

FACULTY W-8 / DEPARTMENT.....					
SUBJECT CARD					
Name in Polish Systemy multimedialne					
Name in English Multimedia Information Systems					
Main field of study (if applicable): IT					
Specialization (if applicable): Computer Engineering					
Level and form of studies: 1st/ 2nd* level, full-time / part-time*					
Kind of subject: obligatory / optional / university-wide*					
Subject code INZ000147W1					
Group of courses YES / NO*					
	Lecture	Classes	Laboratory	Project	Seminar
Number of hours of organized classes in University (ZZU)	30		30		
Number of hours of total student workload (CNPS)	90		120		
Form of crediting	Examination / crediting with grade*	Examination / crediting with grade*	Examination / crediting with grade*	Examination / crediting with grade*	Examination / crediting with grade*
For group of courses mark (X) final course	X				
Number of ECTS points	3		4		
including number of ECTS points for practical (P) classes			3		
including number of ECTS points for direct teacher-student contact (BK) classes	1,8		2,4		

*delete as applicable

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

1. Knowledge of object-oriented programming.
2. Basic knowledge of computer application interface design.
3. Elementary knowledge of graphics programs.

SUBJECT OBJECTIVES

- C1 Provide basic knowledge of the design of multimedia applications.
- C2 Learning programming multimedia applications in Adobe Flash and HTML5.
- C3 Presentation graphics software.

SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:

PEK_W01 He knows and understands multimedia applications specific.

PEK_Wo2 Has knowledge of the design and development of multimedia applications.

PEK_W03 Has knowledge of software tools for processing and multimedia creation.

relating to skills:

PEK_U01 Able to define a set of potential functional requirements of multimedia applications and, based on this set, can design a multimedia application.

PEK_U02 He can build a multimedia application.

PEK_U02 He can convert and generate media.

relating to social competences:

PEK_K01 Able to work with a potential user of multimedia application in order to define the set of possible functional requirements.

PEK_K02 It can take into account in the design process of mobile application interface specific requirements of a potential user.

PROGRAMME CONTENT

Form of classes - lecture		Number of hours
Lec 1	The presentation of the lecture plan. A review of selected multimedia applications implemented in different runtime environments. Presentation of Adobe Flash Environment. Demonstration of constructing multimedia applications in Adobe Flash.	2
Lec 2	Presentation of the basic elements of the Adobe Flash. Presentation of the principles of design and multimedia applications run in Adobe Flash. Programming mechanisms of interaction.	2
Lec 3 Lec 4	Grammar describes the basics of ActionScript 3.0. Presentation and discussion of selected examples of programs in ActionScript 3.0.	4
Lec 5	Analysis of complex mechanisms of interaction and navigation multimedia application. Presentation of the AS 3.0 code fragments implementing mechanisms of navigation.	2
Lec 6 Lec 7	A review of selected media data compression formats. Presentation methods of media management in Adobe Flash CS6 from the timeline and ActionScript 3.0. Discussion of mechanisms for streaming media data, and methods for working with audio and video. Presentation and analysis of the source code for multimedia applications using audio and video. Overview of multimedia application design principles of the peculiarities of the target group, the platform runtime and lifetime of the application.	4
Lec 8	Describes the basics of computer animation. Discussion of the animation in the timeline and animation implemented in AS 3.0. Presentation of the arrangements for using the motion editor panel (Motion Editor). Explanation idea of inverse kinematics and transformations.	2
Lec 9	Overview and characteristics of programming environments used for multimedia processing components of multimedia applications. Describes the basics of using Photoshop. Presentation 3ds Max Design. Discussion of the principles of cooperation Photoshop and 3ds Max Design with the Adobe Flash environment.	2
Lec 10	Discussion of the principles of design and construction of multimedia mobile applications in Adobe Flash. Presentation and discussion of program code in AS	2

	3.0, dedicated mobile platforms.	
Lec 11	Presentation environments alternatives to Adobe Flash for example, Adobe	
Lec 12	Director, Microsoft Silverlight and HTML5. Describes the basics of grammar HTML5. Overview of HTML5 canvas elements. Presentation of the principles API canvas elements. Discussion of the principles of working with images and video clips. Discussion of the principles of animation and interaction with the elements of the canvas. Presentation and discussion of the code sample programs implemented in HTML5.	4
Lec 13	Discussion of the principles of the use of 3D graphics for multimedia applications.	
Lec 14	Presentation and discussion of the example design and animation of 3D objects in the environment 3ds Max Design. Creating and managing objects in a 3D environment in Adobe Flash. Discussion environments support the creation of 3D graphics in AS 3.0. The presentation the possibility Papervision and Away3D environments. Presentation and discussion of the principles of combining components Papervision and Away3D with native code multimedia applications in AS 3.0.	4
Lec 15	Summary of the lecture. Discuss the importance of mobile multimedia applications. Discussion of factors affecting the commercial success of a multimedia application.	2
	Total hours	30
Form of classes - class		Number of hours
CI 1		
CI 2		
CI 3		
CI 4		
..		
	Total hours	
Form of classes - laboratory		Number of hours
Lab 1	Presentation of the principles of operation of the laboratory and the principles of assessment. Basic use of the Adobe Flash environment. How to use the GUI tools. Animations in the timeline.	2
Lab 2	Defining symbols: buttons, movie clip and graphic. The implementation of the mechanisms of interaction. Importing multimedia components to the working environment.	2
Lab 3	An interactive gallery of photos from the alpha channel animation in the timeline (in the form of movie clips). Construction applications on multiple layers. Interaction and animation in AS 3.0.	2
Lab 4	Design interactive photo gallery with exciting animation and sound. Coding in AS 3.0. Downloading multimedia components from the application library.	2
Lab 5	Construction of the complex mechanisms, interactive animation in AS 3.0.	2
Lab 6	Constructing an application that retrieves multimedia components from external sources (from the indicated storage location) in AS 3.0.	2
Lab 7	Constructing sound management of multimedia applications and video in AS 3.0. Implementation of the built-in mechanisms audio and video.	2
Lab 8	Using the motion editor panel (Motion Editor). Preparing an animated banner using motion editor.	2
Lab 9	Designing a 3D object model and implementation of animation in 3ds Max Design environment.	2
Lab 10	Designing complex 3D object in the 3ds Max Design. The implementation of a set	4

Lab 11	of animation movements between selected points 3d object. Export animation to Adobe Flash. Programming navigation mechanism in AS 3.0.	
Lab 12	Implementation interactive animation in HTML5.	2
Lab 13	Designing a multimedia e-learning applications (with elements of interactive tests), implementation in AS 3.0, running and testing of the tablet with Android.	4
Lab 14		
Lab 15	Summary laboratory. Credit lab.	2
	Total hours	30
Form of classes - project		Number of hours
Proj 1		
Proj 2		
Proj 3		
Proj 4		
...		
	Total hours	
Form of classes - seminar		Number of hours

Sem 2		
Sem 3		
...		
	Total hours	
TEACHING TOOLS USED		
<p>N1. Lectures in the form of multimedia presentations.</p> <p>N2. Introduction to laboratory prepared in the form of a multimedia presentation that contains the specification of the tasks and detailed, documented and contain comments sections of code, useful for the task. Materials sent by e-mail.</p> <p>N3. Collections of web addresses and articles in electronic form, which are an additional source of teaching material, contextually related laboratory tasks. Materials sent by e-mail.</p> <p>N4. Individual consultations.</p>		

EVALUATION OF SUBJECT EDUCATIONAL EFFECTS ACHIEVEMENT

Evaluation (F – forming (during semester), P – concluding (at semester end)	Educational effect number	Way of evaluating educational effect achievement
F1	PEK_W01 PEK_W02 PEK_W03 PEK_U01	During the laboratory classes, students solve 9 laboratory tasks in accordance with the specification. For each correctly solved problem is worth 0, 1 or 2 points.

	PEK_U02 PEK_U03	
F2	PEK_W01 PEK_W02 PEK_W03 PEK_U01 PEK_U02 PEK_U03 PEK_K01 PEK_K02	The summary of the laboratory is design multimedia e-learning applications (with elements of interactive tests) according to the specifications of 10 laboratory task in AS 3.0 and run on an Android tablet. The task 10 may be obtained 0, 1, 2, 3 or 4 points.

C The final evaluation of the laboratory is determined by the points P obtained during the laboratory according to the table. Assessment 5.0 and 5.5 can be obtained only under the condition that solves the task 10

P	10-11	12-13	14-15	16-17	18-20	21-22
Grade	3,0	3,5	4,0	4,5	5,0	5,5

The final evaluation of the lecture is determined based on a paper written about the programming of mobile multimedia systems.

PRIMARY AND SECONDARY LITERATURE

PRIMARY LITERATURE:
