques
relating to social competences:
PEK_K01 recognizes the need to use these methods for modeling and data analysis in order to assess the performance of Web-based systems
PEK_K02 Identifies the use of spatial forecasting methods in other fields and technology

PROGRAMME CONTENT

Form of classes - lecture		**Number of hours**
Lec 1	Introduction to the course. Description of the course, the organization of classes and examination. Introduction of the basic concepts. Problem modeling and analysis of web-based systems. Methods and tools for modeling and analysis of web systems. Performance prediction of Web-based systems - approaches and	2

	methods of solutions. Discussion of student assignments.	
Lec 2	The methodology and algorithms for efficient getting of web resources.	2
Lec 3	Review of methods of spatial econometrics. Presentation of the exemplary applications of these methods by using OpenGeoDa. Introduction to geostatistics, familiar with the terminology, a discussion of the distribution methods and their application. Variogram and covariance functions and a discussion of theoretical models for their approximation.	2
Lec 4	Discussion of methods of interpolation and estimation. Discussion of simulation methods (Turning Bands and Sequential Gaussian Simulation).	2
Lec 5	Presentation of examples of applications of simulation methods to predict the performance of the Internet with the help of selected software tool. MWING measurement environment. Experiments measuring.	2
Lec 6	Prediction of time to download web resources using data mining methods. Sample results of the study. Modeling and analysis of the global distribution of http requests.	2
Lec 7	Modeling and analysis of local distribution of http requests.	2
Lec 8	Modeling and analysis of system admission control and scheduling of http requests on the web server. Modeling and analysis of web server management using auction algorithms.	2
Lec 9	Overview and discussion of current research topics of modeling and analysis of web-based systems. Discussion of student assignments, preparation for the exam	2
	Total hours	18

Form of classes - class		**Number of hours**
Lab 1	Organisational Assessment and literature. Reminder of C + + language and introduction to the CSIM package. Streams (generators) of random numbers. Objects in CSIM: processes, facility, event, tables.	2
Lab 2	Queuing networks. M/M/1 queue and M / M / N.	2
Lab 3	Server farm with JSQ routing.	2
Lab 4	The Fork-Join queuing.	2
Lab 5	Credits	1
	Total hours	9

Form of classes - laboratory	**Number of**

		hours
Lab 1		
Lab 2		
	Total hours	

Form of classes - project		Number of hours
Proj 1		
Proj 2

TEACHING TOOLS USED
N1. Lectures supported by multimedia presentations N2. Documentation manufacturers web infrastructure N3 Scientific and technical publications N4. E-learning system used for publication of teaching materials or announcements, collection and assessment of student work N5. Additional consultations for students.

EVALUATION OF SUBJECT EDUCATIONAL EFFECTS ACHIEVEMENT

Evaluation (F – forming (during semester), P – concluding (at semester end)	Educational effect number	Way of evaluating educational effect achievement
P1 (Lab)	PEK_U01, PEK_U02	Evaluation of the work at the laboratory (observation of student activities. Brief individual interview on current laboratory practice (demonstration program, the results of its operations and applications), report.
P2 (Lec)	PEK_W01, PEK_U01-2, PEK_K01-2	Examination of the course or development problem made by the student on an assigned topic or research on the subject of the object.

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

12. Practice in object-oriented programming.
13. Basic knowledge of software engineering.

\

SUBJECT OBJECTIVES

C1. Basic knowledge in the area of software system modeling with the stress on business modeling as the initial phase of the software development process.
C2. Basic knowledge in the area of the requirements specification.

SUBJECT EDUCATIONAL EFFECTS

Relating to knowledge:
PEK_W01: Students have basic knowledge on business modeling.
PEK_W02: Students know and understand the role of specification requirements.
PEK_W03: Students have basic knowledge on selected modeling languages.

Relating to skills:
PEK_U01: Students, in cooperation with domain experts, can construct and analyze business models.
PEK_U02: Students can build models of system requirements.

Relating to social competences:
PEK_K01: Students are able to cooperate with representatives of application domain.

PROGRAMME CONTENT

Form of classes - lecture		**Number of hours**
Lec 1	Basic notions for software development cycle. Survey of modeling languages – UML and BPMN.	1
Lec 2	Class diagrams – classes, associations, generalizations.	2
Lec 3	Object Constraint Language.	2
Lec 4	BPMN process diagrams.	2
Lec 5	System requirements; use case diagrams.	2
	Total hours	9

Form of classes - class		Number of hours
Cl 1	Analysis of textual descriptions of exemplary application domains – structural aspect.	2
Cl 2	Construction and analysis of class diagrams.	2
Cl 3	Construction and analysis of class diagrams.	2
Cl 4	Construction and analysis of OCL constraints imposed on diagrams.	2
Cl 5	Case study – an example of structural modeling.	2
Cl 6	Test 1.	1
Cl 7	Construction and analysis of simple BPMN process diagrams.	2
Cl 8	Construction and analysis of advanced BPMN process diagrams.	2
Cl 9	Construction and analysis of use case diagrams.	2
Cl 10	Test 2.	1
	Total hours	18

TEACHING TOOLS USED

N1. Lecturer's presentation at a blackboard, supported by a multimedia presentation using a laptop and a projector.
N2. Individual search and study of literature and Internet sources.
N3. Access to teaching materials published in the local area network.
N4. Individual consultations.

EVALUATION OF SUBJECT EDUCATIONAL EFFECTS ACHIEVEMENT

Evaluation (F – forming (during semester), P – concluding (at semester end)	Educational effect number	Way of evaluating educational effect achievement
F1	PEK_W01 PEK_U01 PEK_K01	Each student gets 1 point for own solution of a problem from the list of problems for the given class.
F2	PEK_W01 PEK_W02 PEK_U01 PEK_U02 PEK_K01	Each student gets up to 10 points for own solution of problems for the given test (intermediate and final).
F3	PEK_W01 PEK_W02 PEK_W03 PEK_U01 PEK_U02	The final evaluation for the classes is determined on the basis of total marks obtained by the student's activity for exercise (F1) and colloquia (F2). Positive mark is awarded to a student who has obtained at least 4 points for each of the symposia and has won a total of 10 points. If this condition is met, the number of points P is the basis for evaluation in

	PEK_K01	accordance with the following table: P: 10 | 12 | 14 | 16 | 18 Mark: 3.0 | 3.5 | 4.0 | 4.5 | 5.0 Students who get at least a very good grade are exempt from the examination with the same mark as for the classes.

C: The final evaluation of the course is determined based on the results of the examination. The examination lasts two hours and consists of a set of tasks, the total number of 20 points. The condition for a positive assessment of the final exam is to get 10 points and a positive final evaluation of the exercise.
The final evaluation of the examination is determined in accordance with the following table:

Points	10	12	14	16	18
Mark	3.0	3.5	4.0	4.5	5.0

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

8. Basic knowledge on computer organization and parallel and distributed processing
9. Programming skills at C/C++ programming language

\

SUBJECT OBJECTIVES

C1 Acquainting students with different environments that allow parallel processing
C2 Acquainting students with the basic parallel algorithms
C3 Acquainting students with different techniques used during program parallelization
C4 Acquainting students with different parallel computer architectures
C5 Acquisition of the ability to choose the most suitable parallel architecture to the solved problem
C6 Acquisition of the ability of parallel programming using different environments

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:
PEK_W01 He knows different environments that allow parallel processing.
PEK_W02 He knows basic parallel algorithms
PEK_W03 He knows different approaches to program parallelization
PEK_W04 He knows different parallel computer architectures

relating to skills:
PEK_U01 He is able to choose the most convenient parallel environment to solved problem
PEK_U02 He is able to write programs under different parallel and distributed environment

PROGRAMME CONTENT

	Form of classes - lecture	**Number of hours**
Lec 1	Parallel and distributed computing - basic definitions. Taxonomy of parallel computers. Shared-memory and distributed memory Computers. Static and dynamic interconnection networks, typical topologies.	2
Lec 2	MPI standard. Message passing communication – basic concepts. Collective communication algorithms ("one-to-all", "all-to-all" and others) for different communication network topologies.	2
Lec 3	Parallel matrix multiplication and parallel sorting algorithms	2
Lec 4	Evaluations of parallel systems (algorithms): computational complexity, speedup, efficiency, scalability of parallel systems. Amdhal and Gustafson laws. .	2
Lec 5	Parallelization and vectorization techniques. Data dependencies in sequential programs. Loop carried dependence. Loop parallelizing (transformation) techniques	2
Lec 6	Parallel graph and search algorithms	2
Lec 7	Architecture and programming of GPU. Programming in CUDA environment	2
Lec 8	Parallel programming for multicore processors.	2
Lec 9	Parallel and distributed processing environments: shared and distributed memory. Data and algorithm parallelism . Client-server architecture. New trends in parallel and distributed computing	2
	Total hours	18

Form of classes - class		Number of hours
Cl 1		
	Total hours	

Form of classes - laboratory		Number of hours
Lab1	Presentation of lab scope, presentation of grading principles, training from health and safety at work. Familiarization with used at laboratory MPI execution environment.	2
Lab2	Testing execution environment, running simple programs that implement communication between two processors in MPI environment and group communication.	2
Lab3	Implementation of simple algorithm in MPI environment.	2
Lab4	Implementation of chosen parallel matrix multiplication or sorting algorithm, carrying out the tests for different data, calculation of speedup scalability analysis.	2
Lab5	Presentation results of experiments performed during lab 4	2
Lab6	Implementation of chosen loop transformation techniques (loop parallelizing) in MPI environment. Performance evaluation.	2
Lab7	Presentation results of experiments performed during lab 6	2
Lab8	Familiarization with CUDA environment, running simple programs.	2
Lab9	Implementation of chosen algorithm with data parallelism in CUDA environment, calculation of speedup.	2
	Total hours	18

Form of classes - project		Number of hours
Proj1		
	Total hours	

Form of classes - seminar		Number of hours
Sem1		
	Total hours	

TEACHING TOOLS USED
N1. Lecture supported by multimedia presentations (slideshow) N2. Cluster of computers running under MPI N3. GPU server with CUDA environment

EVALUATION OF SUBJECT EDUCATIONAL EFFECTS ACHIEVEMENT

Evaluation(F – forming (during semester), P – concluding (at semester end)	Educational effect number	Way of evaluating educational effect achievement
F1 – (lecture)	PEK_W01 PEK_W02 PEK_W03 PEK_W04	Test and quizzes during the lecture, student activity during the lecture, students answering on questions during lecture.
F2 – (laboratory)	PEK_U01 PEK_U02	Checking of student preparation for exercise realization, assessment the reports of the exercises. Evaluation of the quality of submitted by students programs

		and prepared presentations (point allocated).

P - the final grade from lecture will be issued on the basic of partial grades (points) received from the test (T) and quizzes (Q) as follows: Grade = 20% * Q + 80% *T. The final grade from the laboratory will be issued on the basis of partial grades (points) obtained from all exercises.

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

1. Ability to program in selected popular computer language.
2. Ability to install and configure the development environment.

\

SUBJECT OBJECTIVES

C1 Ability to collaborate in a group throughout the semester.
C2 Practical ability of analysis of user's expectations.
C3 Ability to convert the user's expectations into functionality of the application of information engineering the Internet, distributed or parallel systems.
C4 Ability to split the functionality of the application into programming tasks.
C5 Ability of scheduling technique adopted in the framework of teamwork.
C6 Ability to proper assign tasks to team members
C7 Ability of critical discussion on the team over achieved partial results.
C8 Gaining knowledge about computing methods and techniques used in the teamwork.
C9 Ability to develop project documentation and applications.

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

1. Knowledge, skills and competences acquired at Informatics field at second level of study until 3th semester

\

SUBJECT OBJECTIVES

C1 The aim of subject is to acquire the ability to define and solve problems on the nature of the research and development especially related to development and implementation regarding various aspects of computer engineering.

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:

PEK_W01 He has an extended knowledge of the curriculum content defined for the current edition of the course.

relating to skills:

PEK_U01 He is able to solve chosen task defined by the content of current edition of the course

relating to social competences:

…

PROGRAMME CONTENT

	Form of classes - lecture	**Number of hours**
Lec1 – lec8	Classes are adapted to current needs indicated by students, including needs arising from their master theses and current trends in their field of study related to computer engineering. Depending on the students' needs different courses can be offer every year. The number of open courses will be depend on students voting and internal Faculty regulation, which defined the number of students that need to participated in the course. Lectures will be related to one (monographic approach) from the areas of research and development conducted by the teachers. The subject of the course should be related with educational effects specified for the Informatics field of study or for Internet and Mobile Technologies specialization.	9
	Total hours	9

Form of classes - class		Number of hours
Cl 1		
	Total hours	
Form of classes - laboratory		**Number of hours**
Lab 1	Presentation of lab scope, presentation of grading principles, training from health and safety at work. Familiarization with used laboratory tool.	1
Lab2 – lab8	Classes are adapted to current needs indicated by students, including needs arising from their master theses and current trends in their field of study related to computer engineering. Laboratories will be related to one (monographic approach) from the areas of research and development conducted by the teachers.	17
	Total hours	18
Form of classes - project		**Number of hours**
Proj 1		
	Total hours	
Form of classes - seminar		**Number of hours**
Sem 1		
	Total hours	

TEACHING TOOLS USED
N1. Lecture supported by multimedia presentations (slideshow) N2. Laboratory equipped with hardware and programming tools needed for the subject of course.

EVALUATION OF SUBJECT EDUCATIONAL EFFECTS ACHIEVEMENT

Evaluation (F – forming (during semester), P – concluding (at semester end)	Educational effect number	Way of evaluating educational effect achievement
F1 – (lecture)	PEK_W01	Quizzes during the lecture, student activity during the lecture, students answering on questions during lecture, evaluation of homeworks.
F2 – (laboratory)	PEK_U01	Checking of student preparation for exercise realization, assessment (points allocated) the reports of the exercises. Evaluation of the quality of submitted by students programs.
The final assessment will be issued on the basis of partial grades (points) received from the lecture (F1) and laboratory (F2) as follows: Grade = 50% * F1 + 50% * F2

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

1 Knowledge, skills and competences acquired at Informatics field at second level of study until 3th semester

\

SUBJECT OBJECTIVES

C1 Preparing students to write a master thesis according the internal requirements in Informatics field at Faculty of Computer Science and Management, Wrocław University of Technology,

C2 Providing students with basic skills related to preparation and presentation of scientific texts, beginning from the choice of topic, selection of tasks to be performed, use of literature to interpretation of the results.

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:

…

relating to skills:

PEK_U01 He is able to acquire information from literature, databases and other sources, also in English or other language used for communication in Informatics field, is able to integrate the information obtained, interpret them, make critical evaluation and also draw conclusions and formulate and justify opinions related to prepared master thesis.

PEK_U02 He can communicate using a variety of techniques in his professional environment and in other environments, also in English or other foreign language used for communication in Informatics field and also to present the results of his master thesis

relating to social competences:

…

Form of classes - seminar	**Number of hours**

Sem 1	Familiarization with the principles of master thesis realization at Informatics field. Rules related to student presentations. Determining the schedule of student presentations.	2
Sem 2	Review of basic skills related to preparation and presentation of scientific texts by students, beginning from the choice of topic, selection of tasks to be performed, use of literature and also how to write thesis and how obtained results should be interpret.	2
Sem 3 – Sem15	During semester each student has 2 presentations. The first presentation is related to the general view of the thesis topic, its placement in the literature and in the Informatics field. The student should present the primary aim of thesis, the state of art related to thesis topic, the concept of solution, the initial structure of thesis and timetable for further work. The purpose of the second presentation is preparation to defense and demonstrate presentation skills in English. The second presentation consists of two parts, namely, discussion of the results of the work in English and a short presentation in Polish devoted to the results of the thesis.	14
	Total hours	18

TEACHING TOOLS USED

N1. Multimedia presentations
N2. Examples of scientific papers and reports from the field of computer science.
N3. E-Learning System used to publish teaching materials and announcements, also used for collection and evaluation of student work.

EVALUATION OF SUBJECT EDUCATIONAL EFFECTS ACHIEVEMENT

Evaluation (F – forming (during semester), P – concluding (at semester end)	Educational effect number	Way of evaluating educational effect achievement
P	PEK_U01 PEK_U02	Evaluation of the presentation of the work at the seminar and prepared documentation from the presentation. The evaluation shall be subject to the fulfillment of the requirements for the presentation, including its substantive scope, structure and organization of presentation, techniques of conversation, a form of presentation, compactness of presentation and conclusions reached. Participation in the discussions after presentation is also evaluated. In addition, the seminar leader is able to control the cooperation between supervisors and graduate students.

PRIMARY AND SECONDARY LITERATURE

PRIMARY LITERATURE:

[117] Literature related to the scope of realized project selected by student and recommended by the teacher.

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

1. Basic mathematical knowledge for 1st level of studies.

2. Informatics knowledge background.
3. Algorithms knowledge background.

\

SUBJECT OBJECTIVES

C1 Acquiring knowledge about functions and significance of information systems in contemporary organizations
C2 Acquainting with the functions and development of information systems in information society
C3 Acquainting with the different methods of information retrieval by surfing the Web
C4 Recognizing the problems of passing of contemporary organizations to Internet space
C5 Obtainment of skills to analyze the literature from information systems area and to synthesize the contents from different sources
C6 Application of the obtained knowledge to presentation the problems from information systems area by means of using adequate tools

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:
PEK_W01 Familiarity with basic models of information systems
PEK_W02 Basic knowledge about Web information systems
PEK_W03 Familiarity with common multimedia technologies
PEK_W04 Understanding of the measures of information retrieval efficiency

relating to skills:
PEK_U01 Student can to build information query for different types of information needs
PEK_U02 Can to determine basic features of information system for given organization
PEK_U03Student be able to evaluate the precision of retrieved information
PEK_U04 Can to present basic features of given information system

relating to social competences:
PEK_K01 Can individually to use literature of the subject and to select useful information
PEK_K02 Student is convinced above positive role of information systems in stimulation of the civilization development

PROGRAMME CONTENT

	Form of classes - lecture	**Number of hours**
Lec 1	History of information systems development. Information processing. Theoretical basis of information systems. Automation of information flow in organization.	2
Lec 2	Functioning of information systems in computer networks. Information retrieval. Digital libraries.	2
Lec 3	Multimedia. Importance of multimedia technologies in information systems development. How societies embrace information technology.	2
Lec 4	Efficiency of information systems. Case study of chosen information system.	2

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

None.

\

SUBJECT OBJECTIVES

C1 Getting to know foundations of designing computer science decision support systems using general systemic methods which make it possible to apply unified approaches for analysis and decision making for decision support systems of different nature.
C2 Acquisition of skills to represent in the form of mathematical formulas of decision making plants treated as input-output plants.
C3 Acquisition of skills to analyze of decision making plants treated as input-output plants.
C4 Getting acquainted with methods and algorithms of multi-stage decision making.
C5 Acquisition of skills to apply dynamic programming method.
C6 Getting to know metods and algorithms of multi-criteria decision making.
C7 Acquisition of skills to use AHP method.

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:
PEK_W01 Student knows foundations of designing of decision support systems for any kind of plants.
PEK_W02 Student knows foundations of analysis and decision making for input-output plants with logic knowledge representation.
PEK_W03 Student knows selected method of multi-stage and multi-criteria decision making.
relating to skills:
PEK_U01 Student is able to elaborate a mathematical model for an input-output decision making plant in discrete state space as well as with logic knowledge representation.
PEK_U02 Student can solve analysis and decision making tasks for elementary plants with logic knowledge representation.
PEK_U03 Student is able to solve multi-stage decision making problem using Bellman's Principle and dynamic programming.
PEK_U04 Student can use AHP algorithm for the solution od multi-criteria decision making problem
relating to social competences:
PEK_K01 Student can take advantage of professional literature by oneself and can perform the critical analysis of information mined.
PEK_K02 Student can think creatively.

PROGRAMME CONTENT

Form of classes - lecture		**Number of hours**
Lec 1	Decision support systems – definitions, structures, problems, application of discrete state equations and logic expressions for representation of decision making plants.	2
Lec 2	Outline of logic-algebraic method and its application to solution of analysis and decision making for input-output decision making plants.	2
Lec 3	Decision making – definition, typology, logic-algebraic plant, Bellman's Principle and multi-stage decision making.	2
Lec 4	Multi-criteria decision making – Pareto sets, AHP method.	2
Lec 5	Examples of computer decision support systems.	1
	Total hours	9

Form of classes - class		**Number of hours**
Cl 1	Solution of numerical exercises concerning difference equations as well as propositional calculus.	2
Cl 2	Solution of numerical exercises concerning mathematical representations of input-output plants.	2
Cl 3	Solution of numerical exercises concerning analysis and decision making using logic-algebraic method.	2
Cl 4	Solution of numerical exercises concerning dynamic programming and AHP	2

	method.	
Cl 5	Final test.	1
	Total hours	9

Form of classes - laboratory		Number of hours
Lab 1		
Lab 2		
Lab 3		
Lab 4		
Lab 5		
…		
	Total hours	

Form of classes - project		Number of hours
Proj 1	Collecting of indispensable information about selected plant being the decision making plant.	2
Proj 2	Determination of mathematical model of selected decision making plant and decision making problem formulation as well as analysis of decision making plant using its mathematical model.	2
Proj 3	Choice of decision making method for further usage as well as elaboration of decision making algorithm.	2
Proj 4	Implementation and analysis of decision making algorithm.	2
Proj 5	Elaboration of conclusions and written report of the project performed.	1
	Total hours	9

Form of classes - seminar		Number of hours
Sem 1		
Sem 2		
Sem 3		
…		
	Total hours	

TEACHING TOOLS USED
N1 Lecture – traditional method. N2 Classes – traditional method. N3 Consultation. N4 Individual discussion with student. N5 Short test (10 mins.). N6 Self-contained work.

EVALUATION OF SUBJECT EDUCATIONAL EFFECTS ACHIEVEMENT

Evaluation (F – forming (during semester), P – concluding (at semester end)	Educational effect number	Way of evaluating educational effect achievement
F1	PEK_W02; PEK_W03; PEK_U01– PEK_U04	Short tests during the classes.
F2	PEK_K01– PEK_K02	Individual discussion with student during

		the project.
P (Classes)	PEK_W02; PEK_W03; PEK_U01–PEK_U04	Test.
P (Project)	PEK_U01–PEK_U04; PEK_K01–PEK_K02	Evaluation of written report of the project.
P (Lecture)	PEK_W01–PEK_W03; PEK_K02	Exam.

FACULTY OF COMPUTER SCIENCE AND MANAGEMENT

SUBJECT CARD

Name in Polish: Teoria i inżynieria ruchu teleinformatycznego

Name in English: Theory and engineering of teletraffic

Main field of study (if applicable): Computer science

Specialization (if applicable): Teleinformatics

Level and form of studies: 2nd level, part time

Kind of subject: obligatory

Subject code INZ7600

Group of courses: NO

	Lecture	Classes	Laboratory	Project	Seminar
Number of hours of organized classes in University (ZZU)	9			18	
Number of hours of total student workload	30			90	

(CNPS)					
Form of crediting	Crediting with grade			Crediting with grade	
For group of courses mark (X) final course					
Number of ECTS points	1			3	
including number of ECTS points for practical (P) classes				3	
including number of ECTS points for direct teacher-student contact (BK) classes	0,4			1,2	

*delete as applicable

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

19. Has a basic knowledge of ICT systems and computer communication networks (K1INF_W11).
20. Knows the basic methods and tools for collecting, processing and retrieval of information and knowledge extraction (K1INF_W16)
21. Can use the right tools to build a simple model of the process (the object), to formulate specific task analysis and decision making (K1INF_U15)
22. Can effectively use the methods and tools for collecting, processing and retrieval of information and knowledge extraction (K1INF_U16)
23. It has the ability to self-education, including in order to improve the professional competence (K1INF_U05)
24. Understands the need and knows the possibility of lifelong learning and to improve their professional and social competences (K1INF_K01)

SUBJECT OBJECTIVES

C1. Ordered, underpinned by theoretical knowledge of methods and techniques for transmitting signals using different modulation techniques, methods and techniques of information transmission, methods of organization and management of data communications traffic in the tasks of design and analysis of communication systems, methods of delivering service quality of ICT systems, analysis of quantitative and qualitative requirements and methods for sizing of distributed IT systems.

C2. Skills about the differences and benefits of the use of analog and digital data transmission techniques, the differences and benefits of the use of wired and wireless signal transmission techniques, developing the concept of using wired and wireless technologies in the basic applications of ICT systems, defining the qualitative and quantitative requirements of the user information and communication systems range of data, designing ICT solutions needed to achieve the qualitative and quantitative requirements of the user, using standards and solutions available on the market, estimating the cost of preparing and maintaining ICT solutions needed to achieve the qualitative and quantitative requirements, designing modernization of IT solutions needed to achieve the qualitative and quantitative requirements, identifying differences and similarities between solutions in a variety of applications (e-health, e-government and e-learning, in real-time systems, etc.).

C3. Skills for the design and analysis of complex, distributed ICT systems providing network services for distributed computer communication systems.

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:

K2INF_W02: Has a structured, theoretically founded essential knowledge of business modeling and requirements specification systems.

K2INF_W03: Has a structured, theoretically founded essential knowledge in the delivery of information distributed systems

K2INF_W06: Achieves results in the category of knowledge for specialty data communications

relating to skills:

K2INF_U05: Can - in formulating and solving engineering tasks - integrate knowledge of the fields of science and scientific disciplines relevant to the study being studied and applied a systemic approach, taking into account the non-technical aspects

K2INF_U06: Can solve the modeling, analysis and decision making for different types of objects

K2INF_U08: Achieves results and skills in areas of data exchange and computer communications systems

relating to social competences:

K2INF_K01: Can think and act in a creative and enterprising

K2INF_K02: Has aware of the social role of technical graduating, especially understands the need for the formulation and communication to the public, especially through the mass media, information and opinion on the achievements of technology and other aspects of engineering, shall endeavor to provide such information and opinions in a widely understood the reasons for the different points of view

PROGRAMME CONTENT		
Form of classes - lecture		**Number of hours**
Lec 1	Classification of ICT systems from different points of view. Quality of Experience (QoE) and Quality of Service (QoS) in ICT systems with elastic and streaming traffic.	2
Lec 2	Introduction to queuing. Open and close networks of queues. Queuing models of circuit-switched and packet-switched computer communication systems. Burke's theorem and Kleinrock approximation.	2
Lec 3	Access control, flow control and routing tasks formulation and solution in distributed environments.	1
Lec 4	Requirements analysis	1
Lec 5	Models (Poisson, Markov modulated, self-similarity, etc) of teletraffic and its application in traffic engineering tasks.	1
Lec 6	QoS delivery concepts: best effort, integrated services and differentiated services	1
Lec 7	New concepts of systems and networks - NXGN (Next Generation Networks) i NWGN (New Generation Network). Summary.	1
	Total hours	9

PROGRAMME CONTENT	
Form of classes - project	**Number**

		of hours
Proj 1	Formulation design task based on the analysis of the literature, documentation, etc.	2
Proj 2	Justification for the choice task and purpose of the task design - an analysis of the expected benefits of the project task.	2
Proj 3	Quantitative and qualitative requirements analysis for the communication system under design	2
Proj 4	Analysis of state of the art on how to solve the task design and analysis and selection of the task design methodology	2
Proj 5	Tools (methods, algorithms, procedures, software and hardware) analysis and selection required for the implementation of the project task	2
Proj 6	Implementation of prototype of modules solve the task and prototype testing and evaluation	2
Proj 7	Modification of solutions using prototype test results	2
Proj 8	Integration of modules distinguished at the stages of requirements analysis and prototyping. Verification and testing of an integrated solution design task	2
Proj 9	Analysis of the possibility of extending the project tasks. Preparation of tfinal presentation and documentation of the design task. Presentation of the results of the design task	2
	Total hours	18

TEACHING TOOLS USED
N1. Traditional lecture supported by whole class multimedia presentations based on literature and open access and commercial sources.
N2. Student's own works – solving experiments and tasks in laboratory as well as homework.
N3. Student's own works – literature and open access sources studies.
N5. Collective works in laboratory
N5. Student's own works – preparation of presentations and technical documentations.

EVALUATION OF SUBJECT EDUCATIONAL EFFECTS ACHIEVEMENT		
Evaluation (F – forming (during semester), P – concluding (at semester end)	Educational effect number	Way of evaluating educational effect achievement
F1 (lecture)	K2INF_W03 K2INF_W04 K2INF_W06 K2INF_U05 K2INF_U06 K2INF_U08 K2INF_K01 K2INF_K02	Observation and verification of student activity. Solving the sample jobs.
F1 – F9 (project)	K2INF_W06	Checking the preparation of the student. Checking

	K2INF_U05 K2INF_U06 K2INF_U08 K2INF_K01	the presence of the student. Observation of student activity. Observation and assessment of student autonomy.
P (lecture)	K2INF_W03 K2INF_W04 K2INF_W06 K2INF_U05 K2INF_U06 K2INF_U08 K2INF_K01 K2INF_K02	Colloquium (course credit) in the evaluation of forming F1 (lecture)
P (project)	K2INF_U05 K2INF_U06 K2INF_U08 K2INF_K01	Total weighted ratings F1 – F9 (project) and the assessment for the presentation of the final results of the project.

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

1. Knowledge of mathematics and mathematical statistics

\

SUBJECT OBJECTIVES

C1 Introduce the methods and techniques of the statistical data analysis to students
C2 Gather knowledge for Knowledge Discovery (Data Mining)
C3 Applying the gathered knowledge to drawing conclusions based on data analysis

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:
PEK_W01 student has a basic knowledge of Knowledge Discovery (Data Mining)
PEK_W02 student has a basic knowledge of statistical data analysis
PEK_W03 student is able to present differences between parametric and non-parametric tests

relating to skills:
PEK_U01 student is able to choose a proper statistical test
PEK_U02 student is able to draw conclusion from data analysis
PEK_U03 student is able to select a proper data mining method

relating to social competences:
PEK_K01 student is able to search and reuse the primary and secondary literature listed below and is able to gather the proper knowledge
PEK_K02 student understands the need for systematic and individual work in order to cover the scope of the course

PROGRAMME CONTENT

Form of classes - lecture		**Number of hours**
Lec 1	Introduction to knowledge discovery	2
Lec 2	Classification and Data Clustering	2
Lec 3	Clustering Algorithms	2
Lec 4	Statistics - basic notions	2
Lec 5	The selected problems of estimation theory	2
Lec 6	Parametric tests for one population	2
Lec 7	Non-parametric tests for one population	2
Lec 8	Parametric tests for two populations	2
Lec 9	Non-parametric tests for more than 2 populations	2

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

Knowledge of databases, object-oriented programming, computer systems and networks

\

SUBJECT OBJECTIVES

C1 To acquaint students with modern methods of systems integration.
C2 Gaining knowledge about the techniques of system integration.

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:
PEK_W01 student has a basic understanding of system integration.
PEK_W02 student knows and understands the concept of system integration.
PEK_W03 student is able to present the available technology to system integration.

relating to skills:
PEK_U01 student is able to independently develop strategies for systems integration
PEK_U02 student is able to choose the appropriate methods for the integration of information systems
PEK_U03 student is able to evaluate the integration of information systems conducted

relating to social competences:
PEK_K01 student is able to find and use the recommended literature course and independently acquire knowledge
PEK_K02 student understands the need for systematic and independent work on mastery of course material

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

1. Knowledge in the area of methods and techniques of digital data analysis
2. Ability to design and implement of web-based systems
3.

\

SUBJECT OBJECTIVES

C1 Gaining knowledge in the area of Human-Computer Interaction
C2 Gaining knowledge in the field of information systems usability verification
C3 Obtaining ability to design and implement of natural user interface interactive systems
C4 Obtaining ability to verify user interface usability and accessibility

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:

PEK_W01 student has a knowledge concerning methods and tools for interactive systems design

PEK_W02 student has a knowledge concerning methods of user modeling of interactive systems

PEK_W03 student has a knowledge concerning methods of usability and accessibility verification of interactive systems

relating to skills:

PEK_U01 student is able to prepare consequent phases of interactive systems design process

PEK_U02 student is able to implement natural user interface

PEK_U03 student is able to verify usability and accessibility of interactive systems

relating to social competences:

PEK_K01 student is able to search and reuse the primary and secondary literature listed below and is able to gather the proper knowledge

PEK_K02 student understands the need for systematic and individual work in order to cover the scope of the course

PEK_K03 student is able to manage a small design team and a usability testing group

PROGRAMME CONTENT

Form of classes – lecture		**Number of hours**
Lec 1	Introduction to Human-Computer Interaction	2
Lec 2	Interaction styles	2
Lec 3	Interactive systems user modeling	2
Lec 4	Usability of interactive systems and their taxonomy	2
Lec 5	Tools for web-based systems testing	2
Lec 6	Selected methods of usability testing	2
Lec 7	Accessibility of web-based systems	2
Lec 8	Interactive systems design	2
Lec 9	Recommendation of user interfaces	2
	Total hours	18

Form of classes – class		**Number of hours**
Cl 1		
Cl 2		
Cl 3		
Cl 4		
..		
	Total hours	

Form of classes – laboratory		**Number of hours**
Lab 1	Basics of Google Analytics	2
Lab 2	Google Analytics reports analysis	2
Lab 3	Web-based systems testing structural using Selenium	2
Lab 4	Application of different HTML codes validators	2

Lab 5	Application of TUIO protocol in touchscreens interaction	2
Lab 6	Gaze-tracking in user-computer interaction	2
Lab 7	Design of the natural user interface interactive system	2
Lab 8	Implementation of the logics and interaction of the natural user interface interactive system	2
Lab 9	Usability testing of the implemented system	2
	Total hours	18

Form of classes – project		**Number of hours**
Proj 1		
Proj 2		
Proj 3		
Proj 4		
…		
	Total hours	

Form of classes – seminar		**Number of hours**
Sem 1		
Sem 2		
Sem 3		
…		
	Total hours	

TEACHING TOOLS USED

N1. Traditional lectures with slide-show
N2. One-to-one consultancy during stuff hours
N3. Literature self-study
N4. Laboratory task realization
N5. Student self-study in laboratory preparation
N6. Preparation of the laboratory reports

EVALUATION OF SUBJECT EDUCATIONAL EFFECTS ACHIEVEMENT

Evaluation (F – forming (during semester), P – concluding (at semester end)	Educational effect numer	Way of evaluating educational effect achievement
F – laboratory	PEK_U01-PEK_U03, PEK_K01-PEK_K03	Laboratory tasks completion and preparation of reports
C – lecture	PEK_W01-PEK_W03 PEK_K01-PEK_K02	Final test

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

1. Knowledge of logic, rough and fuzzy sets, neural networks

\

SUBJECT OBJECTIVES

C1 Introduce the modern computational intelligence methods to students
C2 Gather knowledge for applying the nature-inspired algorithms to different optimization problems

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:
PEK_W01 student has a basic knowledge of various computational intelligence methods
PEK_W02 student knows and understands the concept of computational intelligence
PEK_W03 student is able to present various evolutionary algorithms

relating to skills:
PEK_U01 student is able to choose a proper method for solving an optimization problem
PEK_U02 student is able to choose proper methods of selection, crossing and mutation
PEK_U03 student is able to assess selected computational intelligence algorithms

relating to social competences:
PEK_K01 student is able to search and reuse the primary and secondary literature listed below and is able to gather the proper knowledge
PEK_K02 student understands the need for systematic and individual work in order to cover the scope of the course

PROGRAMME CONTENT

	Form of classes - lecture	**Number of hours**
Lec 1	Introduction-what is a computational intelligence?	1
Lec 2	Evolutionary Algorithms	2
Lec 3	Evolutionary Programming	2
Lec 4	Genetic Programming , Simple Genetic Algorithm	2
Lec 5	Ant Colony Algorithm and Swarm Algortihm	2
Lec 6	Immunological Algorithm	2
Lec 7	Probabilistic methods	2

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

14. Practice in object-oriented programming.
15. Basic knowledge of software engineering.

\

SUBJECT OBJECTIVES

C1. Basic knowledge in the area of software system modeling with the stress on business modeling as the initial phase of the software development process.
C2. Basic knowledge in the area of the requirements specification.

SUBJECT EDUCATIONAL EFFECTS

Relating to knowledge:
PEK_W01: Students have basic knowledge on business modeling.
PEK_W02: Students know and understand the role of specification requirements.
PEK_W03: Students have basic knowledge on selected modeling languages.

Relating to skills:
PEK_U01: Students, in cooperation with domain experts, can construct and analyze business models.
PEK_U02: Students can build models of system requirements.

Relating to social competences:
PEK_K01: Students are able to cooperate with representatives of application domain.

PROGRAMME CONTENT		
Form of classes - lecture		**Number of hours**
Lec 1	Basic notions for software development cycle. Survey of modeling languages – UML and BPMN.	1
Lec 2	Class diagrams – classes, associations, generalizations.	2
Lec 3	Object Constraint Language.	2
Lec 4	BPMN process diagrams.	2
Lec 5	System requirements; use case diagrams.	2
	Total hours	9

Form of classes - class		**Number of hours**
Cl 1	Analysis of textual descriptions of exemplary application domains – structural aspect.	2
Cl 2	Construction and analysis of class diagrams.	2
Cl 3	Construction and analysis of class diagrams.	2
Cl 4	Construction and analysis of OCL constraints imposed on diagrams.	2
Cl 5	Case study – an example of structural modeling.	2
Cl 6	Test 1.	1
Cl 7	Construction and analysis of simple BPMN process diagrams.	2
Cl 8	Construction and analysis of advanced BPMN process diagrams.	2
Cl 9	Construction and analysis of use case diagrams.	2
Cl 10	Test 2.	1
	Total hours	18

TEACHING TOOLS USED

N1. Lecturer's presentation at a blackboard, supported by a multimedia presentation using a laptop and a projector.
N2. Individual search and study of literature and Internet sources.
N3. Access to teaching materials published in the local area network.
N4. Individual consultations.

EVALUATION OF SUBJECT EDUCATIONAL EFFECTS ACHIEVEMENT

<table>
<tr><td>Evaluation (F – forming (during semester), P – concluding (at semester end)</td><td>Educational effect number</td><td>Way of evaluating educational effect achievement</td></tr>
<tr><td>F1</td><td>PEK_W01
PEK_U01
PEK_K01</td><td>Each student gets 1 point for own solution of a problem from the list of problems for the given class.</td></tr>
<tr><td>F2</td><td>PEK_W01
PEK_W02
PEK_U01
PEK_U02
PEK_K01</td><td>Each student gets up to 10 points for own solution of problems for the given test (intermediate and final).</td></tr>
<tr><td>F3</td><td>PEK_W01
PEK_W02
PEK_W03
PEK_U01
PEK_U02
PEK_K01</td><td>The final evaluation for the classes is determined on the basis of total marks obtained by the student's activity for exercise (F1) and colloquia (F2). Positive mark is awarded to a student who has obtained at least 4 points for each of the symposia and has won a total of 10 points.
If this condition is met, the number of points P is the basis for evaluation in accordance with the following table:
<table>
<tr><td>P</td><td>10</td><td>12</td><td>14</td><td>16</td><td>18</td></tr>
<tr><td>Mark</td><td>3.0</td><td>3.5</td><td>4.0</td><td>4.5</td><td>5.0</td></tr>
</table>
Students who get at least a very good grade are exempt from the examination with the same mark as for the classes.</td></tr>
<tr><td colspan="3">C: The final evaluation of the course is determined based on the results of the examination. The examination lasts two hours and consists of a set of tasks, the total number of 20 points. The condition for a positive assessment of the final exam is to get 10 points and a positive final evaluation of the exercise.
The final evaluation of the examination is determined in accordance with the following table:
<table>
<tr><td>Points</td><td>10</td><td>12</td><td>14</td><td>16</td><td>18</td></tr>
<tr><td>Mark</td><td>3.0</td><td>3.5</td><td>4.0</td><td>4.5</td><td>5.0</td></tr>
</table></td></tr>

Proj 1	Preparation of students to write a master thesis according the internal	

	requirements of Faculty of Computer Science and Management (Computer Science field of study), Wrocław University of Technology, with special attention of all stages of writing a thesis. Literature studies, selection and learning of systems, tools, methods and algorithms needed for the realization of the chosen subject of thesis. The preparation of an outline of work and schedule of future work. Basic work on the research, design and implementation. Familiarization with the research works carried out at the Institute of Informatics. Final results: the initial solution and / or the prototype of developed system, knowledge about the current state of art in the field of thesis, an outline of future work and timetable for further works documented in English and Polish languages.	
	Total hours	

Form of classes - seminar		**Number of hours**

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

Having a knowledge concerning database systems, Artificial Intelligence and Expert Systems.
.

\

SUBJECT OBJECTIVES

C1. To familiarize students with information systems that use various methods of representation, processing, integration, searching and sharing the knowledge in the Web environment.
C2. Gaining knowledge concerning the technologies that use artificial intelligence (AI) to capture, process and share the knowledge in information systems operating on the Web.
C3. Acquiring the ability to design and develop an information system component performing the tasks of processing knowledge in the Web environment.

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:

PEK_W01 The student knows and understands concepts of representation, searching, processing and sharing the information and knowledge at information systems operating on the Web.
PEK_W02 The student has systematized knowledge on methods, tools and standards that are used for the representation, searching, processing and sharing the information and knowledge at information systems.
PEK_W03 The student can name and describe available technologies that are used for information systems operating on the Web.

relating to skills:

PEK_U01 The student independently can choose the method and standard to solve the problem of representation, search, acquisition, processing and sharing the information and knowledge in the Semantic Web.
PEK_U02 The student is able to properly design and evaluate an information system component performing the tasks of processing the information and knowledge and operating on the Semantic Web.
PEK_U03 The student can choose tools which help solving the problems of representation and processing the information and knowledge for the Semantic Web.

relating to social competences:

PEK_K01 The student can find and use the recommended reading for the course and acquire the knowledge independently.
PEK_K02 The student understands the need to systematic and independent work on mastery of course material.
PEK_K03 The student is able to work in a team pursuing the task of programming.

PROGRAMME CONTENT

Form of classes - lecture		**Number of hours**
Lec 1	The Semantic Web – the concept, architecture, assumptions.	2
Lec 2	Ontology vs. ontologies – the concept, definitions, problems.	2
Lec 3	Ontologies engineering for the Semantic Web.	2
Lec 4	XML and other markup languages – the basis of the Semantic Web infrastructure.	2
Lec 5	Resource Description Framework (RDF) – metadata description standard. RDF Schema – defining and processing RDF structures.	2
Lec 6	Web ontologies representation markup languages– OWL, DAML.	2

Lec 7	Ontology based communication. Inference techniques Ontology evolution. The alignment and the control algorithms	2
Lec 8	Metadata structures generating using network resources. Web Mining.	2
Lec 9	Web Intelligence – AI methods and techniques in web systems.	2
	Total hours	18

Form of classes - class		Number of hours
Cl 1		
Cl 2		
Cl 3

	Total hours	

Form of classes - seminar		Number of hours
Sem 1	Introduction to the course. Selection of topics.	1
Sem 2	Tools supporting the ontology creation.	1
Sem 3	Web services for the Semantic Web.	2
Sem 4	Agent-based technologies for the Semantic Web.	2
Sem 5	Semantic information retrieval.	2
Sem 6	Applications of Semantic Web exploiting technologies for knowledge acquisition and knowledge management.	1
	Total hours	9

TEACHING TOOLS USED
N1. Lectures with a slide show.

N2. Laboratory exercises in a computer lab.
N3. The lecturer consultation.
N4. Student's own work - preparation for the laboratory.
N5. Topic discussion and presentation at the seminar.
N6. Multimedia presentation at the seminar

EVALUATION OF SUBJECT EDUCATIONAL EFFECTS ACHIEVEMENT

Evaluation (F – forming (during semester), P – concluding (at semester end)	Educational effect number	Way of evaluating educational effect achievement
P - lecture	PEK_W01 – PEK_W03 PEK_K01 – PEK_K03	Exam
F - labolatory	PEK_U01 – PEK_U03 PEK_K01 - PEK_K03	implementation of the laboratory tasks, assessment of the completed tasks
F - seminar	PEK_W01 - PEK_W03 PEK_K01 - PEK_K03	presentation assessment prepared on a given topic

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

1 Knowledge, skills and competences acquired at Informatics field at second level of study until 3th semester

\

SUBJECT OBJECTIVES

C1 Preparing students to write a master thesis according the internal requirements in Informatics field at Faculty of Computer Science and Management, Wrocław University of Technology,
C2 Providing students with basic skills related to preparation and presentation of scientific texts, beginning from the choice of topic, selection of tasks to be performed, use of literature to interpretation of the results.

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:
…
relating to skills:
PEK_U01 He is able to acquire information from literature, databases and other sources, also in English or other language used for communication in Informatics field, is able to integrate the information obtained, interpret them, make critical evaluation and also draw conclusions and formulate and justify opinions related to prepared master thesis.
PEK_U02 He can communicate using a variety of techniques in his professional environment and in other environments, also in English or other foreign language used for communication in Informatics field and also to present the results of his master thesis

relating to social competences: …

Proj 2		
	Total hours	

Form of classes - seminar		**Number of hours**
Sem 1	Familiarization with the principles of master thesis realization at Informatics field. Rules related to student presentations. Determining the schedule of student presentations.	2
Sem 2	Review of basic skills related to preparation and presentation of scientific texts by students, beginning from the choice of topic, selection of tasks to be performed, use of literature and also how to write thesis and how obtained results should be interpret.	2
Sem 3 – Sem15	During semester each student has 2 presentations. The first presentation is related to the general view of the thesis topic, its placement in the literature and in the Informatics field. The student should present the primary aim of thesis, the state of art related to thesis topic, the concept of solution, the initial structure of thesis and timetable for further work. The purpose of the second presentation is preparation to defense and demonstrate presentation skills in English. The second presentation consists of two parts, namely, discussion of the results of the work	14

	in English and a short presentation in Polish devoted to the results of the thesis.	
	Total hours	18

TEACHING TOOLS USED

N1. Multimedia presentations
N2. Examples of scientific papers and reports from the field of computer science.
N3. E-Learning System used to publish teaching materials and announcements, also used for collection and evaluation of student work.

EVALUATION OF SUBJECT EDUCATIONAL EFFECTS ACHIEVEMENT

Evaluation (F – forming (during semester), P – concluding (at semester end)	Educational effect number	Way of evaluating educational effect achievement
P	PEK_U01 PEK_U02	Evaluation of the presentation of the work at the seminar and prepared documentation from the presentation. The evaluation shall be subject to the fulfillment of the requirements for the presentation, including its substantive scope, structure and organization of presentation, techniques of conversation, a form of presentation, compactness of presentation and conclusions reached. Participation in the discussions after presentation is also evaluated. In addition, the seminar leader is able to control the cooperation between supervisors and graduate students.

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

1. Basic mathematical knowledge for 1st level of studies.

2. Informatics knowledge background.
3. Algorithms knowledge background.

\

SUBJECT OBJECTIVES

C1 Acquiring knowledge about functions and significance of information systems in contemporary organizations
C2 Acquainting with the functions and development of information systems in information society
C3 Acquainting with the different methods of information retrieval by surfing the Web
C4 Recognizing the problems of passing of contemporary organizations to Internet space
C5 Obtainment of skills to analyze the literature from information systems area and to synthesize the contents from different sources
C6 Application of the obtained knowledge to presentation the problems from information systems area by means of using adequate tools

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:
PEK_W01 Familiarity with basic models of information systems
PEK_W02 Basic knowledge about Web information systems
PEK_W03 Familiarity with common multimedia technologies
PEK_W04 Understanding of the measures of information retrieval efficiency

relating to skills:
PEK_U01 Student can to build information query for different types of information needs
PEK_U02 Can to determine basic features of information system for given organization
PEK_U03Student be able to evaluate the precision of retrieved information
PEK_U04 Can to present basic features of given information system

relating to social competences:
PEK_K01 Can individually to use literature of the subject and to select useful information
PEK_K02 Student is convinced above positive role of information systems in stimulation of the civilization development

PROGRAMME CONTENT

	Form of classes - lecture	**Number of hours**
Lec 1	History of information systems development. Information processing. Theoretical basis of information systems. Automation of information flow in organization.	2
Lec 2	Functioning of information systems in computer networks. Information retrieval. Digital libraries.	2
Lec 3	Multimedia. Importance of multimedia technologies in information systems development. How societies embrace information technology.	2
Lec 4	Efficiency of information systems. Case study of chosen information system.	2

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

None.

\

SUBJECT OBJECTIVES

C1 Getting to know foundations of designing computer science decision support systems using general systemic methods which make it possible to apply unified approaches for analysis and decision making for decision support systems of different nature.
C2 Acquisition of skills to represent in the form of mathematical formulas of decision making plants treated as input-output plants.
C3 Acquisition of skills to analyze of decision making plants treated as input-output plants.
C4 Getting acquainted with methods and algorithms of multi-stage decision making.
C5 Acquisition of skills to apply dynamic programming method.
C6 Getting to know metods and algorithms of multi-criteria decision making.
C7 Acquisition of skills to use AHP method.

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:
PEK_W01 Student knows foundations of designing of decision support systems for any kind of plants.
PEK_W02 Student knows foundations of analysis and decision making for input-output plants with logic knowledge representation.
PEK_W03 Student knows selected method of multi-stage and multi-criteria decision making.
relating to skills:
PEK_U01 Student is able to elaborate a mathematical model for an input-output decision making plant in discrete state space as well as with logic knowledge representation.
PEK_U02 Student can solve analysis and decision making tasks for elementary plants with logic knowledge representation.
PEK_U03 Student is able to solve multi-stage decision making problem using Bellman's Principle and dynamic programming.
PEK_U04 Student can use AHP algorithm for the solution od multi-criteria decision making problem
relating to social competences:
PEK_K01 Student can take advantage of professional literature by oneself and can perform the critical analysis of information mined.
PEK_K02 Student can think creatively.

PROGRAMME CONTENT

Form of classes - lecture		**Number of hours**
Lec 1	Decision support systems – definitions, structures, problems, application of discrete state equations and logic expressions for representation of decision making plants.	2
Lec 2	Outline of logic-algebraic method and its application to solution of analysis and decision making for input-output decision making plants.	2
Lec 3	Decision making – definition, typology, logic-algebraic plant, Bellman's Principle and multi-stage decision making.	2
Lec 4	Multi-criteria decision making – Pareto sets, AHP method.	2
Lec 5	Examples of computer decision support systems.	1
	Total hours	9

Form of classes - class		**Number of hours**
Cl 1	Solution of numerical exercises concerning difference equations as well as propositional calculus.	2
Cl 2	Solution of numerical exercises concerning mathematical representations of input-output plants.	2
Cl 3	Solution of numerical exercises concerning analysis and decision making using logic-algebraic method.	2
Cl 4	Solution of numerical exercises concerning dynamic programming and AHP	2

	method.	
Cl 5	Final test.	1
	Total hours	9

Form of classes - laboratory		Number of hours
Lab 1		
Lab 2		
Lab 3		
Lab 4		
Lab 5		
…		
	Total hours	

Form of classes - project		Number of hours
Proj 1	Collecting of indispensable information about selected plant being the decision making plant.	2
Proj 2	Determination of mathematical model of selected decision making plant and decision making problem formulation as well as analysis of decision making plant using its mathematical model.	2
Proj 3	Choice of decision making method for further usage as well as elaboration of decision making algorithm.	2
Proj 4	Implementation and analysis of decision making algorithm.	2
Proj 5	Elaboration of conclusions and written report of the project performed.	1
	Total hours	9

Form of classes - seminar		Number of hours
Sem 1		
Sem 2		
Sem 3		
…		
	Total hours	

TEACHING TOOLS USED
N1 Lecture – traditional method. N2 Classes – traditional method. N3 Consultation. N4 Individual discussion with student. N5 Short test (10 mins.). N6 Self-contained work.

EVALUATION OF SUBJECT EDUCATIONAL EFFECTS ACHIEVEMENT

Evaluation (F – forming (during semester), P – concluding (at semester end)	Educational effect number	Way of evaluating educational effect achievement
F1	PEK_W02; PEK_W03; PEK_U01– PEK_U04	Short tests during the classes.
F2	PEK_K01– PEK_K02	Individual discussion with student during

		the project.
P (Classes)	PEK_W02; PEK_W03; PEK_U01–PEK_U04	Test.
P (Project)	PEK_U01–PEK_U04; PEK_K01–PEK_K02	Evaluation of written report of the project.
P (Lecture)	PEK_W01–PEK_W03; PEK_K02	Exam.

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

Knowledge of databases, object-oriented programming, computer systems and networks

\

SUBJECT OBJECTIVES

C1 To acquaint students with modern technologies implementation of information systems.
C2 Gaining knowledge about the techniques of implementation of information systems.

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:
PEK_W01 student has a basic understanding of the implementation of information systems
PEK_W02 student knows and understands the concept of implementation of information systems
PEK_W03 student is able to present the available technology to implement information system

relating to skills:
PEK_U01 student can freely select the method, tools and standards to address the problem of representation, search, information processing, information systems
PEK_U02 student is able to properly design and verify component system
PEK_U03 student is able to assess the usefulness of information systems interface

relating to social competences:
PEK_K01 student is able to find and use the recommended literature course and independently acquire knowledge
PEK_K02 student understands the need for systematic and independent work on mastery of course material

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

25. Has a basic knowledge of ICT systems and computer communication networks (K1INF_W11).
26. Knows the basic methods and tools for collecting, processing and retrieval of information and knowledge extraction (K1INF_W16)
27. Can use the right tools to build a simple model of the process (the object), to formulate specific task analysis and decision making (K1INF_U15)
28. Can effectively use the methods and tools for collecting, processing and retrieval of information and knowledge extraction (K1INF_U16)
29. It has the ability to self-education, including in order to improve the professional competence (K1INF_U05)
30. Understands the need and knows the possibility of lifelong learning and to improve their professional and social competences (K1INF_K01)

SUBJECT OBJECTIVES

C1. Ordered, underpinned by theoretical knowledge of methods and techniques for transmitting signals using different modulation techniques, methods and techniques of information transmission, methods of organization and management of data communications traffic in the tasks of design and analysis of communication systems, methods of delivering service quality of ICT systems, analysis of quantitative and qualitative requirements and methods for sizing of distributed IT systems.

C2. Skills about the differences and benefits of the use of analog and digital data transmission techniques, the differences and benefits of the use of wired and wireless signal transmission techniques, developing the concept of using wired and wireless technologies in the basic applications of ICT systems, defining the qualitative and quantitative requirements of the user information and communication systems range of data, designing ICT solutions needed to achieve the qualitative and quantitative requirements of the user, using standards and solutions available on the market, estimating the cost of preparing and maintaining ICT solutions needed to achieve the qualitative and quantitative requirements, designing modernization of IT solutions needed to achieve the qualitative and quantitative requirements, identifying differences and similarities between solutions in a variety of applications (e-health, e-government and e-learning, in real-time systems, etc.).

C3. Skills for the design and analysis of complex, distributed ICT systems providing network services for distributed computer communication systems.

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:

K2INF_W02: Has a structured, theoretically founded essential knowledge of business modeling and requirements specification systems.

K2INF_W03: Has a structured, theoretically founded essential knowledge in the delivery of information distributed systems

K2INF_W06: Achieves results in the category of knowledge for specialty data communications

relating to skills:

K2INF_U05: Can - in formulating and solving engineering tasks - integrate knowledge of the fields of science and scientific disciplines relevant to the study being studied and applied a systemic approach, taking into account the non-technical aspects

K2INF_U06: Can solve the modeling, analysis and decision making for different types of objects

K2INF_U08: Achieves results and skills in areas of data exchange and computer communications systems

relating to social competences:

K2INF_K01: Can think and act in a creative and enterprising

K2INF_K02: Has aware of the social role of technical graduating, especially understands the need for the formulation and communication to the public, especially through the mass media, information and opinion on the achievements of technology and other aspects of engineering, shall endeavor to provide such information and opinions in a widely understood the reasons for the different points of view

PROGRAMME CONTENT	
Form of classes - lecture	**Number**

		of hours
Lec 1	Classification of ICT systems from different points of view. Quality of Experience (QoE) and Quality of Service (QoS) in ICT systems with elastic and streaming traffic.	2
Lec 2	Introduction to queuing. Open and close networks of queues. Queuing models of circuit-switched and packet-switched computer communication systems. Burke's theorem and Kleinrock approximation.	2
Lec 3	Access control, flow control and routing tasks formulation and solution in distributed environments.	1
Lec 4	Requirements analysis	1
Lec 5	Models (Poisson, Markov modulated, self-similarity, etc) of teletraffic and its application in traffic engineering tasks.	1
Lec 6	QoS delivery concepts: best effort, integrated services and differentiated services	1
Lec 7	New concepts of systems and networks - NXGN (Next Generation Networks) i NWGN (New Generation Network). Summary.	1
	Total hours	9

PROGRAMME CONTENT		
Form of classes - project		**Number of hours**
Proj 1	Formulation design task based on the analysis of the literature, documentation, etc.	2
Proj 2	Justification for the choice task and purpose of the task design - an analysis of the expected benefits of the project task.	2
Proj 3	Quantitative and qualitative requirements analysis for the communication system under design	2
Proj 4	Analysis of state of the art on how to solve the task design and analysis and selection of the task design methodology	2
Proj 5	Tools (methods, algorithms, procedures, software and hardware) analysis and selection required for the implementation of the project task	2
Proj 6	Implementation of prototype of modules solve the task and prototype testing and evaluation	2
Proj 7	Modification of solutions using prototype test results	2
Proj 8	Integration of modules distinguished at the stages of requirements analysis and prototyping. Verification and testing of an integrated solution design task	2
Proj 9	Analysis of the possibility of extending the project tasks. Preparation of tfinal presentation and documentation of the design task. Presentation of the results of the design task	2
	Total hours	18

TEACHING TOOLS USED
N1. Traditional lecture supported by whole class multimedia presentations based on literature and open access and commercial sources.

N2. Student's own works – solving experiments and tasks in laboratory as well as homework.

N3. Student's own works – literature and open access sources studies.

N5. Collective works in laboratory

N5. Student's own works – preparation of presentations and technical documentations.

EVALUATION OF SUBJECT EDUCATIONAL EFFECTS ACHIEVEMENT		
Evaluation (F – forming (during semester), P – concluding (at semester end)	Educational effect number	Way of evaluating educational effect achievement
F1 (lecture)	K2INF_W03 K2INF_W04 K2INF_W06 K2INF_U05 K2INF_U06 K2INF_U08 K2INF_K01 K2INF_K02	Observation and verification of student activity. Solving the sample jobs.
F1 – F9 (project)	K2INF_W06 K2INF_U05 K2INF_U06 K2INF_U08 K2INF_K01	Checking the preparation of the student. Checking the presence of the student. Observation of student activity. Observation and assessment of student autonomy.
P (lecture)	K2INF_W03 K2INF_W04 K2INF_W06 K2INF_U05 K2INF_U06 K2INF_U08 K2INF_K01 K2INF_K02	Colloquium (course credit) in the evaluation of forming F1 (lecture)
P (project)	K2INF_U05 K2INF_U06 K2INF_U08 K2INF_K01	Total weighted ratings F1 – F9 (project) and the assessment for the presentation of the final results of the project.

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

1. Knowledge of mathematics and mathematical statistics

\

SUBJECT OBJECTIVES

C1 Introduce the methods and techniques of the statistical data analysis to students
C2 Gather knowledge for Knowledge Discovery (Data Mining)
C3 Applying the gathered knowledge to drawing conclusions based on data analysis

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:
PEK_W01 student has a basic knowledge of Knowledge Discovery (Data Mining)
PEK_W02 student has a basic knowledge of statistical data analysis
PEK_W03 student is able to present differences between parametric and non-parametric tests

relating to skills:
PEK_U01 student is able to choose a proper statistical test
PEK_U02 student is able to draw conclusion from data analysis
PEK_U03 student is able to select a proper data mining method

relating to social competences:
PEK_K01 student is able to search and reuse the primary and secondary literature listed below and is able to gather the proper knowledge
PEK_K02 student understands the need for systematic and individual work in order to cover the scope of the course

SUBJECT CARD

Name in Polish: **Zarządzanie projektem informatycznym**
Name in English: **Software Project Management**

Main field of study: Computer Science
Specialization: Designing IT Systems
Level and form of studies: 2nd level, part-time
Kind of subject: obligatory
Subject code: INZ4022
Group of courses: NO*

	Lecture	Classes	Laboratory	Project	Seminar
Number of hours of organized classes in University (ZZU)	30			30	
Number of hours of total student workload (CNPS)	120			90	
Form of crediting	Examination-/ ~~crediting with grade*~~	Examination / crediting with grade*	Examination-/ crediting with grade*	~~Examination~~ / crediting with grade*	Examination / crediting with grade*
For group of courses mark (X) final course					
Number of ECTS points	4			3	
including number of ECTS points for practical (P) classes	0			3	
including number of ECTS points for direct teacher-student contact (BK) classes	1.6			1.2	

*delete as applicable

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

1. Completing courses in data base and/or information system design
2. Completing courses in programming web and/or mobile systems

\

SUBJECT OBJECTIVES

C1 Familiarize students with modern methods for software project management.
C2 Acquiring knowledge of risk management and project quality assurance.
C3 Acquiring knowledge of team management and communication in IT projects.
C4 Gaining skills in work breakdown, planning, scheduling, cost estimation, and monitoring in IT projects.
C5 Gaining skills in utilizing software tools supporting IT project management.

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:
PEK_W01 student has a systematised knowledge concerning methods for software project management.
PEK_W02 student knows and understands the notions of risk and quality in IT project.
PEK_W03 student has a well-ordered and theoretically supported knowledge concerning team management and communication in IT project.

relating to skills:
PEK_U01 student can select and apply management methods appropriate for different phases of information system development.
PEK_U02 student is able to carry out work breakdown, allocate resources, work out schedule, estimate costs, monitor and report IT project accomplishment.
PEK_U03 student is able to select software supporting tools for software project management.

relating to social competences:
PEK_K01 student can retrieve and utilize information from recommended sources and acquire knowledge on his own.
PEK_K02 student understands the necessity of working systematically and creatively to accomplish the course
PEK_K03 student is able to manage a team accomplishing IT project

PROGRAMME CONTENT

Form of classes – lecture		**Number of hours**
Lec 1	Introduction. Basic notions	2
Lec 2	Work breakdown structure. Project planning	2
Lec 3	Earned value method	2
Lec 4	Risk management	2
Lec 5	Project size estimation	2
Lec 6	Project cost estimation	2
Lec 7	Project quality management	2
Lec 8	Team management and communication	2
Lec 9	Typology of supporting tools	2
	Total hours	18

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

Student has competence from the scope of bases of the computer science and bases of databases. Student has a knowledge in the scope of the designing and producing the software.

\

SUBJECT OBJECTIVES

C1 Educating the abilities of solving and understanding problems connected to all levels of data and database protection.
C2 Providing the knowledge of the evaluation and applying the cryptographic protection of databases and applying high technologies of the access and management policy with use confidence.
C3 Providing the knowledge of safety of the data warehouse and stream data systems
C4 Educating the abilities from the scope of particular methods of the protection of sensitive databases and the privacy protection.
C5 Educating the ability of assuring safety in statistical databases and databases in mobile systems
C6 Providing the knowledge in the scope of the systems design of databases assuring safety
C7 Providing the competences of implementation of algorithms and protection systems of databases

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:

PEK_W01 Student has a knowledge about designing and implementing the protection of databases on the different level of the model of the data protection

PEK_W02 Student has competence in of cryptographic methods applied in the data protection and databases,

PEK_W03 Student knows contemporary methods in assuring safety at data warehouses and in flow systems

PEK_W04 Student has the knowledge in the scope of the privacy protection and protections of sensitive databases

PEK_W05 Student knows principles of protection and algorithms applied in statistical databases and mobile data systems

PEK_W06 Student has an ability of designing safe databases,

relating to skills:

PEK_U01 Student is possessing skills of the evaluation of the state of the safety of the database

PEK_U02 Student has the abilities of noticing threats and applying suitable methods of the data protection

PEK_U03 Student is able to apply principles of protection of flow and mobile databases in practice

PEK_U04 Student is able to apply the safe data storage and the data recovery methods

PEK_U05 Student is possessing a skill of analysis, the design and the implementation of security systems in databases,

relating to social competences:

PEK_K01 Student is able to cooperate in team during the realization of protection systems of databases.

PEK_K02 Student is able to notice social and legal problems of applying methods of the protection of databases.

PEK_K03 Student has a skill of the independent and creative thinking with the respect for the law and of professional ethics.

PROGRAMME CONTENT

Form of classes - lecture		Number of hours
Lec 1	Introduction. Basic definitions. Information security, data security, safety of databases.	1
Lec 2	Basic model of the safety of databases. Physical security, politics of the protection, computer protection (l.c.).	1
Lec 3	Databases and cryptographic methods. Cryptographic schemes used in protecting databases (l.c.).	1
Lec 4	Advanced classical cryptographic schemes. Cryptographic protocols and the data security (l.c.).	1
Lec 5	An electronic signatures and systems of authenticating.	2
Lec 6	Models of the access control. The access policy and its realization (l.c.).	1
Lec 7	Managing the confidence and the negotiation of the confidence.	1
Lec 8	Structures of authentication indices in the outsourcing of databases. Safe and trusted databases (l.c.).	1
Lec 9	The management and encoded enquiries. The safety of the data warehouse and OLAP systems.	2
Lec 10	Safety of flow systems. Safe semantic Web networks. Safety of spatial databases (l.c.).	1
Lec 11	Concepts and techniques reengineering of safety. Watermarks of data and databases. Trusted retentions of records (l.c.).	1
Lec 12	Damaging and recovering databases. Systems of the storage and the data security (l.c.).	1
Lec 13	Medical databases and their safety. Ensuring the privacy and the safeguard against systems of the data mining (l.c.).	1
Lec 14	The privacy and the publication of data. Statistical databases. Anonymizing (l.c.).	1
Lec 15	Data security and of databases in mobile systems.	2

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

1. Knowledge of relational data model
2. Is able to develop database application with SQL language

3. Knowledge of mathematical logic (propositional, predicate calculus)

\

SUBJECT OBJECTIVES

C1 The development of students skills in building logical models
C2 To enhance students' knowledge about deduction methods used in deductive databases
C2 To learn how to practically apply best practices in deductive database design with Datalog language.

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:
PEK_W01 Is familiar with Datalog language
PEK_W02 Is able to present and compare usages of deduction methods used in deductive databases
PEK_W03 Knows methods of Datalog queries processing and optimization

relating to skills:
PEK_U01Is able to develop models of real world with Datalog language
PEK_U02 Is able to evaluate and eventually improve efficiency of Datalog queries.

relating to social competences:
PEK_K01Is able to work in and manager a small software development team

PROGRAMME CONTENT

Form of classes - lecture		**Number of hours**
Lec 1	Introduction to deductive databases	1
Lec 2	Classification of clauses	1
Lec 3	Principle of resolution	2
Lec 4	Logic programming (Prolog)	2
Lec 5	Prolog and the relation algebra	2
Lec 6	Introduction to Datalog	2
Lec 7	Datalog queries processing	2
Lec 8	Datalog optimization methods	2
Lec 9	Integrity constrains	1
Lec 10	Design of knowledge base	1
Lec 11	The quality of knowledge base	1
Lec 12	Test	1

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

1. Elementary knowledge of classical data models and database design methods
2. Elementary knowledge of chosen Database Management Systems (Oracle, DB2, MSSQL)

\

SUBJECT OBJECTIVES

C1 To enhance students knowledge about data storage and indexing methods.
C2 To enhance students knowledge about transactions management, data protection methods used in databases.
C3 To get familiarity of query processing and optimization methods.
C4 To obtain by students the ability of effective usage of features offered by modern Database Management Systems.

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:
PEK_W01 Is familiar with functions of components of DBMS and general DBMS architecture
PEK_W02 Is able to present and compare data storage, indexing, queries and transactions processing and optimization methods used in databases
PEK_W03 Is able to evaluate the possibility of usage BMDS features in particular application

relating to skills:
PEK_U01Is able to chose data storage and access methods appropriate for certain requirements.
PEK_U02 Is able to evaluate and eventually improve efficiency of database queries and transactions.

relating to social competences:
PEK_K01Is able to work in and manager a small software development team.
PEK_K02Is able to conduct proof-of concept, test and evaluate database systems available on the market.

PROGRAMME CONTENT

Form of classes - lecture		Number of hours
Lec 1	Introduction, DMBS architecture	1
Lec 2	External memory (devices, access time characteristics)	1
Lec 3	Storage methods for files of records	1
Lec 4	Data storage techniques 1. Heap files 2. Ordered files 3. Hashed files	3
Lec 5	Indexing 1. Index classification 2. Multilayered indexes (B-trees)	4

	3. Bitmap indexes	
Lec 6	Query processing and optimization 1. Query processing 2. Join algorithms (nested-loop, merge-join, hash-join) 3. Query optimization	4
Lec 7	Transactions management and data protection 1. Transaction serializability 2. Concurrent transactions execution 3. Transaction logs	3
Lec 8	Test	1
	Total hours	18

Form of classes - class		**Number of hours**
Cl 1		
Cl 2		
Cl 3

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

16. Practice in object-oriented programming.
17. Basic knowledge of software engineering.

\

SUBJECT OBJECTIVES

C1. Basic knowledge in the area of software system modeling with the stress on business modeling as the initial phase of the software development process.
C2. Basic knowledge in the area of the requirements specification.

SUBJECT EDUCATIONAL EFFECTS

Relating to knowledge:
PEK_W01: Students have basic knowledge on business modeling.
PEK_W02: Students know and understand the role of specification requirements.
PEK_W03: Students have basic knowledge on selected modeling languages.

Relating to skills:
PEK_U01: Students, in cooperation with domain experts, can construct and analyze business models.
PEK_U02: Students can build models of system requirements.

Relating to social competences:
PEK_K01: Students are able to cooperate with representatives of application domain.

PROGRAMME CONTENT		
Form of classes - lecture		**Number of hours**
Lec 1	Basic notions for software development cycle. Survey of modeling languages – UML and BPMN.	1
Lec 2	Class diagrams – classes, associations, generalizations.	2
Lec 3	Object Constraint Language.	2
Lec 4	BPMN process diagrams.	2
Lec 5	System requirements; use case diagrams.	2
	Total hours	9

Form of classes - class		Number of hours
Cl 1	Analysis of textual descriptions of exemplary application domains – structural aspect.	2
Cl 2	Construction and analysis of class diagrams.	2
Cl 3	Construction and analysis of class diagrams.	2
Cl 4	Construction and analysis of OCL constraints imposed on diagrams.	2
Cl 5	Case study – an example of structural modeling.	2
Cl 6	Test 1.	1
Cl 7	Construction and analysis of simple BPMN process diagrams.	2
Cl 8	Construction and analysis of advanced BPMN process diagrams.	2
Cl 9	Construction and analysis of use case diagrams.	2
Cl 10	Test 2.	1
	Total hours	18

TEACHING TOOLS USED

N1. Lecturer's presentation at a blackboard, supported by a multimedia presentation using a laptop and a projector.
N2. Individual search and study of literature and Internet sources.
N3. Access to teaching materials published in the local area network.
N4. Individual consultations.

EVALUATION OF SUBJECT EDUCATIONAL EFFECTS ACHIEVEMENT

Evaluation (F – forming (during semester), P – concluding (at semester end)	Educational effect number	Way of evaluating educational effect achievement
F1	PEK_W01 PEK_U01 PEK_K01	Each student gets 1 point for own solution of a problem from the list of problems for the given class.
F2	PEK_W01 PEK_W02 PEK_U01 PEK_U02 PEK_K01	Each student gets up to 10 points for own solution of problems for the given test (intermediate and final).
F3	PEK_W01 PEK_W02 PEK_W03 PEK_U01 PEK_U02 PEK_K01	The final evaluation for the classes is determined on the basis of total marks obtained by the student's activity for exercise (F1) and colloquia (F2). Positive mark is awarded to a student who has obtained at least 4 points for each of the symposia and has won a total of 10 points. If this condition is met, the number of points P is the basis for evaluation in accordance with the following table: P | 10 | 12 | 14 | 16 | 18

		<table><tr><td>Mark</td><td>3.0</td><td>3.5</td><td>4.0</td><td>4.5</td><td>5.0</td></tr></table> Students who get at least a very good grade are exempt from the examination with the same mark as for the classes.

C: The final evaluation of the course is determined based on the results of the examination. The examination lasts two hours and consists of a set of tasks, the total number of 20 points. The condition for a positive assessment of the final exam is to get 10 points and a positive final evaluation of the exercise.
The final evaluation of the examination is determined in accordance with the following table:

Points	10	12	14	16	18
Mark	3.0	3.5	4.0	4.5	5.0

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

Student has fundamental competence from the scope of the computer science and databases. Student has a knowledge in the scope of the designing and producing the software.

\

SUBJECT OBJECTIVES

C1 Educating the abilities of classification and representatives of multimedia data and their special properties associated with the system of perceiving information.
C2 Providing the knowledge of the multimedia data processing with the SQL and SQL/MM languages.
C3 Providing the knowledge of the modelling metadata and multimedia databases.
C4 Educating the abilities from the scope of architecture and productivities of multimedia databases.
C5 Educating the ability of text, graphical abilities of the data processing and the video in multimedia databases
C6 Providing the knowledge of the design multimedia databases
C7 Providing the competences of of the implementation algorithms and systems of multimedia databases.

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:
PEK_W01 Student has a knowledge about connected issues from classification and multimedia data representation
PEK_W02 Student has competence in the multimedia data processing with using the SQL and SQL/MM languages,
PEK_W03 Student knows contemporary models of multimedia databases,
PEK_W04 Student has the knowledge about the structure of multimedia databases and about ways of providing multimedia data for the conversion efficiency
PEK_W05 Student knows principles and algorithms of the text, graphical and video data processing in multimedia databases
PEK_W06 Student has an ability of designing safe multimedia databases,
relating to skills:
PEK_U01 Student is possessing skills of classification and multimedia data representations
PEK_U02 Student has the abilities of processing multimedia databases with using the SQL and SQL/MM languages
PEK_U03 Student knows and is able to apply models of multimedia databases,
PEK_U04 Student is able to assess the productivity of data processing in the multimedia database with the optimization and the productivity
PEK_U05 Student is possessing a skill of analysis, the design and the implementation of algorithms and systems of multimedia databases,
relating to social competences:
PEK_K01 Student is able to cooperate in team during the designing and implementing of multimedia databases.
PEK_K02 Student is able to notice social and legal problems of applying methods of the multimedia databases.
PEK_K03 Student has a skill of the independent and creative thinking with the respect for the law and of professional ethics.

PROGRAMME CONTENT

Form of classes - lecture	Number of hours

Lec 1	Introduction into multimedia databases. Basic definitions.	1
Lec 2	Multimedia data and the human receptor system.	1
Lec 3	Introduction into SQL queries in multimedia bases. Special ownerships of multimedia data and the specificity of processing them.	1
Lec 4	Modelling of multimedia bases (l.c). Using multimedia metadata.	1
Lec 5	Architecture and the productivity of multimedia databases.	1
Lec 6	Internet MRDBMS.	1
Lec 7	Text data in multimedia databases. Introduction into the image processing in multimedia databases (l.c.).	1
Lec 8	Advanced image and video processing in multimedia databases. Final test	2

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

1. Elementary knowledge of classical data models and database design methods
2. Knowledge object programming language
3. Knowledge object-oriented software design methods

\

SUBJECT OBJECTIVES

C1 To enhance students knowledge about modern database development trends and emerging new data models
C2 To learn how to practically apply object enhancements of relational databases and/or pure object-oriented databases
C3 To get familiarity with object-relational mapping tools (ORM).

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:

PEK_W01 Has a basic knowledge about emerging database trends.

PEK_W02 Is able to discuss the most important achievements in the area of modern database .

relating to skills:

PEK_U01Is able to choose and customise database implementation tools appropriate for certain requirements.

PEK_U02 Is able to design and implement pure object or object–relational database.

relating to social competences:

PEK_K01Is able to work in and manager a small software development team.

PEK_K02Is able to prepare and present speech based on self studies.

PROGRAMME CONTENT

Form of classes - lecture		Number of hours
Lec 1	Introduction, modern database trends	2
Lec 2	ORM tools	2
Lec 3	Object enhancements of relation databases	1
Lec 4	Object databases	1
Lec 5	Columnar databases	1
Lec 6	Big Data and noSQL	1
Lec 7	Test	1
	Total hours	9

Form of classes - class		Number of hours
Cl 1		
Cl 2		
Cl 3		
Cl 4		
..		
	Total hours	

Form of classes - laboratory		Number of hours
Lab 1	Introduction to assigned ORM environment	2
Lab 2	Configuration of ORM environment and modification of sample project	2
Lab 3	Developing of simple object-oriented queries for sample project	2
Lab 4	Developing of complex, aggregating queries for sample project	2
Lab 5	Introducing of simple changes in mapping descriptor and database schema	2
Lab 6	Introducing generalization relation in mapping descriptor and database schema	2
Lab 7	Developing of transactions over sample schema	2
Lab 8	Design of individual database application with ORM layer	2
Lab 9	Development of individual database application with ORM layer	2

	Total hours	18

Form of classes - project		Number of hours
Proj 1		
Proj 2		
Proj 3		
Proj 4		
Proj 5		
...		
	Total hours	30

Form of classes - seminar		Number of hours
Sem 1	Introduction, Subject and term assignment	2
Sem 2-Sem 8	Individual presentations prepared by students on topics related to ORM, XML, CEP, in-memory and columnar databases	7
	Total hours	9

TEACHING TOOLS USED
N1. Lecture N2. Individual consultations N3. The course web page with references to literature N4. Software development tools N5. Sample ORM application N6. Sample ORM layer configuration

EVALUATION OF SUBJECT EDUCATIONAL EFFECTS ACHIEVEMENT

Evaluation (F – forming (during semester), P – concluding (at semester end)	Educational effect number	Way of evaluating educational effect achievement
F1	PEK_U01-02, PEK_K01	Evaluation of the simply ORM enhancements [30 points] (Lab3-5)
F2	PEK_U01-02, PEK_K01	Evaluation of the complex ORM enhancements [30 points] (Lab6-8)
F3	PEK_U01-02, PEK_K01	Evaluation of the individual project with ORM [30 points] (Lab9-10)
F4	PEK_U01-02, PEK_K01	Evaluation of the individual project with ORDBMS [30 points] (Lab12-13)
P1	PEK_U01-02, PEK_K01	P1 is based on the sum of the points from F1…F4. At least 50% of points is required.
P2	PEK_U01	P2 is based on quality of seminar presentation.
P3	PEK_W01-02	P3 is based on the result of a written test covering material presented during lectures. At least 50% of points is required to pass the test.

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

1 Knowledge, skills and competences acquired at Informatics field at second level of study until 3th semester

\

SUBJECT OBJECTIVES

C1 Preparing students to write a master thesis according the internal requirements in Informatics field at Faculty of Computer Science and Management, Wrocław University of Technology,

C2 Providing students with basic skills related to preparation and presentation of scientific texts, beginning from the choice of topic, selection of tasks to be performed, use of literature to interpretation of the results.

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:

…

relating to skills:

PEK_U01 He is able to acquire information from literature, databases and other sources, also in English or other language used for communication in Informatics field, is able to integrate the information obtained, interpret them, make critical evaluation and also draw conclusions and formulate and justify opinions related to prepared master thesis.

PEK_U02 He can communicate using a variety of techniques in his professional environment and in other environments, also in English or other foreign language used for communication in Informatics field and also to present the results of his master thesis

relating to social competences:

…

Form of classes - seminar	**Number of hours**

Sem 1	Familiarization with the principles of master thesis realization at Informatics field. Rules related to student presentations. Determining the schedule of student presentations.	2
Sem 2	Review of basic skills related to preparation and presentation of scientific texts by students, beginning from the choice of topic, selection of tasks to be performed, use of literature and also how to write thesis and how obtained results should be interpret.	2
Sem 3 – Sem15	During semester each student has 2 presentations. The first presentation is related to the general view of the thesis topic, its placement in the literature and in the Informatics field. The student should present the primary aim of thesis, the state of art related to thesis topic, the concept of solution, the initial structure of thesis and timetable for further work. The purpose of the second presentation is preparation to defense and demonstrate presentation skills in English. The second presentation consists of two parts, namely, discussion of the results of the work in English and a short presentation in Polish devoted to the results of the thesis.	14
	Total hours	18

TEACHING TOOLS USED

N1. Multimedia presentations
N2. Examples of scientific papers and reports from the field of computer science.
N3. E-Learning System used to publish teaching materials and announcements, also used for collection and evaluation of student work.

EVALUATION OF SUBJECT EDUCATIONAL EFFECTS ACHIEVEMENT

Evaluation (F – forming (during semester), P – concluding (at semester end)	Educational effect number	Way of evaluating educational effect achievement
P	PEK_U01 PEK_U02	Evaluation of the presentation of the work at the seminar and prepared documentation from the presentation. The evaluation shall be subject to the fulfillment of the requirements for the presentation, including its substantive scope, structure and organization of presentation, techniques of conversation, a form of presentation, compactness of presentation and conclusions reached. Participation in the discussions after presentation is also evaluated. In addition, the seminar leader is able to control the cooperation between supervisors and graduate students.

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

1. Basic mathematical knowledge for 1st level of studies.

2. Informatics knowledge background.
3. Algorithms knowledge background.

\

SUBJECT OBJECTIVES

C1 Acquiring knowledge about functions and significance of information systems in contemporary organizations
C2 Acquainting with the functions and development of information systems in information society
C3 Acquainting with the different methods of information retrieval by surfing the Web
C4 Recognizing the problems of passing of contemporary organizations to Internet space
C5 Obtainment of skills to analyze the literature from information systems area and to synthesize the contents from different sources
C6 Application of the obtained knowledge to presentation the problems from information systems area by means of using adequate tools

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:
PEK_W01 Familiarity with basic models of information systems
PEK_W02 Basic knowledge about Web information systems
PEK_W03 Familiarity with common multimedia technologies
PEK_W04 Understanding of the measures of information retrieval efficiency

relating to skills:
PEK_U01 Student can to build information query for different types of information needs
PEK_U02 Can to determine basic features of information system for given organization
PEK_U03Student be able to evaluate the precision of retrieved information
PEK_U04 Can to present basic features of given information system

relating to social competences:
PEK_K01 Can individually to use literature of the subject and to select useful information
PEK_K02 Student is convinced above positive role of information systems in stimulation of the civilization development

PROGRAMME CONTENT

	Form of classes - lecture	**Number of hours**
Lec 1	History of information systems development. Information processing. Theoretical basis of information systems. Automation of information flow in organization.	2
Lec 2	Functioning of information systems in computer networks. Information retrieval. Digital libraries.	2
Lec 3	Multimedia. Importance of multimedia technologies in information systems development. How societies embrace information technology.	2
Lec 4	Efficiency of information systems. Case study of chosen information system.	2
Lec 5	Test	1

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

1. Student has fundamental competence from the scope of the computer science and databases.
2. Student has a knowledge in the scope of the designing and producing methods of the software database systems.

\

SUBJECT OBJECTIVES

C1.Get to know the issues of information retrieval systems.

C2. Learn how to design information retrieval systems.

C3. Knowledge of classical methods of information retrieval in text online databases

C4. Acquiring the ability to modify the classical methods of information retrieval.

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:

PEK_W01 - Student has a knowledge about connected issues from an understanding of information retrieval system

PEK_W02 – Student has knowledge of the classical methods of information retrieval in text online databases.

PEK_W03 – Student knows the rules of indexing documents

PEK_W04 – Student has knowledge of the possibility of modifying the classical methods of information retrieval

PEK_W05 – Student knows the ranking method documents

PEK_W06 – Student knows methods of document indexing

PEK_W07 – Student knows the basic information retrieval models

PEK_W08 – Student knows the basic methods of information retrieval

PEK_W09 – Student knows the measure of the effectiveness of information retrieval systems

PEK_W10 - Student has knowledge about the use of neural networks and the Semantic Web to information retrieval

PEK_W11 – Student has knowledge of the automatic processing of texts

PEK_W12 – Student knows methods of text and data mining, information retrieval on the Internet.

relating to skills:

PEK_U01 - student is able to correctly use the terminology associated with information retrieval

PEK_U02 - the student is able to apply classical methods of information retrieval and can be modified

PEK_U03 - the student can choose the model of information retrieval system

PEK_U04 - the student is able to implement methods of information retrieval

PEK_U05 - the student is able to implement the chosen method of indexing documents

PEK_U06 - the student is able to design and implement a simple text search engine

PEK_U07 - the student is able to carry out testing methods for ranking documents

PEK_U08 - the student is able to propose and carry out experiments to search for information online.

relating to social competences:

PEK_K01 Student is able to cooperate in team during the designing and implementing of information retrieval system.

PEK_K02 Student is able to notice social and legal problems of applying methods of information retrieval system.

PEK_K03 Student has a skill of the independent and creative thinking with the respect for the law and of professional ethics.

PROGRAMME CONTENT

Form of classes - lecture		Number of hours
Lec 1	Introduction into information retrieval systems. Basic definitions. Basic concepts and terminology in the field of information retrieval systems.	1
Lec 2	Information retrieval in text databases.	1
Lec 3	Models of information retrieval systems.	2
Lec 4	Methods of information retrieval	1
Lec 5	Indexing documents.	1
Lec 6	Neural networks in an information retrieval system. Semantic Web in an information retrieval.	1
Lec 7	Measures of the effectiveness of information retrieval systems	1
Lec 8	Information retrieval on the Internet.	1

	Total hours	9

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

None.

\

SUBJECT OBJECTIVES

C1 Getting to know foundations of designing computer science decision support systems using general systemic methods which make it possible to apply unified approaches for analysis and decision making for decision support systems of different nature.

C2 Acquisition of skills to represent in the form of mathematical formulas of decision making plants treated as input-output plants.
C3 Acquisition of skills to analyze of decision making plants treated as input-output plants.
C4 Getting acquainted with methods and algorithms of multi-stage decision making.
C5 Acquisition of skills to apply dynamic programming method.
C6 Getting to know metods and algorithms of multi-criteria decision making.
C7 Acquisition of skills to use AHP method.

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:
PEK_W01 Student knows foundations of designing of decision support systems for any kind of plants.
PEK_W02 Student knows foundations of analysis and decision making for input-output plants with logic knowledge representation.
PEK_W03 Student knows selected method of multi-stage and multi-criteria decision making.
relating to skills:
PEK_U01 Student is able to elaborate a mathematical model for an input-output decision making plant in discrete state space as well as with logic knowledge representation.
PEK_U02 Student can solve analysis and decision making tasks for elementary plants with logic knowledge representation.
PEK_U03 Student is able to solve multi-stage decision making problem using Bellman's Principle and dynamic programming.
PEK_U04 Student can use AHP algorithm for the solution od multi-criteria decision making problem
relating to social competences:
PEK_K01 Student can take advantage of professional literature by oneself and can perform the critical analysis of information mined.
PEK_K02 Student can think creatively.

PROGRAMME CONTENT

Form of classes - lecture		**Number of hours**
Lec 1	Decision support systems – definitions, structures, problems, application of discrete state equations and logic expressions for representation of decision making plants.	2
Lec 2	Outline of logic-algebraic method and its application to solution of analysis and decision making for input-output decision making plants.	2
Lec 3	Decision making – definition, typology, logic-algebraic plant, Bellman's Principle and multi-stage decision making.	2
Lec 4	Multi-criteria decision making – Pareto sets, AHP method.	2
Lec 5	Examples of computer decision support systems.	1
	Total hours	9

Form of classes - class		**Number of hours**
Cl 1	Solution of numerical exercises concerning difference equations as well as propositional calculus.	2
Cl 2	Solution of numerical exercises concerning mathematical representations of input-output plants.	2
Cl 3	Solution of numerical exercises concerning analysis and decision making using logic-algebraic method.	2
Cl 4	Solution of numerical exercises concerning dynamic programming and AHP method.	2
Cl 5	Final test.	1

	Total hours	9

Form of classes - laboratory		Number of hours
Lab 1		
Lab 2		
Lab 3		
Lab 4		
Lab 5		
…		
	Total hours	

Form of classes - project		Number of hours
Proj 1	Collecting of indispensable information about selected plant being the decision making plant.	2
Proj 2	Determination of mathematical model of selected decision making plant and decision making problem formulation as well as analysis of decision making plant using its mathematical model.	2
Proj 3	Choice of decision making method for further usage as well as elaboration of decision making algorithm.	2
Proj 4	Implementation and analysis of decision making algorithm.	2
Proj 5	Elaboration of conclusions and written report of the project performed.	1
	Total hours	9

Form of classes - seminar		Number of hours
Sem 1		
Sem 2		
Sem 3		
…		
	Total hours	

TEACHING TOOLS USED
N1 Lecture – traditional method. N2 Classes – traditional method. N3 Consultation. N4 Individual discussion with student. N5 Short test (10 mins.). N6 Self-contained work.

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

31. Has a basic knowledge of ICT systems and computer communication networks (K1INF_W11).
32. Knows the basic methods and tools for collecting, processing and retrieval of information and knowledge extraction (K1INF_W16)
33. Can use the right tools to build a simple model of the process (the object), to formulate specific task analysis and decision making (K1INF_U15)
34. Can effectively use the methods and tools for collecting, processing and retrieval of information and knowledge extraction (K1INF_U16)
35. It has the ability to self-education, including in order to improve the professional competence (K1INF_U05)
36. Understands the need and knows the possibility of lifelong learning and to improve their professional and social competences (K1INF_K01)

SUBJECT OBJECTIVES

C1. Ordered, underpinned by theoretical knowledge of methods and techniques for transmitting signals using different modulation techniques, methods and techniques of information transmission, methods of organization and management of data communications traffic in the tasks of design and analysis of communication systems, methods of delivering service quality of ICT systems, analysis of quantitative and qualitative requirements and methods for sizing of distributed IT systems.

C2. Skills about the differences and benefits of the use of analog and digital data transmission techniques, the differences and benefits of the use of wired and wireless signal transmission techniques, developing the concept of using wired and wireless technologies in the basic applications of ICT systems, defining the qualitative and quantitative requirements of the user information and communication systems range of data, designing ICT solutions needed to achieve the qualitative and quantitative requirements of the user, using standards and solutions available on the market, estimating the cost of preparing and maintaining ICT solutions needed to achieve the qualitative and quantitative requirements, designing modernization of IT solutions needed to achieve the qualitative and quantitative requirements, identifying differences and similarities between solutions in a variety of applications (e-health, e-government and e-learning, in real-time systems, etc.).

C3. Skills for the design and analysis of complex, distributed ICT systems providing network services for distributed computer communication systems.

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:

K2INF_W02: Has a structured, theoretically founded essential knowledge of business modeling and requirements specification systems.

K2INF_W03: Has a structured, theoretically founded essential knowledge in the delivery of information distributed systems

K2INF_W06: Achieves results in the category of knowledge for specialty data communications

relating to skills:

K2INF_U05: Can - in formulating and solving engineering tasks - integrate knowledge of the fields of science and scientific disciplines relevant to the study being studied and applied a systemic approach, taking into account the non-technical aspects

K2INF_U06: Can solve the modeling, analysis and decision making for different types of objects

K2INF_U08: Achieves results and skills in areas of data exchange and computer communications systems

relating to social competences:

K2INF_K01: Can think and act in a creative and enterprising

K2INF_K02: Has aware of the social role of technical graduating, especially understands the need for the formulation and communication to the public, especially through the mass media, information and opinion on the achievements of technology and other aspects of engineering, shall endeavor to provide such information and opinions in a widely understood the reasons for the different points of view

PROGRAMME CONTENT		
Form of classes - lecture		**Number of hours**
Lec 1	Classification of ICT systems from different points of view. Quality of Experience (QoE) and Quality of Service (QoS) in ICT systems with elastic and streaming traffic.	2
Lec 2	Introduction to queuing. Open and close networks of queues. Queuing models of circuit-switched and packet-switched computer communication systems. Burke's theorem and Kleinrock approximation.	2
Lec 3	Access control, flow control and routing tasks formulation and solution in distributed environments.	1
Lec 4	Requirements analysis	1
Lec 5	Models (Poisson, Markov modulated, self-similarity, etc) of teletraffic and its application in traffic engineering tasks.	1
Lec 6	QoS delivery concepts: best effort, integrated services and differentiated services	1
Lec 7	New concepts of systems and networks - NXGN (Next Generation Networks) i NWGN (New Generation Network). Summary.	1
	Total hours	9

PROGRAMME CONTENT	
Form of classes - project	**Number**

		of hours
Proj 1	Formulation design task based on the analysis of the literature, documentation, etc.	2
Proj 2	Justification for the choice task and purpose of the task design - an analysis of the expected benefits of the project task.	2
Proj 3	Quantitative and qualitative requirements analysis for the communication system under design	2
Proj 4	Analysis of state of the art on how to solve the task design and analysis and selection of the task design methodology	2
Proj 5	Tools (methods, algorithms, procedures, software and hardware) analysis and selection required for the implementation of the project task	2
Proj 6	Implementation of prototype of modules solve the task and prototype testing and evaluation	2
Proj 7	Modification of solutions using prototype test results	2
Proj 8	Integration of modules distinguished at the stages of requirements analysis and prototyping. Verification and testing of an integrated solution design task	2
Proj 9	Analysis of the possibility of extending the project tasks. Preparation of tfinal presentation and documentation of the design task. Presentation of the results of the design task	2
	Total hours	18

TEACHING TOOLS USED
N1. Traditional lecture supported by whole class multimedia presentations based on literature and open access and commercial sources.
N2. Student's own works – solving experiments and tasks in laboratory as well as homework.
N3. Student's own works – literature and open access sources studies.
N5. Collective works in laboratory
N5. Student's own works – preparation of presentations and technical documentations.

EVALUATION OF SUBJECT EDUCATIONAL EFFECTS ACHIEVEMENT		
Evaluation (F – forming (during semester), P – concluding (at semester end)	Educational effect number	Way of evaluating educational effect achievement
F1 (lecture)	K2INF_W03 K2INF_W04 K2INF_W06 K2INF_U05 K2INF_U06 K2INF_U08 K2INF_K01 K2INF_K02	Observation and verification of student activity. Solving the sample jobs.
F1 – F9 (project)	K2INF_W06	Checking the preparation of the student. Checking

	K2INF_U05 K2INF_U06 K2INF_U08 K2INF_K01	the presence of the student. Observation of student activity. Observation and assessment of student autonomy.
P (lecture)	K2INF_W03 K2INF_W04 K2INF_W06 K2INF_U05 K2INF_U06 K2INF_U08 K2INF_K01 K2INF_K02	Colloquium (course credit) in the evaluation of forming F1 (lecture)
P (project)	K2INF_U05 K2INF_U06 K2INF_U08 K2INF_K01	Total weighted ratings F1 – F9 (project) and the assessment for the presentation of the final results of the project.

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

1. Knowledge of mathematics and mathematical statistics

\

SUBJECT OBJECTIVES

C1 Introduce the methods and techniques of the statistical data analysis to students
C2 Gather knowledge for Knowledge Discovery (Data Mining)
C3 Applying the gathered knowledge to drawing conclusions based on data analysis

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:
PEK_W01 student has a basic knowledge of Knowledge Discovery (Data Mining)
PEK_W02 student has a basic knowledge of statistical data analysis
PEK_W03 student is able to present differences between parametric and non-parametric tests

relating to skills:
PEK_U01 student is able to choose a proper statistical test
PEK_U02 student is able to draw conclusion from data analysis
PEK_U03 student is able to select a proper data mining method

relating to social competences:
PEK_K01 student is able to search and reuse the primary and secondary literature listed below and is able to gather the proper knowledge
PEK_K02 student understands the need for systematic and individual work in order to cover the scope of the course

PROGRAMME CONTENT

Form of classes - lecture		**Number of hours**
Lec 1	Introduction to knowledge discovery	2
Lec 2	Classification and Data Clustering	2
Lec 3	Clustering Algorithms	2
Lec 4	Statistics - basic notions	2
Lec 5	The selected problems of estimation theory	2
Lec 6	Parametric tests for one population	2
Lec 7	Non-parametric tests for one population	2
Lec 8	Parametric tests for two populations	2

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

1. Knowledge of elementary data models and database design methods
2. Elementary knowledge of Database architectures
3. Elementary knowledge of SQL

\

SUBJECT OBJECTIVES

C1 To enhance students' knowledge about modern data models
C2 To learn how to practically apply modern data models in advanced database applications

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:
PEK_W01 Has a basic knowledge about advanced data models
PEK_W02 Is able to present and compare usages of advanced data models
PEK_W03 Is able to evaluate suitability of advanced data model in particular application
…
relating to skills:
PEK_U01Is able to choose proper data model meeting concrete requirements
PEK_U02 Is able to prepare proof of concept for advanced database application

…
relating to social competences:
PEK_K01Is able to work in and manage a small software development team

PROGRAMME CONTENT		
Form of classes - lecture		**Number of hours**
Lec 1	Introduction to advanced database models	1
Lec 2	Active databases	1
Lec 3	Temporal databases	2
Lec 4	Data stream management	1
Lec 5	Complex event processing	1
Lec 6	Semistructural data storage	2
Lec 7	Semistructural data processing	1
Lec 8	Query languages for semistructural data	1
Lec 9	Spatial data storage and processing	2
Lec 10	Multidimensional data	1
Lec 11	Physical storage of multidimensional data	1
Lec 12	Distributed database systems	1
Lec 13	Distributed transactional processing	1
Lec 14	Cloud databases	1
Lec 15	Test	1

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

1. Knowledge of project management topics.
2. Knowledge of software development methodologies: traditional and agile.
3. Ability to write technical papers

\

SUBJECT OBJECTIVES

C1 To familiarize students with the entirety of issues related to the selection, purchase, implementation and operation of information systems for business organizations with particular emphasis on the legal requirements for public contracts and the protection of personal data. Explanation of the possibilities offered by new technologies for business information systems especially those offered by the Internet.

C2 To familiarize students with technologically advanced systems, analyzing real life example systems and discussing problems in their implementation and operation. Mastering ability to analyze information needs and choosing an appropriate system, taking into account both functional and non functional requirements.

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:

PEK_W01 Knowledge of standard solutions used in the current information systems.

PEK_W02 Knowledge of the legal status required for the selection, implementation and operation of business information systems

PEK_W03 Knowledge of the capabilities and limitations of the use of new hardware and software solutions in the implementation of information systems.

relating to skills:

PEK_U01 Selection of information system for the fulfilling needs of an enterprise.

PEK_U02 Assessing the suitability of modern technology solutions.

PEK_U02 Interpretation of legal provisions on the selection and operation of information systems.

relating to social competences:

PEK_K01 Ability to negotiate contract for an information system for an enterprise.

PROGRAMME CONTENT

Form of classes - lecture		**Number of hours**
Lec 1	Business Information Systems: classification, the influence of Internet.	2
Lec 2	Legal aspects of information systems: data protection, copyright law, public procurement law, Patent information: available services, search techniques.	2
Lec 3	Cloud computing: technology, legal aspects, applications.	2
Lec 4	Automatic Identification Technology: biometrics, product identification (bar codes one-and two-dimensional, RFID)	2
Lec 5	Security of operations on the Internet: the open key cryptography, digital signature, accreditation centers, watermarks, Financial operations of the Internet: banking, secure payment systems, e-accounting	2
Lec 6	Advertising: traditional techniques, media houses, use of the internet, SEO.	2
Lec 7	Software and data quality of information systems: quality measures, system selection methodology.	2
Lec 8	Case study: discussion of the ERP system (e.g. SAP ERP) system implementation or Risk Management (e.g. SAP BI).	2
Lec 9	Final test.	2
	Total hours	18

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

1. Introduction to information search.
2. Processing of multimedia data.
3. Fundamentals of natural language processing.

\

SUBJECT OBJECTIVES

C1 Getting familiar with the current state and development tends of Internet search engines.
C2 2 Ability to search for a given topic, extracting and aggregating information and preparing a multimedia presentation.
C3 Ability to select and evaluate available software, to conduct studies aiming at measuring the effectiveness of the information retrieval and comprehensive presentation of obtained results.

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:
PEK_W01 Understanding the current state of Internet search engines and their development trends.
PEK_W02 Getting familiar with advanced information technologies applicable in a retrieval system

relating to skills:
PEK_U01 Presenting own conclusions on the basis of information aggregated from different sources.
PEK_U02 Presenting own conclusions from the conducted tests and experiments .

PROGRAMME CONTENT

Form of classes - lecture		Number of hours
Lec 1	Typology of Internet search engines.	1
Lec 2	Extraction of data from the Internet.	2
Lec 3	Tools for indexing and searching of texts.	2
Lec 4	Statistical and semantic measures of texts similarity, Clustering of Web Pages	2
Lec 5	Using the links between the pages to influence their ranking	2
Lec 6	The structure of a web search engine.	1
Lec 7	Using XML, Content syndication and aggregation.	2
Lec 8	Advanced usage of natural language, Generating answers.	2
Lec 9	Searching for multimedia data, Behavioral search.	2
Lec 10	Final test.	2

Number of hours of organized classes in University (ZZU)	18			18	
Number of hours of total student workload (CNPS)	120			90	
Form of crediting	Examination	Examination / crediting with grade*		Crediting with grade*	Examination / crediting with grade*
For group of courses mark (X) final course					
Number of ECTS points	4			3	
including number of ECTS points for practical (P) classes	0			3	

including number of ECTS points for direct teacher-student contact (BK) classes	1,6			1,2	

*delete as applicable

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

1. Knowledge of fundamentals in databases
2. Knowledge about general profile of information system design
3. Practice in any programming language

……

\

SUBJECT OBJECTIVES

C1 Acquaintance with basics and problems of integration of the recent information systems

C2 Introduction to the problematic of data structure modelling and process design for IT system integration

C3 Practical skill in design and prototyping of IT system integration by means of usable software components and libraries

…….

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:

PEK_W01 Knowledge about basic problems and architectures of integration solutions for IT systems

PEK_W02 Knowledge about modelling of business processes related to IT system integration

PEK_W03 Knowledge about features and limitations in structure modelling for data exchange based on XML

PEK_W04 Knowledge about web services and ESB (Enterprise Service Bus)

……

relating to skills:

PEK_U01 Modelling of integration processes by means of BPMN

EK_U02 Modelling and conversion of structures for data exchange using XML

PEK_U03 Implementation of the software system for integration of various independent, external IT systems using web services and ESB

PROGRAMME CONTENT

Form of classes - lecture		Number of hours
Lec 1	Organisational issues. Introduction to information system integration. Business process modelling by means of BPMN	2
Lec 2	BPMN in IT system integration. Analysis of use cases for business processes	2
Lec 3	XML family. Components and structure of XML documents EDI. XML Schema, part I. XML Schema, part II. Limitation of XML schema	3
Lec 4	XPath	2
Lec 5	XSLT	2
Lec 6	RPC, Cobra, DCOM, RMI, web services. UDDI, WSDL, SOAP	2

Lec 7	Recent examples of large scale integration projects in Poland, e.g. in health care	1
Lec 8	Architecture of ESB. Features and components of ESB, BPEL. Use cases and the market for ESB.	3
	Total hours	18

Form of classes - Project		**Number of hours**
Proj 1	Safety training, splitting into 2-person groups, subject selection, preliminary analysis of subjects. Architecture of systems being integrated, identification of basic business processes.	2
Proj 2	Integration processes modelling by means of selected tools e.g. *Bizagi Process Modeler*	2
Proj 3	Modelling of data exchange structures based on XML	2
Proj 4	Structure mapping (conversion), XSLT, data presentation in web browsers	2
Proj 5	Introduction to web services, use cases analysis. Simple web services. New functionalities of web services, REST	2
Proj 6	WSDL, SOAP	2
Proj 7	Installation and preparation of the ESB framework, e.g. Mule. Implementation of two agents in ESB	2
Proj 8	Extension to other agents using various transportation methods. Project extension to external connectors.	2
Proj 9	Presentation of integration ESB to other students	2
	Total hours	18

TEACHING TOOLS USED

N1. Multimedia presentations for lectures
N2. Individual consultations of the supervisor for each student team at the computer, excludes presentation to other students
N3. Student multimedia presentation to other groups
N4. Online e-learning service (Moodle) for communication and advances verification for the entire course (Stopka4)

EVALUATION OF SUBJECT EDUCATIONAL EFFECTS ACHIEVEMENT

Evaluation (F – forming (during semester), P – concluding (at semester end)	Educational effect number	Way of evaluating educational effect achievement
F1 – assessment of integration architecture, integration business processes and XML structures	PEK_U01 PEK_U02	Talks with individual student teams during each meeting, student presentation at Proj3.
F2 – assessment of ESB	PEK_U03	Talks with individual student teams during each meeting, student presentation at Proj15.
P1 – the final lecture grade (exam)	PEK_W01 PEK_W02 PEK_W03	Multiple choice test

	PEK_W04	
P2 – the final laboratory grade	PEK_U01 PEK_U02 PEK_U03	The final grade aggregates the component grades.

Form of crediting	crediting with grade				crediting with grade
For group of courses mark (X) final course					
Number of ECTS points	3				1
including number of ECTS points for practical (P) classes					
including number of ECTS points for direct teacher-student contact (BK) classes	1,2				0,4

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

1. Knowledge of creating Web-based systems
2. Basic knowledge of databases and SQL

SUBJECT OBJECTIVES

C1. Introduce students with the basic aspects of the Third Generation Web (Web3.0).

C2. Acquaint students with the use of semantic metadata in creating intelligent Web applications.

C3. Train the ability to find answers to questions based on resources that are not available via traditional web search engines.

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:

PEK_W01 Knowledge of basic issues concerning metadata processing and Semantic Web.

PEK_W02 Knowledge that enables the characterization of basic web ontologies and intelligent semantic services.

PEK_W03 Knowledge of ontologies management and metadata applications in information systems.

relating to skills:

PEK_U01 Designing and presenting application for processing semantic metadata.

PEK_U02 Prototyping new solutions based on available components and libraries.

relating to social skills:

PEK_K01 Ability to defend own ideas and designs.

PROGRAMME CONTENT

Form of classes - lecture		Number of hours
Wy1	Evolution of the Web: Web 1.0, Web 2,0, Web 3.0	2
Wy2	Tima Berners'a-Lee visions: Semantic Web and Linked Data	1
Wy3	RDF – base standard for Semantic Web.	1
Wy4	RDF Notations: RDF/XML, Notation 3, Turtle, N-Triples	1
Wy5	Popular ontologies: DOAP, DC, FOAF, SIOC, SKOS, UMBEL, GoodRelations	1
Wy6	Top-level ontologies: Cyc, BFO, DOLCE, WordNet, SUMO,	1
Wy7	Describing languages for ontologies and rules: OWL, CycL, KIF, RIF, SWRL	1
Wy8	Semantic enrichment of HTML: eRDF, GRDDL, Microdata, Microformats, RDFa	2
Wy9	Dbpedia – semantic version of Wikipedia and semantic browsers.	1
Wy10	SPARQL – semantic query language.	1
Wy11	D2RQ – accessing relational databases as RDf graph.	1
Wy12	Freebase and semantic applications (parallax).	2
Wy13	Semantic matching and light ontologies.	1
Wy14	Ontology alignment. Libraries of ontologies.	1
Wy15	Semantic apploications: Powerset, NNDB Mapper, Echonest, Musicbrainz	1

	Total hours	18

Form of classes - seminar		Number of hours
Se 1	Topics discussion. Topic selection.	1
Se 2	Processing metadata with Wolfram Alpha.	1
Se 3	Visualizing using Gapminder.	1
Se 4	DBpedia semantic tools.	1
Se 5	Freebase semantic applications (parallax).	1
Se 6	Many Eyes – diagrams for metadata.	1
Se 7	SIMILE Widgets (Exhibit).	1
Se 8	OpenLink Virtuoso SPARQL Query Editor	2
	Total hours	9

TEACHING TOOLS USED
N1. Multimedia presentations and videos introducing and illustrating the subjects presented in the lecture. N2. Practical introduction to using software tools via remote desktop / projector. N3. Online learning management system (moodle) for communication and monitoring progress of student learning.

EVALUATION OF SUBJECT EDUCATIONAL EFFECTS ACHIEVEMENT

Evaluation (F – forming (during semester), P – concluding (at semester end)	Educational effect number	Way of evaluating educational effect achievement
C1 – final mark for lecture	PEK_W01 PEK_W02 PEK_W03	Multiple choice test
C2 – final evaluation of seminar	PEK_U01 PEK_U02 PEK_K01	Final mark after the presentation on seminar.

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

1. Basic Knowledge in the Area of Digital Sound Processing.
2. Basic Knowledge in the Area of Digital Image and Video Processing.

SUBJECT OBJECTIVES

C1 Passing knowledge on the principles of user interface designing.
C2 Acquisition of knowledge on modern methods of human-computer communication.
C3 Acquiring practical knowledge on use of modern means of human-computer interaction.
C4 Acquiring practical knowledge on user interface designing with the use of advanced multimodal interaction technologies.
C5 Developing skills of analysis and interpretation of the results as well as drawing the conclusions.
C6 Improving abilities of technical documentation elaboration.

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:
PEK_W01 Student knows how to design user interface and how to test its usability
PEK_W02 Student knows and can describe the methods of man-computer communication
PEK_W03 Student knows basic concepts of multimodal analysis.
PEK_W04 Student is able to enumerate and describe the methods of modalities fusion.
PEK_W05 Student knows multimodal input and output Interface.
PEK_W06 Student knows and can describe multimodal recognition problems. He/she can indicate the applications of multimodal recognition

relating to skills:
PEK_U01 Student uses modern methods of human-computer interaction.
PEK_U02 Student is able to design multimodal user interface
PEK_U03 Student knows how to test user interface usability.
PEK_U04 Student is able to evaluate the results obtained, interpret the results of analysis, and formulate the conclusions.
PEK_U05 Student knows how to prepare documentation of a task execution.

PROGRAMME CONTENT

Form of classes - lecture		**Number of hours**
Lec 1	Introduction. Statistical methods of machine learning in human-computer communication. Foundations of speech processing.	2
Lec 2	Speech recognition. Speaker recognition. Speech synthesis. Basics of natural	2

	language processing.	
Lec 3	Natural language understanding and generation. Dialog modeling and management.	2
Lec 4	Digital image and video processing tools for human-computer interaction. Handwriting processing.	2
Lec 5	Basic concepts of multimodal analysis. Multimodal information fusion. Modality integration methods.	2
Lec 6	Multimodal recognition. Modeling interest from multimodal nonverbal behavior.	2
Lec 7	Multimodal data management. Multimodal databases.	2
Lec 8	User interface designing principles. Interface usability testing.	2
Lec 9	Multimodal input and output.	1
	Colloquium	1
	Total hours	**18**

Form of classes - class		**Number of hours**
Cl 1		
Cl 2		
Cl 3		
Cl 4		
..		
	Total hours	

Form of classes - laboratory		**Number of hours**
Lab 1	Classes organization: substantial introduction to laboratory, organization and schedule of classes, credit conditions, BHP training.	1
Lab 2	Speech recognition and synthesis	2
Lab 3	Face recognition	1
Lab 4	Haptic Technologies: multimedia gloves, kinect, leap motion	2
Lab 5	Final task: Project of multimodal user interface	2
Lab 6	Final task presentation	1
	Total hours	9

Form of classes - project		**Number of hours**
Proj 1		
Proj 2		
Proj 3		
Proj 4		
...		
	Total hours

Sem 1		

Sem 2		
Sem 3		
…		
	Total hours	

TEACHING TOOLS USED

N1. Traditional lecture assisted multimedia presentation.
N2. E-learning: making available lecture teaching aids.
N3. E-learning: colloquium in a form of electronic test.
N4. E-learning: organization of laboratory classes, making available exercises instructions, patterns of documentation and other teaching aids, sending completed tasks and reports via e-portal, using forum and e-mail for teacher-student and student-student communication.
N5. Specialist hardware and software.

EVALUATION OF SUBJECT EDUCATIONAL EFFECTS ACHIEVEMENT

Evaluation (F – forming (during semester), P – concluding (at semester end)	Educational effect number	Way of evaluating educational effect achievement
F1	PEK_U01, PEK_U04	Grades of completed tasks
F2	PEK_U05	Grades of reports
F3	PEK_U02, PEK_U03, PEK_U04, PEK_U05	Grade of final task
C – laboratory		Weighted mean of grades obtained = 0,3*(mean of grades of completed tasks) + 0,3*(mean of reports grades) + 0,4*grade of final task
C – lecture	PEK_W01..PEK_W06	Colloquium in a form of e-test; to pass the test student has to obtain at least 50% of total points.

including number of ECTS points for practical					

(P) classes					
including number of ECTS points for direct teacher-student contact (BK) classes	1,2			0,8	

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

1. Knowledge of Web systems design.
2. Ability to process multimedia information at basic level.
3. Practical knowledge of basic technologies in online systems.

SUBJECT OBJECTIVES

C1. To acquaint students with basic issues of mobile platforms and the possibility of its use in building Web systems.
C2. To introduce students to the problems of developing systems providing the limits and benefits of mobile platforms.
C3. To provide practical skills of mobile systems design and prototyping using available components and libraries.

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:
PEK_W01 Basic knowledge of mobile platforms and their use in building Web systems.
PEK_W02 Knowledge enabling the characterization of services and information available from mobile sensors.
PEK_W03 Knowledge about constrains of mobile platforms and workarounds for building a dedicated mobile Web systems.

relating to skills:
PEK_U01 The use of mobile platform features in Web systems design.
PEK_U02 IT project implementation using mobile platforms.

relating to social skills:
PEK_K01 Working in project teams.
PEK_K02 Ability to defend own ideas and designs.

PROGRAMME CONTENT

Form of classes - lecture		Number of hours
Lec 1	Introduction to mobile systems. Comparison of platforms	1
Lec 2	Mobile trends of Web systems	1
Lec 3	Typology of developer tools for mobile platforms	1
Lec 4	Geolocalization in mobile systems	2
Lec 5	Position sensors and Augmented Reality in mobile systems	1
Lec 6	Accessing resources through mobile systems	1

Lec 7	Mobile device as a remote controller	1
Lec 8	HTML5 implementations for mobile platforms	2
Lec 9	Single task tool applications	1
Lec 10	Single task toy applications	1
Lec 11	Music aspects of mobile systems	2
Lec 12	Gamification in mobile Web systems	1
Lec 13	3D graphics on mobile plaforms	1
Lec 14	Game engines for mobile plaforms	1
Lec 15	Mobile platform applications enhancing large-scale Web systems.	1
	Total hours	18

Form of classes - project		**Number of hours**
Proj 1	Choosing project subject.	1
Proj 2	Application/system design for mobile platforms.	1
Proj 3	Project implementation – sprint 1	1
Proj 4	Project implementation – sprint 2	1
Proj 5	Project implementation – sprint 3	1
Proj 6	Project implementation – sprint 4	1
Proj 7	Project implementation – sprint 5	1
Proj 8	Project outcome presentation	2
	Total hours	9

TEACHING TOOLS USED
N1. Multimedia presentations and videos introducing and illustrating the subjects presented in the lecture. N2. Practical introduction to using developer software via remote desktop / projector. N3. Online learning management system (moodle) for communication and monitoring progress of student learning.

EVALUATION OF SUBJECT EDUCATIONAL EFFECTS ACHIEVEMENT

Evaluation (F – forming (during semester), P – concluding (at semester end)	Educational effect number	Way of evaluating educational effect achievement
F1 – design evaluation	PEK_U01 PEK_K01 PEK_K02	Individual conversation with project team members.
F2 – progres evaluation after sprint 3	PEK_U02 PEK_K01 PEK_K02	Individual conversation with project team members.
C1 – final mark for lecture	PEK_W01	Multiple choice test

	PEK_W02 PEK_W03	
C2 – final evaluation of the project	PEK_U01 PEK_U02	Final mark after the presentation of a finished project.

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

18. Practice in object-oriented programming.
19. Basic knowledge of software engineering.

\

SUBJECT OBJECTIVES

C1. Basic knowledge in the area of software system modeling with the stress on business modeling as the initial phase of the software development process.
C2. Basic knowledge in the area of the requirements specification.

SUBJECT EDUCATIONAL EFFECTS

Relating to knowledge:
PEK_W01: Students have basic knowledge on business modeling.
PEK_W02: Students know and understand the role of specification requirements.
PEK_W03: Students have basic knowledge on selected modeling languages.

Relating to skills:
PEK_U01: Students, in cooperation with domain experts, can construct and analyze business models.
PEK_U02: Students can build models of system requirements.

Relating to social competences:
PEK_K01: Students are able to cooperate with representatives of application domain.

PROGRAMME CONTENT

Form of classes - lecture		Number of hours
Lec 1	Basic notions for software development cycle. Survey of modeling languages – UML and BPMN.	1
Lec 2	Class diagrams – classes, associations, generalizations.	2
Lec 3	Object Constraint Language.	2
Lec 4	BPMN process diagrams.	2
Lec 5	System requirements; use case diagrams.	2
	Total hours	9

Form of classes - class		Number of hours
Cl 1	Analysis of textual descriptions of exemplary application domains – structural aspect.	2

Cl 2	Construction and analysis of class diagrams.	2
Cl 3	Construction and analysis of class diagrams.	2
Cl 4	Construction and analysis of OCL constraints imposed on diagrams.	2
Cl 5	Case study – an example of structural modeling.	2
Cl 6	Test 1.	1
Cl 7	Construction and analysis of simple BPMN process diagrams.	2
Cl 8	Construction and analysis of advanced BPMN process diagrams.	2
Cl 9	Construction and analysis of use case diagrams.	2
Cl 10	Test 2.	1
	Total hours	18

TEACHING TOOLS USED

N1. Lecturer's presentation at a blackboard, supported by a multimedia presentation using a laptop and a projector.
N2. Individual search and study of literature and Internet sources.
N3. Access to teaching materials published in the local area network.
N4. Individual consultations.

EVALUATION OF SUBJECT EDUCATIONAL EFFECTS ACHIEVEMENT

Evaluation (F – forming (during semester), P – concluding (at semester end)	Educational effect number	Way of evaluating educational effect achievement
F1	PEK_W01 PEK_U01 PEK_K01	Each student gets 1 point for own solution of a problem from the list of problems for the given class.
F2	PEK_W01 PEK_W02 PEK_U01 PEK_U02 PEK_K01	Each student gets up to 10 points for own solution of problems for the given test (intermediate and final).
F3	PEK_W01 PEK_W02 PEK_W03 PEK_U01 PEK_U02 PEK_K01	The final evaluation for the classes is determined on the basis of total marks obtained by the student's activity for exercise (F1) and colloquia (F2). Positive mark is awarded to a student who has obtained at least 4 points for each of the symposia and has won a total of 10 points. If this condition is met, the number of points P is the basis for evaluation in accordance with the following table: P: 10 | 12 | 14 | 16 | 18 Mark: 3.0 | 3.5 | 4.0 | 4.5 | 5.0 Students who get at least a very good grade are exempt from the examination with the same mark as for the classes.
C: The final evaluation of the course is determined based on the results of the examination. The examination lasts two hours and consists of a set of tasks, the total number of 20 points. The condition		

for a positive assessment of the final exam is to get 10 points and a positive final evaluation of the exercise.
The final evaluation of the examination is determined in accordance with the following table:

Points	10	12	14	16	18
Mark	3.0	3.5	4.0	4.5	5.0

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

1. Ability to use computer.
2. Basics of computer graphics.

\

SUBJECT OBJECTIVES

C1 Delivering the knowledge of structures and formats of digital images, techniques of image digitalization in scanners and digital photo cameras, methods and algorithms of image processing and compression.

C2 Presenting the techniques of non-linear digital video editing.

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:
PEK_W01 T2A_W03
PEK_W02 T2A_W04
…
relating to skills:
PEK_U01 T2A_U08
PEK_U02 T2A_U19
…
relating to social competences:
PEK_K01 T2A_K02
PEK_K02 T2A_K06

PROGRAMME CONTENT

Form of classes - lecture		Number of hours
Lec 1	Cyberspace. History of photography, movie, digital movie, and virtual reality. Media encapsulation.	2
Lec 2	Methodology of movie production (filmmaking). Examples of scenarios, screenplays, and storyboards. Rules of non-linear movie editing. Digital video formats. Video conversion.	2
Lec 3	Digital image classification. Structures of digital and printing images. Color depth. Color systems. Classification of digital image transformations. Specificity of image transformations and their influence on the image quality.	2
Lec 4	Real image digitalization. Scanners construction. Scanning techniques. 3D Scanners. Digital photo cameras. Digital movie cameras. Image deformations during digitalization process. Image correction techniques. Mora effects. Format conversion.	2
Lec 5	Special effects and filters. Image watermarking. Metadata. Digital image compression.	2
Lec 6	Software for digital image and video processing. Characteristics of image and video processing software. Digital video effects.	2
Lec 7	MPEG and other video formats. Video codecs. DVD technology.	2

Lec 8	Automatic content-based video analysis and indexing. Temporal segmentation of video. Automatic analysis of shot contents. Scene detection. Test I.	2
Lec 9	Principles of computer animations. Test II.	2
	Total hours	18

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

10. Knowledge of basic concepts in the area of Polish language morphology and syntax.
11. Know-how of parsing accomplishment.
12. Knowledge in the area of basic tools used for formal languages description and analysis (formal grammars and automata).

\

CELE PRZEDMIOTU

C1 Acquaintance of essential problems related to speech recognition and synthesis as well as methods of the problems solutions, phases of utterance recognition, tools used at particular stages, methods of utterance generation.

C2 Practice in speech analysis and synthesis using tools supporting automatic analysis of natural language.

C3 Developing ability of analysis and interpretation of its results as well as drawing the conclusions.

C4 Improving ability of preparing a technical documentation.

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:

PEK_W01 Student is able to formulate problems that occur in speech recognition and synthesis processes; he/she can explain the essence of the problems.

PEK_W02 Student knows and can explain the problem solving methods occuring in speech recognition and synthesis processes.

PEK_W03 Student can enumerate and characterize phases of speech recognition and synthesis.

PEK_W04 Student can enumerate and describe methods used at particular phases of speech recognition and synthesis.

relating to skills:

PEK_U01 Student is able to plan and realize automatic analysis of natural language utterance.

PEK_U02 Student can suitably select and use tools supporting speech analysis.

PEK_U03 Student is able to verify and interpret results of the analysis as well as formulate the conclusions.

PEK_U04 Student can prepare raport (technical documentation) of a task completion.

PROGRAMME CONTENT

Form of classes - lecture		**Number of hours**
Lec 1	Introduction to natural language processing. Regular expressions and finie state automata. Morphology. Finite-State Transducer (FST).	2

Lec 2	Computational phonology. Text to speech conversion.	2
Lec 3	Probabilistic models of pronunciation and spelling. N-gramms. Linguistic corpora.	2
Lec 4	Methods and algorithm used in automatic speech recognition and synthesis.	2
Lec 5	Methods of automatic part of speech tagging. Context-free grammars. Parsing and probabilistic parsing.	2
Lec 6	Meaning representation. Methods of meaning unification. Semantic analysis.	2
Lec 7	Lexical semantics. Pragmatics of language.	2
Lec 8	Natural language generation. Machine translation.	2
Lec 9	Machine translation.	1
	Colloquium	1
	Total hours	18

Form of classes - class		**Number of hours**
Cl 1		
Cl 2		
Cl 3		
Cl 4		
..

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

1 Knowledge, skills and competences acquired at Informatics field at second level of study until 3th semester

\

SUBJECT OBJECTIVES

C1 Preparing students to write a master thesis according the internal requirements in Informatics field at Faculty of Computer Science and Management, Wrocław University of Technology,
C2 Providing students with basic skills related to preparation and presentation of scientific texts, beginning from the choice of topic, selection of tasks to be performed, use of literature to interpretation of the results.

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:
…
relating to skills:
PEK_U01 He is able to acquire information from literature, databases and other sources, also in English or other language used for communication in Informatics field, is able to integrate the information obtained, interpret them, make critical evaluation and also draw conclusions and formulate and justify opinions related to prepared master thesis.
PEK_U02 He can communicate using a variety of techniques in his professional environment and in other environments, also in English or other foreign language used for communication in Informatics field and also to present the results of his master thesis
relating to social competences:
…

PROGRAMME CONTENT

Form of classes - seminar		**Number of hours**
Sem 1	Familiarization with the principles of master thesis realization at Informatics field. Rules related to student presentations. Determining the schedule of student presentations.	2
Sem 2	Review of basic skills related to preparation and presentation of scientific texts by students, beginning from the choice of topic, selection of tasks to be performed, use of literature and also how to write thesis and how obtained results should be interpret.	2
Sem 3 – Sem15	During semester each student has 2 presentations. The first presentation is related to the general view of the thesis topic, its placement in the literature and in the Informatics field. The student should present the primary aim of thesis, the state of art related to thesis topic, the concept of solution, the initial structure of thesis and timetable for further work. The purpose of the second presentation is preparation to defense and demonstrate presentation skills in English. The second presentation consists of two parts, namely, discussion of the results of the work in English and a short presentation in Polish devoted to the results of the thesis.	14
	Total hours	18

TEACHING TOOLS USED
N1. Multimedia presentations N2. Examples of scientific papers and reports from the field of computer science. N3. E-Learning System used to publish teaching materials and announcements, also used for collection and evaluation of student work.

EVALUATION OF SUBJECT EDUCATIONAL EFFECTS ACHIEVEMENT

Evaluation (F – forming (during semester), P – concluding (at semester end)	Educational effect number	Way of evaluating educational effect achievement

P	PEK_U01 PEK_U02	Evaluation of the presentation of the work at the seminar and prepared documentation from the presentation. The evaluation shall be subject to the fulfillment of the requirements for the presentation, including its substantive scope, structure and organization of presentation, techniques of conversation, a form of presentation, compactness of presentation and conclusions reached. Participation in the discussions after presentation is also evaluated. In addition, the seminar leader is able to control the cooperation between supervisors and graduate students.

PRIMARY AND SECONDARY LITERATURE

PRIMARY LITERATURE:

[208] Literature related to the scope of realized project selected by student and recommended by the teacher.

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

1. Basic mathematical knowledge for 1st level of studies.

2. Informatics knowledge background.
3. Algorithms knowledge background.

\

SUBJECT OBJECTIVES

C1 Acquiring knowledge about functions and significance of information systems in contemporary organizations
C2 Acquainting with the functions and development of information systems in information society
C3 Acquainting with the different methods of information retrieval by surfing the Web
C4 Recognizing the problems of passing of contemporary organizations to Internet space
C5 Obtainment of skills to analyze the literature from information systems area and to synthesize the contents from different sources
C6 Application of the obtained knowledge to presentation the problems from information systems area by means of using adequate tools

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:
PEK_W01 Familiarity with basic models of information systems
PEK_W02 Basic knowledge about Web information systems
PEK_W03 Familiarity with common multimedia technologies
PEK_W04 Understanding of the measures of information retrieval efficiency

relating to skills:
PEK_U01 Student can to build information query for different types of information needs
PEK_U02 Can to determine basic features of information system for given organization
PEK_U03Student be able to evaluate the precision of retrieved information
PEK_U04 Can to present basic features of given information system

relating to social competences:
PEK_K01 Can individually to use literature of the subject and to select useful information
PEK_K02 Student is convinced above positive role of information systems in stimulation of the civilization development

PROGRAMME CONTENT

	Form of classes - lecture	**Number of hours**
Lec 1	History of information systems development. Information processing. Theoretical basis of information systems. Automation of information flow in organization.	2
Lec 2	Functioning of information systems in computer networks. Information retrieval. Digital libraries.	2
Lec 3	Multimedia. Importance of multimedia technologies in information systems development. How societies embrace information technology.	2
Lec 4	Efficiency of information systems. Case study of chosen information system.	2

SUBJECT OBJECTIVES

C1 Getting to know foundations of designing computer science decision support systems using general systemic methods which make it possible to apply unified approaches for analysis and decision making for decision support systems of different nature.
C2 Acquisition of skills to represent in the form of mathematical formulas of decision making plants treated as input-output plants.
C3 Acquisition of skills to analyze of decision making plants treated as input-output plants.
C4 Getting acquainted with methods and algorithms of multi-stage decision making.
C5 Acquisition of skills to apply dynamic programming method.
C6 Getting to know metods and algorithms of multi-criteria decision making.
C7 Acquisition of skills to use AHP method.

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:
PEK_W01 Student knows foundations of designing of decision support systems for any kind of plants.
PEK_W02 Student knows foundations of analysis and decision making for input-output plants with logic knowledge representation.
PEK_W03 Student knows selected method of multi-stage and multi-criteria decision making.
relating to skills:
PEK_U01 Student is able to elaborate a mathematical model for an input-output decision making plant in discrete state space as well as with logic knowledge representation.
PEK_U02 Student can solve analysis and decision making tasks for elementary plants with logic knowledge representation.
PEK_U03 Student is able to solve multi-stage decision making problem using Bellman's Principle and dynamic programming.
PEK_U04 Student can use AHP algorithm for the solution od multi-criteria decision making problem
relating to social competences:
PEK_K01 Student can take advantage of professional literature by oneself and can perform the critical analysis of information mined.
PEK_K02 Student can think creatively.

PROGRAMME CONTENT

Form of classes - lecture		**Number of hours**
Lec 1	Decision support systems – definitions, structures, problems, application of discrete state equations and logic expressions for representation of decision making plants.	2
Lec 2	Outline of logic-algebraic method and its application to solution of analysis and decision making for input-output decision making plants.	2
Lec 3	Decision making – definition, typology, logic-algebraic plant, Bellman's Principle and multi-stage decision making.	2
Lec 4	Multi-criteria decision making – Pareto sets, AHP method.	2
Lec 5	Examples of computer decision support systems.	1
	Total hours	9

Form of classes - class		**Number of hours**
Cl 1	Solution of numerical exercises concerning difference equations as well as propositional calculus.	2
Cl 2	Solution of numerical exercises concerning mathematical representations of input-output plants.	2
Cl 3	Solution of numerical exercises concerning analysis and decision making using logic-algebraic method.	2
Cl 4	Solution of numerical exercises concerning dynamic programming and AHP	2

	method.	
Cl 5	Final test.	1
	Total hours	9

Form of classes - laboratory		Number of hours
Lab 1		
Lab 2		
Lab 3		
Lab 4		
Lab 5		
…		
	Total hours	

Form of classes - project		Number of hours
Proj 1	Collecting of indispensable information about selected plant being the decision making plant.	2
Proj 2	Determination of mathematical model of selected decision making plant and decision making problem formulation as well as analysis of decision making plant using its mathematical model.	2
Proj 3	Choice of decision making method for further usage as well as elaboration of decision making algorithm.	2
Proj 4	Implementation and analysis of decision making algorithm.	2
Proj 5	Elaboration of conclusions and written report of the project performed.	1
	Total hours	9

Form of classes - seminar		Number of hours
Sem 1		
Sem 2		
Sem 3		
…		
	Total hours	

TEACHING TOOLS USED
N1 Lecture – traditional method. N2 Classes – traditional method. N3 Consultation. N4 Individual discussion with student. N5 Short test (10 mins.). N6 Self-contained work.

EVALUATION OF SUBJECT EDUCATIONAL EFFECTS ACHIEVEMENT

Evaluation (F – forming (during semester), P – concluding (at semester end)	Educational effect number	Way of evaluating educational effect achievement
F1	PEK_W02; PEK_W03; PEK_U01– PEK_U04	Short tests during the classes.
F2	PEK_K01– PEK_K02	Individual discussion with student during

		the project.
P (Classes)	PEK_W02; PEK_W03; PEK_U01–PEK_U04	Test.
P (Project)	PEK_U01–PEK_U04; PEK_K01–PEK_K02	Evaluation of written report of the project.
P (Lecture)	PEK_W01–PEK_W03; PEK_K02	Exam.

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

37. Has a basic knowledge of ICT systems and computer communication networks (K1INF_W11).
38. Knows the basic methods and tools for collecting, processing and retrieval of information and knowledge extraction (K1INF_W16)
39. Can use the right tools to build a simple model of the process (the object), to formulate specific task analysis and decision making (K1INF_U15)
40. Can effectively use the methods and tools for collecting, processing and retrieval of information and knowledge extraction (K1INF_U16)
41. It has the ability to self-education, including in order to improve the professional competence (K1INF_U05)
42. Understands the need and knows the possibility of lifelong learning and to improve their professional and social competences (K1INF_K01)

SUBJECT OBJECTIVES

C1. Ordered, underpinned by theoretical knowledge of methods and techniques for transmitting signals using different modulation techniques, methods and techniques of information transmission, methods of organization and management of data communications traffic in the tasks of design and analysis of communication systems, methods of delivering service quality of ICT systems, analysis of quantitative and qualitative requirements and methods for sizing of distributed IT systems.

C2. Skills about the differences and benefits of the use of analog and digital data transmission techniques, the differences and benefits of the use of wired and wireless signal transmission techniques, developing the concept of using wired and wireless technologies in the basic applications of ICT systems, defining the qualitative and quantitative requirements of the user information and communication systems range of data, designing ICT solutions needed to achieve the qualitative and quantitative requirements of the user, using standards and solutions available on the market, estimating the cost of preparing and maintaining ICT solutions needed to achieve the qualitative and quantitative requirements, designing modernization of IT solutions needed to achieve the qualitative and quantitative requirements, identifying differences and similarities between solutions in a variety of applications (e-health, e-government and e-learning, in real-time systems, etc.).

C3. Skills for the design and analysis of complex, distributed ICT systems providing network services for distributed computer communication systems.

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:

K2INF_W02: Has a structured, theoretically founded essential knowledge of business modeling and requirements specification systems.

K2INF_W03: Has a structured, theoretically founded essential knowledge in the delivery of information distributed systems

K2INF_W06: Achieves results in the category of knowledge for specialty data communications

relating to skills:

K2INF_U05: Can - in formulating and solving engineering tasks - integrate knowledge of the fields of science and scientific disciplines relevant to the study being studied and applied a systemic approach, taking into account the non-technical aspects

K2INF_U06: Can solve the modeling, analysis and decision making for different types of objects

K2INF_U08: Achieves results and skills in areas of data exchange and computer communications systems

relating to social competences:

K2INF_K01: Can think and act in a creative and enterprising

K2INF_K02: Has aware of the social role of technical graduating, especially understands the need for the formulation and communication to the public, especially through the mass media, information and opinion on the achievements of technology and other aspects of engineering, shall endeavor to provide such information and opinions in a widely understood the reasons for the different points of view

PROGRAMME CONTENT		
Form of classes - lecture		**Number of hours**
Lec 1	Classification of ICT systems from different points of view. Quality of Experience (QoE) and Quality of Service (QoS) in ICT systems with elastic and streaming traffic.	2
Lec 2	Introduction to queuing. Open and close networks of queues. Queuing models of circuit-switched and packet-switched computer communication systems. Burke's theorem and Kleinrock approximation.	2
Lec 3	Access control, flow control and routing tasks formulation and solution in distributed environments.	1
Lec 4	Requirements analysis	1
Lec 5	Models (Poisson, Markov modulated, self-similarity, etc) of teletraffic and its application in traffic engineering tasks.	1
Lec 6	QoS delivery concepts: best effort, integrated services and differentiated services	1
Lec 7	New concepts of systems and networks - NXGN (Next Generation Networks) i NWGN (New Generation Network). Summary.	1
	Total hours	9

PROGRAMME CONTENT	
Form of classes - project	**Number**

		of hours
Proj 1	Formulation design task based on the analysis of the literature, documentation, etc.	2
Proj 2	Justification for the choice task and purpose of the task design - an analysis of the expected benefits of the project task.	2
Proj 3	Quantitative and qualitative requirements analysis for the communication system under design	2
Proj 4	Analysis of state of the art on how to solve the task design and analysis and selection of the task design methodology	2
Proj 5	Tools (methods, algorithms, procedures, software and hardware) analysis and selection required for the implementation of the project task	2
Proj 6	Implementation of prototype of modules solve the task and prototype testing and evaluation	2
Proj 7	Modification of solutions using prototype test results	2
Proj 8	Integration of modules distinguished at the stages of requirements analysis and prototyping. Verification and testing of an integrated solution design task	2
Proj 9	Analysis of the possibility of extending the project tasks. Preparation of tfinal presentation and documentation of the design task. Presentation of the results of the design task	2
	Total hours	18

TEACHING TOOLS USED
N1. Traditional lecture supported by whole class multimedia presentations based on literature and open access and commercial sources.
N2. Student's own works – solving experiments and tasks in laboratory as well as homework.
N3. Student's own works – literature and open access sources studies.
N5. Collective works in laboratory
N5. Student's own works – preparation of presentations and technical documentations.

EVALUATION OF SUBJECT EDUCATIONAL EFFECTS ACHIEVEMENT		
Evaluation (F – forming (during semester), P – concluding (at semester end)	Educational effect number	Way of evaluating educational effect achievement
F1 (lecture)	K2INF_W03 K2INF_W04 K2INF_W06 K2INF_U05 K2INF_U06 K2INF_U08 K2INF_K01 K2INF_K02	Observation and verification of student activity. Solving the sample jobs.
F1 – F9 (project)	K2INF_W06	Checking the preparation of the student. Checking

	K2INF_U05 K2INF_U06 K2INF_U08 K2INF_K01	the presence of the student. Observation of student activity. Observation and assessment of student autonomy.
P (lecture)	K2INF_W03 K2INF_W04 K2INF_W06 K2INF_U05 K2INF_U06 K2INF_U08 K2INF_K01 K2INF_K02	Colloquium (course credit) in the evaluation of forming F1 (lecture)
P (project)	K2INF_U05 K2INF_U06 K2INF_U08 K2INF_K01	Total weighted ratings F1 – F9 (project) and the assessment for the presentation of the final results of the project.

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

1. Knowledge of mathematics and mathematical statistics

\

SUBJECT OBJECTIVES

C1 Introduce the methods and techniques of the statistical data analysis to students
C2 Gather knowledge for Knowledge Discovery (Data Mining)
C3 Applying the gathered knowledge to drawing conclusions based on data analysis

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:
PEK_W01 student has a basic knowledge of Knowledge Discovery (Data Mining)
PEK_W02 student has a basic knowledge of statistical data analysis
PEK_W03 student is able to present differences between parametric and non-parametric tests

relating to skills:
PEK_U01 student is able to choose a proper statistical test
PEK_U02 student is able to draw conclusion from data analysis
PEK_U03 student is able to select a proper data mining method

relating to social competences:
PEK_K01 student is able to search and reuse the primary and secondary literature listed below and is able to gather the proper knowledge
PEK_K02 student understands the need for systematic and individual work in order to cover the scope of the course

PROGRAMME CONTENT

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

1 Ability to program in at least one programming language.
2 Knowledge of methods and algorithms for decision support systems

\

SUBJECT OBJECTIVES

C1 Acquisition of knowledge covering aspects related to the implementation of decision support systems
C2 Acquiring skills related to the developing distributed mobile applications for the implementation of decision support systems.

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:

PEK_W01 A student is able to identify the software development methods useful in the implementation of information systems, decision-making

PEK_W02 A student is able to describe the structure and architecture typical of decision support systems.

PEK_W03 A student is able to characterize and describe technologies for developing distributed applications for mobile devices and to apply information systems for decision-making.

relating to skills:

PEK_U01 A student can choose the decision support algorithms to solve practical problems and implement it in a decision support system.

PEK_U02 A student can develop software for contemporary mobile devices when applied to information systems for decision support.

PEK_U03 A student can develop distributed applications and combine applications written in different technologies to implement a system for decision support.

PEK_U04 A student can prepare user documentation and technical support for the implemented application.

relating to social competences:

PEK_K01 A student is able to think in a creative way.

PROGRAMME CONTENT

Form of classes - lecture		**Number of hours**
Lec 1	Introduction. Architectures of decision support systems. Design Patterns. MVC.	2
Lec 2	Developing applications for mobile platforms.	2
Lec 3	Storage and transmission of data. Using XML files. Developing distributed applications.	2
Lec 4	Combining applications written in different technologies. Source code documentation.	2
Lec 5	Final test.	1
	Total hours	9

Form of classes - class		**Number of hours**
Cl 1		
Cl 2		
Cl 3		
Cl 4

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

1. Student understands the notion of a decision problem and is familiar with basic models of decision plants.
2. Student is able to formulate a decision problem as well as to determine and implement simple decision algorithms.

\

SUBJECT OBJECTIVES

C1 Acquiring basic knowledge of problems in the area of intelligent decision support systems.
C2 Acquiring skills in analysis, design and implementation of intelligent decision support systems with the application of modern methods and techniques.

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:

PEK_W01 Student is able to explain differences between traditional mathematical models and knowledge representations, and to present definitions of a relational and a logical representations of knowledge on a decision plant or on a decision making.
PEK_W02 Student is able to characterize concepts and paradigms of learning, and to present selected algorithms for learning of a decision strategy and for learning of decision rules.
PEK_W03 Student is familiar with a mathematical model of a multilayer neural network, and understands the concept of a backpropagation method.
PEK_W04 Student is able to explain chosen methods of evolutionary systems, used for coding, crossing-over and selection.
PEK_W05 Student knows knowledge representations based on fuzzy or uncertain variables, and the methods for solving decision problems under uncertainty.

relating to skills:

PEK_U01 Student is able to determine solutions to simple numerical examples of analysis and decision problems based on knowledge representations, learning or under uncertainty.
PEK_U02 Student is able to implement a logic-algebraic method, the AHC and ID3 algorithms, an evolutionary algorithm and a fuzzy reasoning algorithm – in a chosen software environment.
PEK_U03 Student is able to design and carry out computer simulations to evaluate intelligent decision algorithms and properly adjust their parameters.
PEK_U04 Student can search for research papers, read them with understanding and evaluate applicability of the presented methods to the design task under consideration.
PEK_U05 Student is able to perform analysis of a decision problem, work out the problem formulation, design a decision support system, properly indicate software implementation tools and assess strong and weak aspects of the designed system.

relating to social competences:

PEK_K01 Student can think in a creative way.

PROGRAMME CONTENT		
Form of classes - lecture		**Number of hours**
Lec 1	Introduction. Supplementing and extending basic information on decision support systems. Knowledge-based decision making	2
Lec 2	Application of relational and logical knowledge representations	2
Lec 3	Adaptation and learning in decision support systems	2
Lec 4	Self-learning decision support systems – using knowledge on the decision plant	1
Lec 4, Lec 5	Self-learning decision support systems – using knowledge on the decision making	2
Lec 5, Lec 6	Automated knowledge acquisition from data (clustering, association rules, decision trees)	3
Lec 7	Nature-inspired approaches and soft computing in decision support systems - application of neural networks and evolutionary algorithms	2
Lec 8	- application of methods based on the fuzzy logics and on the uncertain variables	2
Lec 9	Lecture test	2
	Total hours	18
Form of classes - class		**Number of hours**
Cl 1	Solving computational exercises concerning: - analysis and decision making based on the relational and on the logical knowledge representations	2
Cl 2	- reinforcement learning and data mining algorithms	2
Cl 3	- determination of neural networks learning algorithms and evaluation of their properties	2
Cl 4	- analysis and decision making based on a fuzzy rule base and on certainty distributions	2
Cl 5	Classes test	1
	Total hours	9
Form of classes - laboratory		**Number of hours**
Lab1	Explaining safety rules (BHP training). Introduction	1
Lab1 – Lab5	Implementation and simulated testing of chosen intelligent decision making algorithms. There are 5 task to be completed, concerning the algorithms dealt with during classes.	8
	Total hours	9
Form of classes - project		**Number of hours**
Proj1	Introduction	1

Proj1 – Proj3	Choosing and analyzing a decision problem. Formulating the adequate design task. Analyzing assumptions, requirements and constraints	5
Proj4	Students' presentations, part I.	2
Proj5 – Proj7	Elaborating alternative variants of the problem solution, in particular – using soft computing methods, selecting a variant satisfying the chosen criteria, designing systems structure and analyzing issues related to its implementation	6
Proj8	Students' presentations, part II.	2
Proj9	Discussion on students' presentations and project reports. Conclusions	2
	Total hours	18

Form of classes - seminar		**Number of hours**
Sem1		
Sem2		
Sem3		
…		
	Total hours	

TEACHING TOOLS USED

N1. Traditional lecture.
N2. Student's individual work – solving computational exercises.
N3. Group work – discussion, conversation with an individual student.
N4. Student's individual work – programming.
N5. Student's individual work – performing computer simulations.
N6. Student's individual work – studying literature.
N7. Student's individual work – analyzing, designing.
N8. Student's individual work – presenting.

EVALUATION OF SUBJECT EDUCATIONAL EFFECTS ACHIEVEMENT

Evaluation(F – forming (during semester), P – concluding (at semester end)	Educational effect number	Way of evaluating educational effect achievement
F1 – F5	PEK_U02, PEK_U03	Short (ca. 3 min) conversation with individual students concerning current laboratory exercises (incl. presentation of computer programs, computed results and conclusions), a report.
F6	PEK_U04, PEK_U05	Based on a presentation given during project classes, part I
F7	PEK_U04, PEK_U05, PEK_K01	Based on a presentation given during project classes, part II
F8	PEK_U04, PEK_U05, PEK_K01	Reading students' project reports
P1 (Lec)	PEK_W01 – PEK_W05	Lecture test
P2 (Cl)	PEK_U01	Classes test
P3 (Lab)	PEK_U02, PEK_U03	F1 – F5
P4 (Proj)	PEK_U04, PEK_U05,	F6 – F8

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

1. Knowledge of basic ideas and methods of mathematical analysis
2. Knowledge of basic ideas and methods of algebra
3. Knowledge of basic ideas and methods of probability theory and statistics

\

SUBJECT OBJECTIVES

C1 Learning how to develop computer models using measurement data
C2 Ability to design and develop modern computer recognition systems.

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:
PEK_W01 Knowledge of modern system identification and pattern recognition techniques

relating to skills:
PEK_U01 Knows how to develop the model of a process and pattern recognition system for decision support and analysis tasks
PEK_U02 Knows how to design and develop computer identification and pattern recognition systems using MATLAB

relating to social competences:
PEK_K01 Knows how to make documentation of their own work and knows how to apply computer identification systems for other areas of science and technology (e.g. medicine and life sciences, sport, economy)

PROGRAMME CONTENT

Form of classes - lecture		**Number of hours**
Lec 1	The role of mathematical model in systems analysis. System identification task.	1
Lec 2	Basic tasks of static system identification – deterministic setting. Parametric identification and the choice of optimal model.	2

Lec 3	Estimation of static system identification: a) the least squares method, b) maximum likelihood method, c) the Bayes rule.	2
Lec 4	Nonparametric identification. Parzen window density estimator. Orthonormal basis functions.	2
Lec 5	Time-variant system identification.	2
Lec 6	Dynamic systems identification described by differential equations. Parametric identification and the choice of the best model. Analysis of impulse responses.	1
Lec 7	Estimation of dynamic systems parameters: a) generalized least squares method, b) Kalman filter.	2
Lec 8	Pattern recognition tasks – introduction. Graphical interpretation of pattern recognition and feature selection tasks. Pattern recognition for decision support systems.	2
Lec 9	Statistical pattern recognition. Optimal Bayesian classifier. The naïve Bayes classifier.	2
Lec 10	Supervised and unsupervised learning. The k-nearest neighbours algorithm. Application of neural networks for pattern recognition and system identification.	2
	Total hours	**18**

Form of classes - class		**Number of hours**
Cl 1	Selected concepts of statistics: a) expected value, variance, probability distribution and probability density function b) correlation and covariance, c) conditional probability and the Bayes rule.	2
Cl 2	Parametric identification – deterministic setting.	2
Cl 3	Parametric identification and the choice of the best model. Approximation.	2
Cl 4	Parametric identification – nondeterministic setting: a) the least squares method, b) maximum likelihood method, c) the Bayes rule.	4
Cl 5	Kalman filter.	2
Cl 6	Optimal Bayes classifier	2
Cl 7	Supervised learning. The k-nearest neighbour method.	1
Cl 8	Application of neural networks for system identification.	1
Cl 9	Application of neural networks for pattern recognition.	1
Cl 10	Feature selection.	1
	Total hours	**18**

Form of classes - laboratory		**Number of hours**
Lab 1	Health and safety training (BHP). Statistical methods of data processing.	2
Lab 2	Development of selected mathematical models for system identification	2

	purposes.	
Lab 3	Implementation of identification algorithms for nondeterministic setting. Simulation study and report.	4
Lab 4	Development of a computer identification system for a real process. Simulation study on the developed identification system. Report.	2
Lab 5	Implementation of basic classifiers: k-nearest neighbours, linear classifier. Simulation study and report.	4
Lab 6	Development of a computer pattern recognition with use of real life dataset and MATLAB Toolboxes. Simulation study and report.	4
	Total hours	**18**

TEACHING TOOLS USED

N1. Traditional lecture. Multimedia presentation.
N2. Tutorials.
N3. Literature study.
N4. Implementation of algorithms.
N5. Simulation studies.
N6. Reports.

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

20. Practice in object-oriented programming.
21. Basic knowledge of software engineering.

\

SUBJECT OBJECTIVES

C1. Basic knowledge in the area of software system modeling with the stress on business modeling as the initial phase of the software development process.
C2. Basic knowledge in the area of the requirements specification.

SUBJECT EDUCATIONAL EFFECTS

Relating to knowledge:
PEK_W01: Students have basic knowledge on business modeling.
PEK_W02: Students know and understand the role of specification requirements.
PEK_W03: Students have basic knowledge on selected modeling languages.

Relating to skills:
PEK_U01: Students, in cooperation with domain experts, can construct and analyze business models.
PEK_U02: Students can build models of system requirements.

Relating to social competences:
PEK_K01: Students are able to cooperate with representatives of application domain.

PROGRAMME CONTENT		
Form of classes - lecture		**Number of hours**
Lec 1	Basic notions for software development cycle. Survey of modeling languages – UML and BPMN.	1
Lec 2	Class diagrams – classes, associations, generalizations.	2
Lec 3	Object Constraint Language.	2
Lec 4	BPMN process diagrams.	2
Lec 5	System requirements; use case diagrams.	2
	Total hours	9

Form of classes - class		Number of hours
Cl 1	Analysis of textual descriptions of exemplary application domains – structural aspect.	2
Cl 2	Construction and analysis of class diagrams.	2
Cl 3	Construction and analysis of class diagrams.	2
Cl 4	Construction and analysis of OCL constraints imposed on diagrams.	2
Cl 5	Case study – an example of structural modeling.	2
Cl 6	Test 1.	1
Cl 7	Construction and analysis of simple BPMN process diagrams.	2
Cl 8	Construction and analysis of advanced BPMN process diagrams.	2
Cl 9	Construction and analysis of use case diagrams.	2
Cl 10	Test 2.	1
	Total hours	18

TEACHING TOOLS USED

N1. Lecturer's presentation at a blackboard, supported by a multimedia presentation using a laptop and a projector.
N2. Individual search and study of literature and Internet sources.
N3. Access to teaching materials published in the local area network.
N4. Individual consultations.

EVALUATION OF SUBJECT EDUCATIONAL EFFECTS ACHIEVEMENT

Evaluation (F – forming (during semester), P – concluding (at semester end)	Educational effect number	Way of evaluating educational effect achievement
F1	PEK_W01 PEK_U01 PEK_K01	Each student gets 1 point for own solution of a problem from the list of problems for the given class.
F2	PEK_W01 PEK_W02 PEK_U01 PEK_U02 PEK_K01	Each student gets up to 10 points for own solution of problems for the given test (intermediate and final).
F3	PEK_W01 PEK_W02 PEK_W03 PEK_U01 PEK_U02 PEK_K01	The final evaluation for the classes is determined on the basis of total marks obtained by the student's activity for exercise (F1) and colloquia (F2). Positive mark is awarded to a student who has obtained at least 4 points for each of the symposia and has won a total of 10 points. If this condition is met, the number of points P is the basis for evaluation in accordance with the following table: P | 10 | 12 | 14 | 16 | 18

		<table><tr><td>Mark</td><td>3.0</td><td>3.5</td><td>4.0</td><td>4.5</td><td>5.0</td></tr></table> Students who get at least a very good grade are exempt from the examination with the same mark as for the classes.

C: The final evaluation of the course is determined based on the results of the examination. The examination lasts two hours and consists of a set of tasks, the total number of 20 points. The condition for a positive assessment of the final exam is to get 10 points and a positive final evaluation of the exercise.
The final evaluation of the examination is determined in accordance with the following table:

Points	10	12	14	16	18
Mark	3.0	3.5	4.0	4.5	5.0

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

Passing subject „Decision Support Systems"

\

SUBJECT OBJECTIVES

Celem ogólnym jest nabycie umiejętności i pozyskanie podstawowej wiedzy w zakresie podejmowania decyzji w systemach typu kompleks operacji, czyli systemach złożonych z operacji powiązanych za pomocą kolejności czasowych, a także opisu i analizy takich systemów. Przedmiot ten rozszerza treści programowe przedmiotu kierunkowego „Systemy wspomagania decyzji" na obiekty (przedmioty) podejmowania decyzji, jakimi są kompleksy operacji. Cele szczegółowe to:

General objective deals with the acquisition of skills and indispensable knowledge concerning decision making for complex operation systems (complexes of operations), i.e. systems composed of operations connected via time relationships, as well as mathematical representation and analysis of such systems. This subject widens the main field subject "Decision Support Systems" onto complexes of operations.

Particular objectives are as follows:

C1 Getting to know and acquisition of skills to determine mathematical models for complexes of operations.

C2 Getting acquainted with application areas of complexes of operations.

C3 Acquisition of skills to formulate optimal and satisfactory decision making problems for complexes of operations, in general and for specific oriented systems.

C4 Getting acquainted with methods and algorithms for solution selected decision making problems in complexes of operations, e.g.: allocation, task scheduling, optimization in networks, transportation, routing, and packing.

C5 Getting possibilities of application of metaheuristics and artificial intelligence based methods for solving decision making problems in complexes of operations.

C6 Getting skills of designing and implementation of computer decision support systems for complexes of operations.

C7 Learning of development directions of computer decision support systems in the scope of the subject.

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:

PEK_W01 Student knows foundations of decision making for complexes of operations as well as their areas of application.

PEK_W02 Student is familiar with different ways for modeling and analysis of complexes od operations.

PEK_W03 Student knows solution algorithm to selected decision making problems for complexes of operations.

relating to skills:

PEK_U01 Student is able to elaborate a mathematical model for the complex of operations, to analyze it, and to formulate the corresponding decision making problem.

PEK_U02 Student can apply a known algorithm to solve formulated case-study decision making problem.
PEK_U03 Student can implement selected decision making algorithm, analyze it, formulate conclusions as well as present results in a form of written report.

PEK_U04 On the basis of selected literature sources, student is able to prepare and present proper presentation concerning selected decision making algorithm for complexes of operations as well as abstract of this presentation in English.
relating to social competences:
PEK_K01 Student can take advantage of professional literature by oneself and can perform the critical analysis of information mined.
PEK_K02 Student can think creatively.

PROGRAMME CONTENT

Form of classes - lecture		**Number**
Lec 1	Specificity and models of complexes of operations in comparison with other decision making plants.	2
Lec 2	Description and examples of applications of complexes of operations, in particular in computer science.	2
Lec 3	Optimization problems in networks - selected decision making algorithms, Part I.	2
Lec 4	Resource allocation in complexes of operations.	2
Lec 5	Task allocation in complexes of operations.	2
Lec 6	Selected task scheduling problems on parallel executors, Part I.	2
Lec 7	Selected task scheduling problems on dedicated executors.	2
Lec 8	Methods and algorithms for NP-hard combinatorial problems.	2
Lec 9	Application of artificial intelligence based techniques for combinatorial problems.	2
	Total hours	**18**

Form of classes - class		**Number of hours**
Cl 1		
Cl 2		
Cl 3		
Cl 4		
..		
	Total hours	

Form of classes - laboratory		**Number of hours**
Lab 1		
Lab 2		
Lab 3		
Lab 4		

Lab 5		
…		
	Total hours	

Form of classes - project		Number of
Proj 1	Getting acquainted with a case study plant (complex of operation), elaboration of mathematical model and decision making problem formulation.	2
Proj 2	Analysis of the plant on the basis of mathematical model, choice of the decision making method and eleboration of solution algorithm.	2
Proj 3	Implementation and experimental study of the decision making algorithm.	3
Proj 4	Drawing conclusions and elaboration of the project results in the form of written report.	3
	Total hours	**9**

Form of classes - seminar		Number of hours
Sem 1	Organization of seminars.	2
Sem 2	Solution algorithms of selected travelling salesman problems.	2
Sem 3	Solution algorithms of transportation problem.	2
Sem 4	Solution algorithms of vehicle routing problems, Part I.	2
Sem 5	Solution algorithms of selected packing problems.	2
Sem 6	Solution algorithms of selected location problems	2
Sem 7	Solution algorithm for rate control in computer networks.	2
Sem 8	Solution algorithm for selected decision making problem in logistic systems.	2
Sem 9	Solution algorithm for selected decision making problem in sensor networks.	2
	Total hours	**18**

TEACHING TOOLS USED

N1 Lecture – traditional method.
N2 Consultation.
N3 Individual discussion with student.
N4 Preparation for seminar.
N5 Presentation and discussion during seminar.
N6 Self-contained work.

EVALUATION OF SUBJECT EDUCATIONAL EFFECTS ACHIEVEMENT

Evaluation (F – forming (during semester), P – concluding (at semester end)	Educational effect number	Way of evaluating educational effect achievement
P (seminar)	PEK_U01–PEK_U04	Individual discussion with student during the project.
P (project)	PEK_W03; PEK_U04; PEK_K01; PEK_K02	Evaluation of the presentation as well as the participation in seminar discussion.

P (lecture)	PEK_W01; PEK_W02; PEK_U01–PEK_U04; PEK_K01; PEK_K02	Evaluation of written report of the project.
	PEK_W01–PEK_W03; PEK_K02	Examination

Sem 1	Familiarization with the principles of master thesis realization at Informatics field. Rules related to student presentations. Determining the schedule of student presentations.	2
Sem 2	Review of basic skills related to preparation and presentation of scientific texts by students, beginning from the choice of topic, selection of tasks to be performed, use of literature and also how to write thesis and how obtained results should be interpret.	2
Sem 3 – Sem15	During semester each student has 2 presentations. The first presentation is related to the general view of the thesis topic, its placement in the literature and in the Informatics field. The student should present the primary aim of thesis, the state of art related to thesis topic, the concept of solution, the initial structure of thesis and timetable for further work. The purpose of the second presentation is preparation to defense and demonstrate presentation skills in English. The second presentation consists of two parts, namely, discussion of the results of the work in English and a short presentation in Polish devoted to the results of the thesis.	14
	Total hours	18

TEACHING TOOLS USED

N1. Multimedia presentations
N2. Examples of scientific papers and reports from the field of computer science.
N3. E-Learning System used to publish teaching materials and announcements, also used for collection and evaluation of student work.

EVALUATION OF SUBJECT EDUCATIONAL EFFECTS ACHIEVEMENT

Evaluation (F – forming (during semester), P – concluding (at semester end)	Educational effect number	Way of evaluating educational effect achievement
P	PEK_U01 PEK_U02	Evaluation of the presentation of the work at the seminar and prepared documentation from the presentation. The evaluation shall be subject to the fulfillment of the requirements for the presentation, including its substantive scope, structure and organization of presentation, techniques of conversation, a form of presentation, compactness of presentation and conclusions reached. Participation in the discussions after presentation is also evaluated. In addition, the seminar leader is able to control the cooperation between supervisors and graduate students.

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

1. A basic knowledge of decision support systems.
2. A basic knowledge of information and telecommunication theory and engineering.

\

SUBJECT OBJECTIVES

C1 Acquisition of knowledge on the following control issues in computer systems: traffic control in computer networks, task and resource allocation, task scheduling and application of nondeterministic descriptions and artificial intelligence for selected control problems in computer networks.
C2 Developing skills in implementation of control algorithms and performing systems analysis.
C3 Acquisition of skills related to project development and presentation.

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:
PEK_W01 A student has knowledge in an area of control systems.
PEK_W02 A student knows analysis methodology and methodology of designing control algorithms in computer systems.
PEK_W03 A student knows selected methods of control under uncertainty.
relating to skills:
PEK_U01 A student has an ability of the formulation of selected control problems in computer systems.
PEK_U02 A student is able to design the control algorithm for selected computer systems.
PEK_U03 A student is able to analyse the properties of control systems.

relating to social competences:
PEK_K01 A student is able to independent search for information about the object, and subject information to critical analysis.
PEK_K02 A student is able to think in a creative way.

PROGRAMME CONTENT

Form of classes – lecture		**Number of hours**
Lec 1	Introduction to the basic problems of control in computer systems.	1
Lec 2	Computer system as a control object and an executor of control algorithm.	1
Lec 3	Computer system as a control system – properties and requirements.	1
Lec 4	An operating system as a complex executor of control algorithms.	1
Lec 5	Basic issues of the traffic control in computer networks (congestion control, admission control, routing, rate control).	1
Lec 6	Flow control in computer networks.	1
Lec 7	Congestion control.	1

Lec 10	Resource allocation in computer systems.	1
Lec	Task scheduling in computer systems.	2

11		
Lec 12	Application of nondeterministic descriptions for selected control problems in computer systems.	2
Lec 13	Selected problems related to control of complex and distributed systems.	2
Lec 14	Final test.	2
	Total hours	18

Form of classes – project		**Number of hours**
Proj 1	Formulation of the design task.	1
Proj 2	Analysis of assumptions, objectives, requirements and restrictions.	1
Proj 3	The development of alternative solutions, choice of solution that fulfills the criterion.	2
Proj 4	The elaboration of the system structure.	1
Proj 5	Analysis of the way of implementation.	2
Proj 6	Conclusions and preparation of a written report.	2
	Total hours	9

TEACHING TOOLS USED

N1. Traditional lecture.
N2. Sample case study.
N3. Consultations.
N4. Conversations with an individual student.
N5. Test
N6. Students' individual work.
N7. Multimedia presentation.

EVALUATION OF SUBJECT EDUCATIONAL EFFECTS ACHIEVEMENT

Evaluation (F – forming (during semester), P – concluding (at semester end)	Educational effect number	Way of evaluating educational effect achievement
F	PEK_U01-PEK_U03 PEK_K01-PEK_K02	Individual consultations.
P (lecture)	PEK_W01-PEK_W03 PEK_K01	Test
P (project)	PEK_U01-PEK_U03 PEK_K01-PEK_K02	Evaluation of the written report and multimedia presentation.

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

1. Basic mathematical knowledge for 1st level of studies.
2. Informatics knowledge background.
3. Algorithms knowledge background.

\

SUBJECT OBJECTIVES

C1 Acquiring knowledge about functions and significance of information systems in contemporary organizations
C2 Acquainting with the functions and development of information systems in information society
C3 Acquainting with the different methods of information retrieval by surfing the Web
C4 Recognizing the problems of passing of contemporary organizations to Internet space
C5 Obtainment of skills to analyze the literature from information systems area and to synthesize the contents from different sources
C6 Application of the obtained knowledge to presentation the problems from information systems area by means of using adequate tools

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:
PEK_W01 Familiarity with basic models of information systems
PEK_W02 Basic knowledge about Web information systems
PEK_W03 Familiarity with common multimedia technologies
PEK_W04 Understanding of the measures of information retrieval efficiency

relating to skills:
PEK_U01 Student can to build information query for different types of information needs
PEK_U02 Can to determine basic features of information system for given organization
PEK_U03Student be able to evaluate the precision of retrieved information
PEK_U04 Can to present basic features of given information system

relating to social competences:
PEK_K01 Can individually to use literature of the subject and to select useful information
PEK_K02 Student is convinced above positive role of information systems in stimulation of the civilization development

PROGRAMME CONTENT

	Form of classes - lecture	**Number of hours**
Lec 1	History of information systems development. Information processing. Theoretical basis of information systems. Automation of information flow in organization.	2
Lec 2	Functioning of information systems in computer networks. Information retrieval. Digital libraries.	2

Lec 3	Multimedia. Importance of multimedia technologies in information systems development. How societies embrace information technology.	2
Lec 4	Efficiency of information systems. Case study of chosen information system.	2
Lec 5	Test	1
	Total hours	9

Form of classes - class		**Number of hours**
Cl 1

None.

\

SUBJECT OBJECTIVES

C1 Getting to know foundations of designing computer science decision support systems using general systemic methods which make it possible to apply unified approaches for analysis and decision making for decision support systems of different nature.
C2 Acquisition of skills to represent in the form of mathematical formulas of decision making plants treated as input-output plants.
C3 Acquisition of skills to analyze of decision making plants treated as input-output plants.
C4 Getting acquainted with methods and algorithms of multi-stage decision making.
C5 Acquisition of skills to apply dynamic programming method.
C6 Getting to know metods and algorithms of multi-criteria decision making.
C7 Acquisition of skills to use AHP method.

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:
PEK_W01 Student knows foundations of designing of decision support systems for any kind of plants.
PEK_W02 Student knows foundations of analysis and decision making for input-output plants with logic knowledge representation.
PEK_W03 Student knows selected method of multi-stage and multi-criteria decision making.
relating to skills:
PEK_U01 Student is able to elaborate a mathematical model for an input-output decision making plant in discrete state space as well as with logic knowledge representation.
PEK_U02 Student can solve analysis and decision making tasks for elementary plants with logic knowledge representation.
PEK_U03 Student is able to solve multi-stage decision making problem using Bellman's Principle and dynamic programming.
PEK_U04 Student can use AHP algorithm for the solution od multi-criteria decision making problem
relating to social competences:
PEK_K01 Student can take advantage of professional literature by oneself and can perform the critical analysis of information mined.
PEK_K02 Student can think creatively.

PROGRAMME CONTENT

Form of classes - lecture		**Number of hours**
Lec 1	Decision support systems – definitions, structures, problems, application of discrete state equations and logic expressions for representation of decision making plants.	2
Lec 2	Outline of logic-algebraic method and its application to solution of analysis and decision making for input-output decision making plants.	2
Lec 3	Decision making – definition, typology, logic-algebraic plant, Bellman's Principle and multi-stage decision making.	2
Lec 4	Multi-criteria decision making – Pareto sets, AHP method.	2
Lec 5	Examples of computer decision support systems.	1
	Total hours	9

Form of classes - class		**Number of hours**
Cl 1	Solution of numerical exercises concerning difference equations as well as propositional calculus.	2
Cl 2	Solution of numerical exercises concerning mathematical representations of input-output plants.	2
Cl 3	Solution of numerical exercises concerning analysis and decision making using logic-algebraic method.	2
Cl 4	Solution of numerical exercises concerning dynamic programming and AHP	2

	method.	
Cl 5	Final test.	1
	Total hours	9

Form of classes - laboratory		Number of hours
Lab 1		
Lab 2		
Lab 3		
Lab 4		
Lab 5		
…		
	Total hours	

Form of classes - project		Number of hours
Proj 1	Collecting of indispensable information about selected plant being the decision making plant.	2
Proj 2	Determination of mathematical model of selected decision making plant and decision making problem formulation as well as analysis of decision making plant using its mathematical model.	2
Proj 3	Choice of decision making method for further usage as well as elaboration of decision making algorithm.	2
Proj 4	Implementation and analysis of decision making algorithm.	2
Proj 5	Elaboration of conclusions and written report of the project performed.	1
	Total hours	9

Form of classes - seminar		Number of hours
Sem 1		
Sem 2		
Sem 3		
…		
	Total hours	

TEACHING TOOLS USED
N1 Lecture – traditional method. N2 Classes – traditional method. N3 Consultation. N4 Individual discussion with student. N5 Short test (10 mins.). N6 Self-contained work.

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

43. Has a basic knowledge of ICT systems and computer communication networks (K1INF_W11).
44. Knows the basic methods and tools for collecting, processing and retrieval of information and knowledge extraction (K1INF_W16)
45. Can use the right tools to build a simple model of the process (the object), to formulate specific task analysis and decision making (K1INF_U15)
46. Can effectively use the methods and tools for collecting, processing and retrieval of information and knowledge extraction (K1INF_U16)
47. It has the ability to self-education, including in order to improve the professional competence (K1INF_U05)
48. Understands the need and knows the possibility of lifelong learning and to improve their professional and social competences (K1INF_K01)

SUBJECT OBJECTIVES

C1. Ordered, underpinned by theoretical knowledge of methods and techniques for transmitting signals using different modulation techniques, methods and techniques of information transmission, methods of organization and management of data communications traffic in the tasks of design and analysis of communication systems, methods of delivering service quality of ICT systems, analysis of quantitative and qualitative requirements and methods for sizing of distributed IT systems.

C2. Skills about the differences and benefits of the use of analog and digital data transmission techniques, the differences and benefits of the use of wired and wireless signal transmission techniques, developing the concept of using wired and wireless technologies in the basic applications of ICT systems, defining the qualitative and quantitative requirements of the user information and communication systems range of data, designing ICT solutions needed to achieve the qualitative and quantitative requirements of the user, using standards and solutions available on the market, estimating the cost of preparing and maintaining ICT solutions needed to achieve the qualitative and quantitative requirements, designing modernization of IT solutions needed to achieve the qualitative and quantitative requirements, identifying differences and similarities between solutions in a variety of applications (e-health, e-government and e-learning, in real-time systems, etc.).

C3. Skills for the design and analysis of complex, distributed ICT systems providing network services for distributed computer communication systems.

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:

K2INF_W02: Has a structured, theoretically founded essential knowledge of business modeling and requirements specification systems.

K2INF_W03: Has a structured, theoretically founded essential knowledge in the delivery of information distributed systems

K2INF_W06: Achieves results in the category of knowledge for specialty data communications

relating to skills:

K2INF_U05: Can - in formulating and solving engineering tasks - integrate knowledge of the fields of science and scientific disciplines relevant to the study being studied and applied a systemic approach, taking into account the non-technical aspects

K2INF_U06: Can solve the modeling, analysis and decision making for different types of objects

K2INF_U08: Achieves results and skills in areas of data exchange and computer communications systems

relating to social competences:

K2INF_K01: Can think and act in a creative and enterprising

K2INF_K02: Has aware of the social role of technical graduating, especially understands the need for the formulation and communication to the public, especially through the mass media, information and opinion on the achievements of technology and other aspects of engineering, shall endeavor to provide such information and opinions in a widely understood the reasons for the different points of view

PROGRAMME CONTENT		
Form of classes - lecture		**Number of hours**
Lec 1	Classification of ICT systems from different points of view. Quality of Experience (QoE) and Quality of Service (QoS) in ICT systems with elastic and streaming traffic.	2
Lec 2	Introduction to queuing. Open and close networks of queues. Queuing models of circuit-switched and packet-switched computer communication systems. Burke's theorem and Kleinrock approximation.	2
Lec 3	Access control, flow control and routing tasks formulation and solution in distributed environments.	1
Lec 4	Requirements analysis	1
Lec 5	Models (Poisson, Markov modulated, self-similarity, etc) of teletraffic and its application in traffic engineering tasks.	1
Lec 6	QoS delivery concepts: best effort, integrated services and differentiated services	1
Lec 7	New concepts of systems and networks - NXGN (Next Generation Networks) i NWGN (New Generation Network). Summary.	1
	Total hours	9

PROGRAMME CONTENT	
Form of classes - project	**Number**

		of hours
Proj 1	Formulation design task based on the analysis of the literature, documentation, etc.	2
Proj 2	Justification for the choice task and purpose of the task design - an analysis of the expected benefits of the project task.	2
Proj 3	Quantitative and qualitative requirements analysis for the communication system under design	2
Proj 4	Analysis of state of the art on how to solve the task design and analysis and selection of the task design methodology	2
Proj 5	Tools (methods, algorithms, procedures, software and hardware) analysis and selection required for the implementation of the project task	2
Proj 6	Implementation of prototype of modules solve the task and prototype testing and evaluation	2
Proj 7	Modification of solutions using prototype test results	2
Proj 8	Integration of modules distinguished at the stages of requirements analysis and prototyping. Verification and testing of an integrated solution design task	2
Proj 9	Analysis of the possibility of extending the project tasks. Preparation of tfinal presentation and documentation of the design task. Presentation of the results of the design task	2
	Total hours	18

TEACHING TOOLS USED
N1. Traditional lecture supported by whole class multimedia presentations based on literature and open access and commercial sources.
N2. Student's own works – solving experiments and tasks in laboratory as well as homework.
N3. Student's own works – literature and open access sources studies.
N5. Collective works in laboratory
N5. Student's own works – preparation of presentations and technical documentations.

EVALUATION OF SUBJECT EDUCATIONAL EFFECTS ACHIEVEMENT		
Evaluation (F – forming (during semester), P – concluding (at semester end)	Educational effect number	Way of evaluating educational effect achievement
F1 (lecture)	K2INF_W03 K2INF_W04 K2INF_W06 K2INF_U05 K2INF_U06 K2INF_U08 K2INF_K01 K2INF_K02	Observation and verification of student activity. Solving the sample jobs.
F1 – F9 (project)	K2INF_W06	Checking the preparation of the student. Checking

	K2INF_U05 K2INF_U06 K2INF_U08 K2INF_K01	the presence of the student. Observation of student activity. Observation and assessment of student autonomy.
P (lecture)	K2INF_W03 K2INF_W04 K2INF_W06 K2INF_U05 K2INF_U06 K2INF_U08 K2INF_K01 K2INF_K02	Colloquium (course credit) in the evaluation of forming F1 (lecture)
P (project)	K2INF_U05 K2INF_U06 K2INF_U08 K2INF_K01	Total weighted ratings F1 – F9 (project) and the assessment for the presentation of the final results of the project.

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

1. Knowledge of mathematics and mathematical statistics

\

SUBJECT OBJECTIVES

C1 Introduce the methods and techniques of the statistical data analysis to students
C2 Gather knowledge for Knowledge Discovery (Data Mining)
C3 Applying the gathered knowledge to drawing conclusions based on data analysis

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:
PEK_W01 student has a basic knowledge of Knowledge Discovery (Data Mining)
PEK_W02 student has a basic knowledge of statistical data analysis
PEK_W03 student is able to present differences between parametric and non-parametric tests

relating to skills:
PEK_U01 student is able to choose a proper statistical test
PEK_U02 student is able to draw conclusion from data analysis
PEK_U03 student is able to select a proper data mining method

relating to social competences:
PEK_K01 student is able to search and reuse the primary and secondary literature listed below and is able to gather the proper knowledge
PEK_K02 student understands the need for systematic and individual work in order to cover the scope of the course

PROGRAMME CONTENT

Form of classes - lecture		**Number of hours**
Lec 1	Introduction to knowledge discovery	2
Lec 2	Classification and Data Clustering	2
Lec 3	Clustering Algorithms	2
Lec 4	Statistics - basic notions	2
Lec 5	The selected problems of estimation theory	2
Lec 6	Parametric tests for one population	2
Lec 7	Non-parametric tests for one population	2
Lec 8	Parametric tests for two populations	2
Lec 9	Non-parametric tests for more than 2 populations	2
	Total hours	18

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

1. Basic knowledge of computer communication systems
2. Basic knowledge of applied cryptography

SUBJECT OBJECTIVES

C1 Skills and knowledge of security risk assessment and knowledge of the norms and methods used during security systems design.
C2 Skills of selecting strategy and technical solutions for appropriate security architecture design.
C3. Social competence and skills in organizational leadership, management and collaboration. Ability to work well in teams, self-motivate and understand conflict management. Understanding of organizational mission, governance and administrative systems. Understanding how to use decision making to support mission.

SUBJECT EDUCATIONAL EFFECTS
relating to knowledge:
PEK_W01Has a basic knowledge of data and information security management.
PEK_W02 Has a knowledge of mandatory norms and standards related to IT security
PEK_W03 Has a knowledge of risk management in IT systems
relating to skills:
PEK_U01Able to design security architecture for IT systems
PEK_U02 Able to recognize the security requirements of IT system
PEK_U03 Able to assess the risk level for IT system components
relating to social competences:
PEK_K01Unerstands the need of risk sources identification in IT systems
PEK_K02 Understands the role of security policy in achieving the required security level

PROGRAMME CONTENT		
Form of classes - lecture		**Number of hours**
Lec 1	Introduction to information security management	2
Lec 2	Norms, standards and recommendations	2
Lec 3	General and technical risk	2
Lec 4	Risk analysis and risk management strategies	2
Lec 5	Three layered model: goals, strategy, policy	2
Lec 6	Security systems of institutions	2
Lec 7	Strategy of countermeasures selection	2
Lec 8	Methods of defining security architecture and protecting systems in accordance with the identified requirements	2
Lec 9	Final exam	2
	Total hours	18

PROGRAMME CONTENT		
Form of classes - project		**Number of hours**
Pr 1	Introduction. The subjects and problems of project description	2
Pr 2	The goals and scope definition for project problems.	2
Pr 3	Methods, tools and algorithms selection and specification	2
Pr 4	Plan of experiments and evaluation of the project results	2
Pr 5	Project work documentation	2
Pr 6	Quantitative proprieties evaluation	2
Pr 7	The final evaluation of the project results	2
Pr 8	The idea for future work. The next steps to improve and extend product	2
Pr 9	Project summary.	2
	Total hours	18

TEACHING TOOLS USED
N1. Tradnitional and multimedia lectures N2. Sudent's own work – project preparation N3. Project – methods of security related project preparation N4. Tutorials N5. Student's own work – literature study

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

1. Basic knowledge and skills in the field of teleinformatics confirmed by positive grade fromcourse "Fundamentals of computer networks"
2. Basic knowledge and skills in the field of computer networks confirmed by positive grade from course "Computer networks"
3. Basic knowledge and skills in the field of computer control systems confirmed by positive grade from course "Computer control systems"

SUBJECT OBJECTIVES

C1 Knowledge of current trends in technology development and application of methods for the collection, storage, transmission, processing and presentation of information in integrated ICT systems and automation on an example of intelligent building infrastructure..

C2 Acquiring knowledge and skills in the design and integration of heterogeneous ICT systems and automation systems.

C3 Acquiring knowledge and skills in providing the required level of quality, safety and accessibility of services in heterogeneous ICT systems.

SUBJECT EDUCATIONAL EFFECTS

Relating to knowledge:

PEK_W01 – knows the current trends in technology development and application of methods for collecting, storing, transmitting, processing and presentation of information in integrated ICT systems and automation on an example of intelligent building infrastructure.

PEK_W02 – has knowledge of the design and integration of heterogeneous IT systems and automation systems.

PEK_W03 – has expertise in providing the required level of quality, safety and accessibility of services in heterogeneous ICT systems.

Relating to skills:

PEK_U01 – has skills necessary to select proper architecture for the communication system in accordance with the non-functional requirements.

PEK_U02 – is able to select the technologies and techniques in the field of ICT and automation in order to ensure the required level of quality, safety and accessibility of services in a heterogeneous environment of intelligent building.

PEK_U03 – can design a computer system for the integration of subsystems in an intelligent building.

Relating to social competences:

PEK_K01 – has the ability to work in a team

PROGRAMME CONTENT		
Form of classes - lecture		**Number of hours**
Lec 1	The concept of the intelligent building	2
Lec 2	Energy management, heating, ventilation and air-conditioning subsystems	2
Lec 3	Security and safety subsystems	2
Lec 4	Lighting management and sound system (teleconferencing system, closed-circuit television) subsystems	2
Lec 5	Control and monitoring - integration and management IB subsystems	2
Lec 6	Intelligent building ICT infrastructure	2
Lec 7	Data transmission protocols and infrastructure standards in an intelligent building	2
Lec 8	Methods for information and knowledge collection, processing and sharing in telemetry systems on the example of intelligent building	2
Lec 9	Test	2
	Total hours	**18**

PROGRAMME CONTENT		
Form of classes - project		**Number of hours**
Pr 1	Design of selected subsystem of intelligent building	2
Pr 2	Design of ICT infrastructure	2
Pr 3	Design of processes carried out in the examplary intelligent building, including the collection and processing of data, decision making, alarm, etc.	2

Pr 4	Design of testbed and test scenarios for the purpose of verifying the accuracy of the proposed solutions	2
Pr 5 – Pr 8	Implementation of intelligent building simulation and verification of the proposed solutions, including a quantitative analysis of the quality, safety and accessibility of services in an intelligent building.	8
Pr 9	Presentation of the project's results	2
	Total hours	**18**

TEACHING TOOLS USED
N1. Traditional lectures using multimedia presentations N2. Own work - preparation of the project N3. Group work in classes

EVALUATION OF SUBJECT EDUCATIONAL EFFECTS ACHIEVEMENT		
Evaluation (F – forming (during semester), P – concluding (at semester end)	Educational effect number	Way of evaluating educational effect achievement
F1	PEK_U01 - PEK_U03, PEK_K01	Evaluation of effects of the group project
F2	PEK_W01 - PEK_W03	Test
C=(F1+F2)/2

PROGRAMME CONTENT		
Form of classes - lecture		**Number of hours**
Lec 1	World Wide Web Consortium data and matadata representation standards	2
Lec 2	Domain ontologies	2
Lec 3	Semantic Web, Semantic Web – application scenarios	2
Lec 4	Inteligent service systems	2
Lec 5	Web data and metadata standards applied to service description	2
Lec 6	Requirements analysis in service systems	2
Lec 7	Service composition. Quality and security of composite services	2
Lec 8	Designing of complex service systems	2
Lec 9	User activity analysis and data mining in service systems, resource prediction problem in service systems	2
	Total hours	18

Form of classes - laboratory		**Number of hours**
La1	Introduction. Security in lab. Software configuration.	2
La2	Software ontology management tools, XML, RDF, OWL languages	2
La3	Ontology development, axioms and rules in ontologies	2
La4	Exemplary domain ontology	2
La5	Web service descriptions	2
La6	Composite services descriptions	2
La7	Cemposite service requirements	2
La8	Service discovery and editing	2

La9	Service composition - algorithms	2
	Total hours	18

TEACHING TOOLS USED
N1. Lectures with multimedia presentations.
N2. Literature studies – student's work
N3. Implementation and analysis of lab tasks
N4. Preparation of documentation and evaluation reports for lab tasks

EVALUATION OF SUBJECT EDUCATIONAL EFFECTS ACHIEVEMENT

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

1. Competence in basic algebra and mathematical analysis
2. Differential equations
3.

\

SUBJECT OBJECTIVES

C1 Knowledge on methodological postulates
C2Competence in mathematical modeling on the base of methodology of empirical sciences
C3 Competence in hypothesis testing
C4 Competence in creation of homogenous and invariant to the systems of units models

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:
PEK_W01Knowledge on methodological postulates
PEK_W02Knowledge on logical postulates in creation of mathematical model
…
relating to skills:
PEK_U01Competence in mathematical modeling with accordance to methodological postulates
PEK_U02Competence in hypothesis and models testing
…
relating to social competences:
PEK_K01Competence in exactness of model description

PEK_K02Ability to study new problems of methodology and reflection on experiment

PROGRAMME CONTENT

	Form of classes - lecture	Number of hours
Lec 1	Methodological postulates of: determinism, closed system, accordance with accepted theories, simplicity and falsification	2
Lec 2	Classical theory of measurements, dimensional analysis and dimensional space	2
Lec 3	Dimensional description of a process, dimensional function, theorem Pi	2
Lec 4	Applications of theorem Pi in: creation of mathematical models construction, experiment planning, identification	2

Lec 5	Theory of similarity, falsification of the completeness of dimensional function arguments	2
Lec 6…. Lec7 Lec8	Identification of mathematical models Multistage identification and description of model construction Models testing	2 2 2
	Total hours 16 plus two colloquiums 2 hours

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

1. Logic basics

\

SUBJECT OBJECTIVES

C1 Knowledge acquisition of the methods for knowledge representation, knowledge conflicts and the problems of distributed knowledge integration.

C2 Knowledge acquisition of the methods for knowledge inconsistency measure and different structures of knowledge integration, together with examples of applications.

C3 Acquiring the ability of knowledge integration by using certain algorithms for knowledge integration.

C4 Understanding the need of applying the methods for conflicts resolution of integrated knowledge.

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:

PEK_W01 He knows the methods for knowledge representation, the model of knowledge conflict and the measures for knowledge inconsistency.

PEK_W02 He knows the methods for inconsistency measure of integrated knowledge.

PEK_W03 He knows consensus postulates and methods for conflict resolution of integrated knowledge.

PEK_W04 He has knowledge of inconsistency of integrated knowledge on the syntactic and semantic level.

PEK_W05 He knows the methods for knowledge integration of different knowledge structures.

PEK_W06 He knows examples of information systems for which it is necessary to integrate knowledge.

relating to skills:

PEK_U01 He can measure of consistency of integrated knowledge.

PEK_U02 He can apply the algorithms for knowledge integration.

relating to social competences:

PEK_K01 He understands what the conflicts and knowledge inconsistency on the semantic and syntactic level are.

PEK_K02 He understands the necessity of knowledge conflicts resolution.

PROGRAMME CONTENT

Form of classes - lecture		**Number of hours**
Lec 1	Conditions of the course completion. An introduction to the subject.	2

Lec 2	The methods for knowledge representation. Knowledge conflicts.	2
Lec 3	Knowledge consistency measures.	2
Lec 4	The model of knowledge integration.	2
Lec 5	Consensus methods and algorithms for knowledge integration.	2
Lec 6	Knowledge inconsistency on the syntactic and semantic level.	2
Lec 7	Ontology integration.	2
Lec 8	Knowledge integration in a information system.	2
Lec 9	Test of knowledge.	2
	Total hours	**18**

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

22. Practice in object-oriented programming.
23. Basic knowledge of software engineering.

\

SUBJECT OBJECTIVES

C1. Basic knowledge in the area of software system modeling with the stress on business modeling as the initial phase of the software development process.
C2. Basic knowledge in the area of the requirements specification.

SUBJECT EDUCATIONAL EFFECTS

Relating to knowledge:
PEK_W01: Students have basic knowledge on business modeling.
PEK_W02: Students know and understand the role of specification requirements.
PEK_W03: Students have basic knowledge on selected modeling languages.

Relating to skills:
PEK_U01: Students, in cooperation with domain experts, can construct and analyze business models.
PEK_U02: Students can build models of system requirements.

Relating to social competences:
PEK_K01: Students are able to cooperate with representatives of application domain.

PROGRAMME CONTENT		
Form of classes - lecture		**Number of hours**
Lec 1	Basic notions for software development cycle. Survey of modeling languages – UML and BPMN.	1
Lec 2	Class diagrams – classes, associations, generalizations.	2
Lec 3	Object Constraint Language.	2

Lec 4	BPMN process diagrams.	2
Lec 5	System requirements; use case diagrams.	2
	Total hours	9

Form of classes - class		Number of hours
Cl 1	Analysis of textual descriptions of exemplary application domains – structural aspect.	2
Cl 2	Construction and analysis of class diagrams.	2
Cl 3	Construction and analysis of class diagrams.	2
Cl 4	Construction and analysis of OCL constraints imposed on diagrams.	2
Cl 5	Case study – an example of structural modeling.	2
Cl 6	Test 1.	1
Cl 7	Construction and analysis of simple BPMN process diagrams.	2
Cl 8	Construction and analysis of advanced BPMN process diagrams.	2
Cl 9	Construction and analysis of use case diagrams.	2
Cl 10	Test 2.	1
	Total hours	18

TEACHING TOOLS USED
N1. Lecturer's presentation at a blackboard, supported by a multimedia presentation using a laptop and a projector. N2. Individual search and study of literature and Internet sources. N3. Access to teaching materials published in the local area network. N4. Individual consultations.

EVALUATION OF SUBJECT EDUCATIONAL EFFECTS ACHIEVEMENT

Evaluation (F – forming (during semester), P – concluding (at semester end)	Educational effect number	Way of evaluating educational effect achievement
F1	PEK_W01 PEK_U01 PEK_K01	Each student gets 1 point for own solution of a problem from the list of problems for the given class.
F2	PEK_W01 PEK_W02 PEK_U01 PEK_U02 PEK_K01	Each student gets up to 10 points for own solution of problems for the given test (intermediate and final).
F3	PEK_W01 PEK_W02	The final evaluation for the classes is determined on the basis of total marks obtained by the student's activity for exercise (F1) and colloquia (F2). Positive

	PEK_W03 PEK_U01 PEK_U02 PEK_K01	mark is awarded to a student who has obtained at least 4 points for each of the symposia and has won a total of 10 points. If this condition is met, the number of points P is the basis for evaluation in accordance with the following table: <table><tr><td>P</td><td>10</td><td>12</td><td>14</td><td>16</td><td>18</td></tr><tr><td>Mark</td><td>3.0</td><td>3.5</td><td>4.0</td><td>4.5</td><td>5.0</td></tr></table> Students who get at least a very good grade are exempt from the examination with the same mark as for the classes.

C: The final evaluation of the course is determined based on the results of the examination. The examination lasts two hours and consists of a set of tasks, the total number of 20 points. The condition for a positive assessment of the final exam is to get 10 points and a positive final evaluation of the exercise.
The final evaluation of the examination is determined in accordance with the following table:

Points	10	12	14	16	18
Mark	3.0	3.5	4.0	4.5	5.0

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

1 Knowledge, skills and competences acquired at Informatics field at second level of study until 3th semester

\

SUBJECT OBJECTIVES

C1 Preparing students to write a master thesis according the internal requirements in Informatics field at Faculty of Computer Science and Management, Wrocław University of Technology,

C2 Providing students with basic skills related to preparation and presentation of scientific texts, beginning from the choice of topic, selection of tasks to be performed, use of literature to interpretation of the results.

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:

…

relating to skills:

PEK_U01 He is able to acquire information from literature, databases and other sources, also in English or other language used for communication in Informatics field, is able to integrate the information obtained, interpret them, make critical evaluation and also draw conclusions and formulate and justify opinions related to prepared master thesis.

PEK_U02 He can communicate using a variety of techniques in his professional environment and in other environments, also in English or other foreign language used for communication in Informatics field and also to present the results of his master thesis

relating to social competences:

…

PROGRAMME CONTENT

Form of classes - lecture		**Number of hours**
Lec 1		
Lec 2		
	Total hours	

Form of classes - class		**Number of hours**
Cl 1		
Cl 2		
	Total hours	

Form of classes - laboratory		**Number of hours**
Lab 1		
Lab 2		
	Total hours	

Form of classes - project		**Number of hours**
Proj 1		
Proj 2		
	Total hours	

Form of classes - seminar	**Number of hours**

Sem 1	Familiarization with the principles of master thesis realization at Informatics field. Rules related to student presentations. Determining the schedule of student presentations.	2
Sem 2	Review of basic skills related to preparation and presentation of scientific texts by students, beginning from the choice of topic, selection of tasks to be performed, use of literature and also how to write thesis and how obtained results should be interpret.	2
Sem 3 – Sem15	During semester each student has 2 presentations. The first presentation is related to the general view of the thesis topic, its placement in the literature and in the Informatics field. The student should present the primary aim of thesis, the state of art related to thesis topic, the concept of solution, the initial structure of thesis and timetable for further work. The purpose of the second presentation is preparation to defense and demonstrate presentation skills in English. The second presentation consists of two parts, namely, discussion of the results of the work in English and a short presentation in Polish devoted to the results of the thesis.	14
	Total hours	18

TEACHING TOOLS USED

N1. Multimedia presentations
N2. Examples of scientific papers and reports from the field of computer science.
N3. E-Learning System used to publish teaching materials and announcements, also used for collection and evaluation of student work.

EVALUATION OF SUBJECT EDUCATIONAL EFFECTS ACHIEVEMENT

Evaluation (F – forming (during semester), P – concluding (at semester end)	Educational effect number	Way of evaluating educational effect achievement
P	PEK_U01 PEK_U02	Evaluation of the presentation of the work at the seminar and prepared documentation from the presentation. The evaluation shall be subject to the fulfillment of the requirements for the presentation, including its substantive scope, structure and organization of presentation, techniques of conversation, a form of presentation, compactness of presentation and conclusions reached. Participation in the discussions after presentation is also evaluated. In addition, the seminar leader is able to control the cooperation between supervisors and graduate students.

PRIMARY AND SECONDARY LITERATURE

PRIMARY LITERATURE:

[266] Literature related to the scope of realized project selected by student and recommended by the teacher.

[267] Requirements for engineering thesis at the Faculty of Computer Science and Management, Wrocław University of Technology, www.wiz.pwr.wroc.pl

SECONDARY LITERATURE:

SUBJECT SUPERVISOR (NAME AND SURNAME, E-MAIL ADDRESS)

Dr hab. inż. Leszek Borzemski, prof. PWr, leszek.borzemski@pwr.wroc.pl

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

1. Basic mathematical knowledge for 1st level of studies.

2. Informatics knowledge background.
3. Algorithms knowledge background.

\

SUBJECT OBJECTIVES

C1 Acquiring knowledge about functions and significance of information systems in contemporary organizations
C2 Acquainting with the functions and development of information systems in information society
C3 Acquainting with the different methods of information retrieval by surfing the Web
C4 Recognizing the problems of passing of contemporary organizations to Internet space
C5 Obtainment of skills to analyze the literature from information systems area and to synthesize the contents from different sources
C6 Application of the obtained knowledge to presentation the problems from information systems area by means of using adequate tools

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:
PEK_W01 Familiarity with basic models of information systems
PEK_W02 Basic knowledge about Web information systems
PEK_W03 Familiarity with common multimedia technologies
PEK_W04 Understanding of the measures of information retrieval efficiency

relating to skills:
PEK_U01 Student can to build information query for different types of information needs
PEK_U02 Can to determine basic features of information system for given organization
PEK_U03Student be able to evaluate the precision of retrieved information
PEK_U04 Can to present basic features of given information system

relating to social competences:
PEK_K01 Can individually to use literature of the subject and to select useful information
PEK_K02 Student is convinced above positive role of information systems in stimulation of the civilization development

PROGRAMME CONTENT

	Form of classes - lecture	**Number of hours**
Lec 1	History of information systems development. Information processing. Theoretical basis of information systems. Automation of information flow in organization.	2
Lec 2	Functioning of information systems in computer networks. Information retrieval. Digital libraries.	2
Lec 3	Multimedia. Importance of multimedia technologies in information systems development. How societies embrace information technology.	2
Lec 4	Efficiency of information systems. Case study of chosen information system.	2
Lec 5	Test	1
	Total hours	9

FACULTY OF COMPUTER SCIENCE AND MANAGEMENT

SUBJECT CARD

Name in Polish: *Systemy informatyczne i telekomunikacyjne*

Name in English: *Information and telecommunication systems*

Main field of study (if applicable): Computer science
Specialization (if applicable): Teleinformatics
Level and form of studies: 2nd level, ~~full-time~~ / part-time*
Kind of subject: obligatory
Subject code INZ4050
Group of courses NO

	Lecture	Classes	Laboratory	Project	Seminar
Number of hours of organized classes in University (ZZU)	18				9
Number of hours of total student workload (CNPS)	120				30
Form of crediting	Crediting with grade				Crediting with grade
For group of courses mark (X) final course					
Number of ECTS points	4				1
including number of ECTS points for practical (P) classes	0				1
including number of ECTS points for direct teacher-student contact (BK) classes	1,6				0,4

*delete as applicable

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

1. Basic knowledge and skills in the field of teleinformatics confirmed by positive grade from course "Fundamentals of computer networks"
2. Basic knowledge and skills in the field of computer networks confirmed by positive grade from course "Computer networks"

SUBJECT OBJECTIVES

C1 Knowledge of current development trends in technology and applications: telecommunications, computer science, information systems.
C2 Acquiring knowledge and skills in the design of ICT systems architectures using:
C2.1 service-oriented systems (SOA),
C2.2 systems with quality of service (QoS) assurance (DiffServ, IntServ),
C2.3 Next Generation Networks (NGN).

SUBJECT EDUCATIONAL EFFECTS

Relating to knowledge:
PEK_W01 – knows the current trends in technology development and application of telecommunication, computer science and information systems
PEK_W02 – has knowledge of the design of service oriented systems.
PEK_W03 – has knowledge of the design of systems with quality of service assurance
PEK_W04 – have knowledge of the design and application of NGN systems
Relating to skills:
PEK_U01 – has skills necessary to select proper architecture for the communication system in accordance with the functional and non-functional requirements.
PEK_U02 – can design an ICT system with use of the service-oriented architecture
PEK_U03 – can design an ICT system with quality of service guaranties
PEK_U04 – can design an ICT system with use of the NGN signaling system

Relating to social competences:
PEK_K01 – has the ability to collect and analyze user requirements for ICT systems
PEK_K02 – has the ability to work in a team

PROGRAMME CONTENT

Form of classes - lecture		**Number of hours**
Lec 1	New developments in the field of information systems and information technology	2
Lec 2	Distributed service-based systems	2
Lec 3	Resources virtualization in computer communication systems	2
Lec 4	Quality of service (QoS) assurance architectures	2
Lec 5	Artificial intelligence methods in information systems and information technology	2
Lec 6	ICT systems modeling	2
Lec 7	New information and telecommunication technologies – innovations	2
Lec 8	Analysis of an exemplary ICT system – e-Health	2
Lec 9	Test	2
	Total hours	**18**

PROGRAMME CONTENT		
Form of classes - seminar		**Number of hours**
Se1, Se2	Designing of service-oriented systems	4
Se3, Se4	Designing of ICT systems with quality of service assurance	4
Se5	Integration of systems with different architectures	1
	Total hours	**9**

TEACHING TOOLS USED
N1. Traditional lectures using multimedia presentations N2. Own work - preparation of the seminars N3. Interactive lecture on the seminar N3. Group work in classes

EVALUATION OF SUBJECT EDUCATIONAL EFFECTS ACHIEVEMENT		
Evaluation (F – forming (during semester), P – concluding (at semester end)	Educational effect number	Way of evaluating educational effect achievement
F1	PEK_U01, PEK_U02, PEK_K01, PEK_K02	Evaluation of effects of the group work on the seminar
F2	PEK_U03, PEK_K01, PEK_K02	Evaluation of effects of the group work on the seminar
F3	PEK_U04, PEK_K01, PEK_K02	Evaluation of effects of the group work on the seminar
F4	PEK_W01 - PEK_W04	Test
P=[(F1+F2+F3)/3+F4]/2

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

None.

\

SUBJECT OBJECTIVES

C1 Getting to know foundations of designing computer science decision support systems using general systemic methods which make it possible to apply unified approaches for analysis and decision making for decision support systems of different nature.
C2 Acquisition of skills to represent in the form of mathematical formulas of decision making plants treated as input-output plants.
C3 Acquisition of skills to analyze of decision making plants treated as input-output plants.
C4 Getting acquainted with methods and algorithms of multi-stage decision making.
C5 Acquisition of skills to apply dynamic programming method.
C6 Getting to know metods and algorithms of multi-criteria decision making.
C7 Acquisition of skills to use AHP method.

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:
PEK_W01 Student knows foundations of designing of decision support systems for any kind of plants.
PEK_W02 Student knows foundations of analysis and decision making for input-output plants with logic knowledge representation.
PEK_W03 Student knows selected method of multi-stage and multi-criteria decision making.
relating to skills:
PEK_U01 Student is able to elaborate a mathematical model for an input-output decision making plant in discrete state space as well as with logic knowledge representation.
PEK_U02 Student can solve analysis and decision making tasks for elementary plants with logic knowledge representation.
PEK_U03 Student is able to solve multi-stage decision making problem using Bellman's Principle and dynamic programming.
PEK_U04 Student can use AHP algorithm for the solution od multi-criteria decision making problem

relating to social competences:
PEK_K01 Student can take advantage of professional literature by oneself and can perform the critical analysis of information mined.
PEK_K02 Student can think creatively.

PROGRAMME CONTENT		
Form of classes - lecture		**Number of hours**
Lec 1	Decision support systems – definitions, structures, problems, application of discrete state equations and logic expressions for representation of decision making plants.	2
Lec 2	Outline of logic-algebraic method and its application to solution of analysis and decision making for input-output decision making plants.	2
Lec 3	Decision making – definition, typology, logic-algebraic plant, Bellman's Principle and multi-stage decision making.	2
Lec 4	Multi-criteria decision making – Pareto sets, AHP method.	2
Lec 5	Examples of computer decision support systems.	1
	Total hours	9
Form of classes - class		**Number of hours**
Cl 1	Solution of numerical exercises concerning difference equations as well as propositional calculus.	2
Cl 2	Solution of numerical exercises concerning mathematical representations of input-output plants.	2
Cl 3	Solution of numerical exercises concerning analysis and decision making using logic-algebraic method.	2
Cl 4	Solution of numerical exercises concerning dynamic programming and AHP method.	2
Cl 5	Final test.	1
	Total hours	9
Form of classes - laboratory		**Number of hours**
Lab 1		
Lab 2		
Lab 3		
Lab 4		
Lab 5		
…		
	Total hours	
Form of classes - project		**Number of hours**
Proj 1	Collecting of indispensable information about selected plant being the decision making plant.	2
Proj 2	Determination of mathematical model of selected decision making plant and	2

	decision making problem formulation as well as analysis of decision making plant using its mathematical model.	
Proj 3	Choice of decision making method for further usage as well as elaboration of decision making algorithm.	2
Proj 4	Implementation and analysis of decision making algorithm.	2
Proj 5	Elaboration of conclusions and written report of the project performed.	1
	Total hours	9

Form of classes - seminar		**Number of hours**
Sem 1		
Sem 2		
Sem 3		
…		
	Total hours	

TEACHING TOOLS USED

N1 Lecture – traditional method.
N2 Classes – traditional method.
N3 Consultation.
N4 Individual discussion with student.
N5 Short test (10 mins.).
N6 Self-contained work.

EVALUATION OF SUBJECT EDUCATIONAL EFFECTS ACHIEVEMENT

Evaluation (F – forming (during semester), P – concluding (at semester end)	Educational effect number	Way of evaluating educational effect achievement

Zał. nr 4 do ZW 64/2012

FACULTY OF COMPUTER SCIENCE AND MANAGEMENT

SUBJECT CARD

Name in Polish: Teoria i inżynieria ruchu teleinformatycznego

Name in English: Theory and engineering of teletraffic

Main field of study (if applicable): Computer science

Specialization (if applicable): Teleinformatics

Level and form of studies: 2nd level, part time

Kind of subject: obligatory

Subject code INZ7600

Group of courses: NO

	Lecture	Classes	Laboratory	Project	Seminar
Number of hours of organized classes in University (ZZU)	9			18	
Number of hours of total student workload	30			90	

(CNPS)					
Form of crediting	Crediting with grade			Crediting with grade	
For group of courses mark (X) final course					
Number of ECTS points	1			3	
including number of ECTS points for practical (P) classes				3	
including number of ECTS points for direct teacher-student contact (BK) classes	0,4			1,2	

*delete as applicable

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

6. Has a basic knowledge of ICT systems and computer communication networks (K1INF_W11).
7. Knows the basic methods and tools for collecting, processing and retrieval of information and knowledge extraction (K1INF_W16)
8. Can use the right tools to build a simple model of the process (the object), to formulate specific task analysis and decision making (K1INF_U15)
9. Can effectively use the methods and tools for collecting, processing and retrieval of information and knowledge extraction (K1INF_U16)
10. It has the ability to self-education, including in order to improve the professional competence (K1INF_U05)
11. Understands the need and knows the possibility of lifelong learning and to improve their professional and social competences (K1INF_K01)

SUBJECT OBJECTIVES

C1. Ordered, underpinned by theoretical knowledge of methods and techniques for transmitting signals using different modulation techniques, methods and techniques of information transmission, methods of organization and management of data communications traffic in the tasks of design and analysis of communication systems, methods of delivering service quality of ICT systems, analysis of quantitative and qualitative requirements and methods for sizing of distributed IT systems.

C2. Skills about the differences and benefits of the use of analog and digital data transmission techniques, the differences and benefits of the use of wired and wireless signal transmission techniques, developing the concept of using wired and wireless technologies in the basic applications of ICT systems, defining the qualitative and quantitative requirements of the user information and communication systems range of data, designing ICT solutions needed to achieve the qualitative and quantitative requirements of the user, using standards and solutions available on the market, estimating the cost of preparing and maintaining ICT solutions needed to achieve the qualitative and quantitative requirements, designing modernization of IT solutions needed to achieve the qualitative and quantitative requirements, identifying differences and similarities between solutions in a variety of applications (e-health, e-government and e-learning, in real-time systems, etc.).

C3. Skills for the design and analysis of complex, distributed ICT systems providing network services for distributed computer communication systems.

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:

K2INF_W02: Has a structured, theoretically founded essential knowledge of business modeling and requirements specification systems.

K2INF_W03: Has a structured, theoretically founded essential knowledge in the delivery of information distributed systems

K2INF_W06: Achieves results in the category of knowledge for specialty data communications

relating to skills:

K2INF_U05: Can - in formulating and solving engineering tasks - integrate knowledge of the fields of science and scientific disciplines relevant to the study being studied and applied a systemic approach, taking into account the non-technical aspects

K2INF_U06: Can solve the modeling, analysis and decision making for different types of objects

K2INF_U08: Achieves results and skills in areas of data exchange and computer communications systems

relating to social competences:

K2INF_K01: Can think and act in a creative and enterprising

K2INF_K02: Has aware of the social role of technical graduating, especially understands the need for the formulation and communication to the public, especially through the mass media, information and opinion on the achievements of technology and other aspects of engineering, shall endeavor to provide such information and opinions in a widely understood the reasons for the different points of view

PROGRAMME CONTENT		
Form of classes - lecture		**Number of hours**
Lec 1	Classification of ICT systems from different points of view. Quality of Experience (QoE) and Quality of Service (QoS) in ICT systems with elastic and streaming traffic.	2
Lec 2	Introduction to queuing. Open and close networks of queues. Queuing models of circuit-switched and packet-switched computer communication systems. Burke's theorem and Kleinrock approximation.	2
Lec 3	Access control, flow control and routing tasks formulation and solution in distributed environments.	1
Lec 4	Requirements analysis	1
Lec 5	Models (Poisson, Markov modulated, self-similarity, etc) of teletraffic and its application in traffic engineering tasks.	1
Lec 6	QoS delivery concepts: best effort, integrated services and differentiated services	1
Lec 7	New concepts of systems and networks - NXGN (Next Generation Networks) i NWGN (New Generation Network). Summary.	1
	Total hours	9

PROGRAMME CONTENT	
Form of classes - project	**Number**

		of hours
Proj 1	Formulation design task based on the analysis of the literature, documentation, etc.	2
Proj 2	Justification for the choice task and purpose of the task design - an analysis of the expected benefits of the project task.	2
Proj 3	Quantitative and qualitative requirements analysis for the communication system under design	2
Proj 4	Analysis of state of the art on how to solve the task design and analysis and selection of the task design methodology	2
Proj 5	Tools (methods, algorithms, procedures, software and hardware) analysis and selection required for the implementation of the project task	2
Proj 6	Implementation of prototype of modules solve the task and prototype testing and evaluation	2
Proj 7	Modification of solutions using prototype test results	2
Proj 8	Integration of modules distinguished at the stages of requirements analysis and prototyping. Verification and testing of an integrated solution design task	2
Proj 9	Analysis of the possibility of extending the project tasks. Preparation of tfinal presentation and documentation of the design task. Presentation of the results of the design task	2
	Total hours	18

TEACHING TOOLS USED
N1. Traditional lecture supported by whole class multimedia presentations based on literature and open access and commercial sources.
N2. Student's own works – solving experiments and tasks in laboratory as well as homework.
N3. Student's own works – literature and open access sources studies.
N5. Collective works in laboratory
N5. Student's own works – preparation of presentations and technical documentations.

EVALUATION OF SUBJECT EDUCATIONAL EFFECTS ACHIEVEMENT		
Evaluation (F – forming (during semester), P – concluding (at semester end)	Educational effect number	Way of evaluating educational effect achievement
F1 (lecture)	K2INF_W03 K2INF_W04 K2INF_W06 K2INF_U05 K2INF_U06 K2INF_U08 K2INF_K01 K2INF_K02	Observation and verification of student activity. Solving the sample jobs.
F1 – F9 (project)	K2INF_W06	Checking the preparation of the student. Checking

	K2INF_U05 K2INF_U06 K2INF_U08 K2INF_K01	the presence of the student. Observation of student activity. Observation and assessment of student autonomy.
P (lecture)	K2INF_W03 K2INF_W04 K2INF_W06 K2INF_U05 K2INF_U06 K2INF_U08 K2INF_K01 K2INF_K02	Colloquium (course credit) in the evaluation of forming F1 (lecture)
P (project)	K2INF_U05 K2INF_U06 K2INF_U08 K2INF_K01	Total weighted ratings F1 – F9 (project) and the assessment for the presentation of the final results of the project.

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

1. Knowledge of mathematics and mathematical statistics

\

SUBJECT OBJECTIVES

C1 Introduce the methods and techniques of the statistical data analysis to students
C2 Gather knowledge for Knowledge Discovery (Data Mining)
C3 Applying the gathered knowledge to drawing conclusions based on data analysis

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:
PEK_W01 student has a basic knowledge of Knowledge Discovery (Data Mining)
PEK_W02 student has a basic knowledge of statistical data analysis
PEK_W03 student is able to present differences between parametric and non-parametric tests

relating to skills:
PEK_U01 student is able to choose a proper statistical test
PEK_U02 student is able to draw conclusion from data analysis
PEK_U03 student is able to select a proper data mining method

relating to social competences:
PEK_K01 student is able to search and reuse the primary and secondary literature listed below and is able to gather the proper knowledge
PEK_K02 student understands the need for systematic and individual work in order to cover the scope of the course

PROGRAMME CONTENT

Form of classes - lecture		**Number of hours**
Lec 1	Introduction to knowledge discovery	2
Lec 2	Classification and Data Clustering	2
Lec 3	Clustering Algorithms	2
Lec 4	Statistics - basic notions	2
Lec 5	The selected problems of estimation theory	2
Lec 6	Parametric tests for one population	2
Lec 7	Non-parametric tests for one population	2
Lec 8	Parametric tests for two populations	2
Lec 9	Non-parametric tests for more than 2 populations	2
	Total hours	18

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

13. Basic knowledge in management

\

SUBJECT OBJECTIVES

C1. Obtainment of a detailed knowledge about traditional project management methods according to PMI;

C2. Obtainment of a detailed knowledge of software sizing.

C3. Obtainment of a basic knowledge of Agile project management methods

C4. Obtainment of knowledge about the significance of people in project management, especially about the leadership and the project team, about resistance, conflict and crisis management,

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:

PEK_W01 – student knows how to formulate the goal, how to verify the feasibility and how to plan a project in case traditional project management methods are used;

PEK_W02 – student knows traditional project realization control methods;

PEK_W03 – student has ordered knowledge of the measuring the software size and complexity.

PEK_W04 – student has a basic knowledge of Agile project management methods.

PEK_W05 – student knows the role and the tasks of project manager

PEK_W6 - student knows the role of the project team, methods of its building, the dynamics of its development;

PEK_W7 – student knows the essence of resistance, conflict and crisis and methods of their management;

relating to skills:

PEK_U01 – student is able to prepare a project chart and elaborate its plan (traditional and agile methods)
PEK_U02 – student is able to control the realization of simple projects (traditional and agile methods)

Relating to social competences:
PEK_K01 – student understands the essence of project management and its role in the contemporary world;
PEK_K02 – student is aware of the existing barriers and constraints in implementing PM.
PEK_K03 – student knows how to work in group
PEK_K04 – student is able to critically assess method proposed to him.

PROGRAMME CONTENT

Form of classes - lecture		**Number of hours**
Lec 1	Project goal, basic documents of project planning, project scheduling	2
Lec 2	Project cost estimation, project risk management, project realization control	2
Lec 3	Exam – 1. Part	2
Lec 4	Basic definitions. The evolution of software sizing requirements.	2
Lec 5	Case study for use FP and UCP method.	2
Lec 6	MOOSE metrics, exam – 2.part	2
Lec 7	Introduction in soft project management, leadership. Management styles.	2
Lec 8	Project team management	2
Lec 9	Conflict, resistance and crisis management. Exam – 3. part	2
	Total hours	18

Form of classes - class		**Number of hours**
Cl 1		
Cl 2		
Cl 3		
Cl 4		
..		
	Total hours

Lab 2		
Lab 3		
Lab 4		
Lab 5		
Lab 6		
Lab 7		
Lab 8		
	Total hours	

Form of classes - project	**Number of hours**

P 1	Explaining the requirements and the principles of getting credits	2
P 2	Preparation of project charter for a new, proposed by the team IT project – explanation of the task	2
P 3	Creating a schedule for the proposed project, managed by means of the Waterfall model of software development	2
P 4	Creating a schedule for the proposed project, managed by means of the Scrum Agile software development method	2
P 5	Creating Risk Register showing the results of risk identification, its analysis and risk responses planning	2
P 6	Conducting an interview with the manager of a project carried out in a real IT company and preparing a report describing the project management method used in company	2
P 7	Discussion about the reports from P2, P3 and P4	2
P 8	Discussion about the reports from P5 and P6	2
P 9	Making up the missing parts of the project, the final mark	2
	Total hours	18

Form of classes - seminar		**Number of hours**
Sem 1		
Sem 2		
Sem 3		
…		
	Total hours

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

Knowledge about:
1. theory of organisation and management
2. essentials of enterprise management
3. basics of computer science

\

SUBJECT OBJECTIVES

C1 Knowledge of integrated management information systems (IMIS)
C2 Ability to use ERP IMIS
C3 Knowledge of the implementation of IMIS

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:
PEK_W01 – knowledge of MIS classifications
PEK_W02 – knowledge of rules of MIS integration
PEK_W03 – knowledge of basic functions in business areas of MIS
PEK_W04 – knowledge of MIS history and new approaches
PEK_W05 – knowledge of the MIS implementation in the organization
PEK_W06 – knowledge of rules of selecting MIS
PEK_W07 – knowledge of human aspects of the MIS implementation
PEK_W08 – knowledge of gathering requirements before the MIS implementation (e.g. business process modeling)
PEK_W09 – knowledge of risk factors in the MIS implementation
relating to skills:
PEK_U01 – ability to classify a MIS

PEK_U02 – ability to find differences between MRP – MRPCL – MRPII – MRPIII – ERP – ERPII
PEK_U03 – ability to plan implementation of MIS
PEK_U04 – ability to find and minimalize risk factors during the MIS implementation
PEK_U05 – ability to set goals for the MIS implementation
PEK_U06 – ability to plan trainings for users of MIS
PEK_U07 – ability to analyze functionality of ERP system
PEK_U08 – ability to model business process
PEK_U09 – ability to prepare and present own approach to the MIS implementation

relating to social competences:
PEK_K01 – ability to searching for information and analyzing
PEK_K02 – developing ability to think independently and creatively
PEK_K03 – understand the importance of business requirements in the design and implementation of information systems
PEK_K04 – developing entrepreneurial thinking
PEK_K05 – developing the skills of group working

PROGRAMME CONTENT

Form of classes - lecture		**Number of hours**
Lec 1	Introduction	1
Lec 2	APICS standards (MRP, MRPII)	2
Lec 3	Classification of integrated systems according to APICS standards (MRP, MRP-CL, MRPII, MRPII+/MRPIII)	2
Lec 4	ERP systems	2
Lec 5	ERP II systems	2
Lec 6	Service Oriented Architecure (SOA) and mobile technologies in management	1
Lec 7	General characteristics of management information system sets	2
Lec 8	Informatics strategies of enterprise management	2
Lec 9	Choosing and implementation of system set	2
Lec 10	Implementation risks	1
Lec 11	Conclusion	1
	Total hours	18

Form of classes - class	**Number of hours**

Form of classes - laboratory		**Number of hours**
Lab 1	Introduction to ERP system	1
Lab 2	General settings	1
Lab 3	Calculation of product’s costs	1
Lab 4	Purchasing orders (PO)	1
Lab 5	Work orders (WO)	1
Lab 6	MRP planning	2
Lab 7	Analysis of selected area of ERP system	1
Lab 8	Conclusion	1
	Total hours	9

TEACHING TOOLS USED

N1. Traditional lecture
N2. Using MIS tool
N3. Work with the teacher
N4. Self-learning – for labs
N5. Self-learning – for lectures

EVALUATION OF SUBJECT EDUCATIONAL EFFECTS ACHIEVEMENT

Evaluation (F – forming (during semester), P – concluding (at semester end)	Educational effect number	Way of evaluating educational effect achievement
F1	PEK_W01 – PEK_W10 PEK_U01–PEK_U06 PEK_K01 PEK_K03	Exam (test)
F2	PEK_U07 –PEK_U10 PEK_K01 PEK_K02 PEK_K04 PEK_K05	Evaluation of the seminar and lab work
C = F1 + F2
